Introductory Accounting I

Loyola University Chicago Course Catalog

Arrupe College - Accounting - Subject: Accounting

ACACT 201(3) Course ID:013000 15-DEC-2014

The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners; equity.

Outcomes: The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems. The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions.

Components:Lecture(In person)Requirement Group:Restricted to Arrupe College StudentsRoom Requirements:Electronic Classroom(1)

ACACT 202(3) Course ID:013001 15-DEC-2014

Introductory Accounting II Prerequisite: ACACT 201 Introductory Accounting I

This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.

Components:Lecture(In person)Requirement Group:Prerequisite: ACACT 201 Introductory Accounting IRoom Requirements:Electronic Classroom(1)

Arrupe College - Biology - Subject: Biology

Course ID:013284 31-MAR-2016 ACBIO 152(4) Human Anatomy and Physiology I Lecture, laboratory and demonstrations. Organization of the human body from the cellular to the system level. Anatomy of specific body systems and their related physiology. Dissection of representative organs required in some laboratory exercises. (Biology 152 is for non - majors. Designed for Allied Health Students only. Does not count for credit towards Biology Major or Minor. Components: Laboratory, Lecture(In person) Course Equivalents: BIOL 152 Requirement Group: Restricted to Arrupe College Students Room Requirements: Lab - Biology(1), Electronic Classroom(1) ACBIO 153(4) Course ID:013285 31-MAR-2016 Human Anatomy and Physiology II

A continuation of 152. Lecture, laboratory and demonstrations. Anatomy of specific organismal systems and their related physiology. Dissection of representative organs required in some laboratory exercises. (Biology 153 is for non - majors. Designed for Allied Health Students only. Does not count for credit towards Biology Major or Minor.

Outcome: Students will be able to demonstrate understanding of the workings of the human body from an anatomical and physiological viewpoint.

Components:Laboratory(In person), Lecture(In person)Course Equivalents:BIOL 153Requirement Group:Pre-requisite:Room Requirements:Lab - Biology(1), Electronic Classroom(1)

ACCRJ 204(3) Corrections

This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.

Outcomes: Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently.

Arrupe College - Interdisciplinary Science - Subject: Interdisciplinary Science

ACISC 101(3) Course ID:012994 15-DEC-2014 Interdisciplinary Science: Scientific Basis of Environmental Issues The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues. Outcomes: 1) Exhibit knowledge of the nature of the four Earth systems 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data.3) Understand the role of energy and thermodynamics in ecosystems; 4) Understand and describe important cycles in nature Components: Lecture(In person) Requirement Group: Restricted to Arrupe College Students

Requirement Group: Restricted to Arrupe College Stude Room Requirements: Electronic Classroom(1)

ACISC 102(4) Course ID:012995 15-DEC-2014

Interdisciplinary Science: Environmental Processes, Challenges, and Methods This course combines lectures and laboratory-based inquiry. The lecture portion of this course will examine the scientific issues underlying a series of significant threats to the planet. These include the loss of biodiversity, ensuring access to a stable supply of food and water for all of the Earth's inhabitants, climate change, and the demands for energy and other resources. In addition to learning the relevant science for these issues, students will investigate possible responses to these planetary threats.

The laboratory portion of the course will provide students with the opportunity to learn basic and intermediate lab skills commonly used in environmental science, including measuring properties of matter, analyzing soil, water and atmospheric samples, as well as the mathematics needed to analyze data and draw inferences from evidence.

ACMAT 100(3) Course ID:013180 15-JUN-2015

This course focuses on the foundations of algebra. Topics include the real number system operations, variable expressions, linear equations and inequalities, graphing linear equations in two variables, slope and equations of a line, exponents and polynomials, applications of proportion, percent and the use of formulas to develop problem solving skills.

¿ Outcome 1: Students will evaluate variable expressions. ¿ Outcome 2: Students will solve and graph linear equations in two variables. ¿ Outcome 3: Students will apply ratios and proportions Components: Lecture(In person) Requirement Group: Restricted to Arrupe College Students Room Requirements: Electronic Classroom(1)

ACMAT 117(0) Course ID:013283 30-MAR-2016

Precalculus I

This calculus course is designed specifically for students in business and the social sciences. It emphasizes applications of the basic concepts of calculus rather than proofs. Topics must include limits; techniques of differentiation applied to polynomial, rational, exponential, and logarithmic functions; partial derivatives and applications; maxima/minima of functions.

ACMAT 100 with a ""C"" or better or ACSTA 100

Outcomes: Inverse functions, quadratic functions, complex numbers, polynomial functions including zeros, factor theorem, graphs, rational functions, exponential and logarithmic functions and their applications, equations, and inequalities.

Components:Lecture(In person)Course Equivalents:MATH 117Requirement Group:Pre-Requisite: Minimum grade of C- in ACMAT 100 or ACSTA 101Room Requirements:Electronic Classroom(1)

Auditing & Internal Control Systems

Course involves an in-depth investigation of internal control structure and systems and the theory of audit evidence. Theoretical principles and practical issues involved in planning and executing an audit are explored. Internal control policies and procedures and principal evidence techniques for major transaction cycles or account groups are studied in depth. Study of appropriate AICPA professional standards is an integral part of this course.

Outcomes: Students who successfully complete this course will be able to: understand the role of professional standards in the audit of financial statements; demonstrate their ability to research those standards; and demonstrate their understanding of the audit process in particular the roles of evidence and internal control.

ECON 325(3) Course ID:002438 01-APR-2011

Prerequisites: Sophomore standing, minimum grade of ""C-"" in ECON 201 and 202.

This course describes and analyzes the problems and policy issues facing developing countries and the third world with respect to their economic and social policies and programs.

Outcome: The students are trained to evaluate the economic conditions that are conducive to economic growth and critically assess ethical arguments as they relate to growth, trade, and poverty in emerging countries. The role of leadership is emphasized. Components: Lecture

Course Equivalents: INTS 325 Attributes: International Business, International Studies Requirement Group: Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202. Room Requirements: General Classroom(1)

ECON 327(3) Course ID:002440 01-JAN-2015 American Economic & Business History

Prerequisites: Sophomore standing, minimum grade of ""C-"" in ECON 201 and 202.

This course emphasizes the evolution and the role of past business leaders of the American economy from the colonial times to the present, emphasizing the entrepreneurs and the environments in which they operated. Economic and business change in the period 1865-1914 receives particular attention, as do the enterprises of Chicago-area entrepreneurs.

Outcome: Students learn the skills required of entrepreneurs and business leaders and their contribution to society. Students will develop an awareness of the historical dynamics that produced the current economy, and how its institutions evolved and the importance of markets in allocating resources.

Components:Lecture(In person)Requirement Group:Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202.Room Requirements:Electronic Classroom(1)

Environmental Economics

Prerequisites: Sophomore standing, minimum grade of ""C-"" in ECON 201.

This course applies economic theory to environmental and natural resource problems and policies, investigates the role economic incentives play, and discusses externalities, property rights, common property problems, pollution and pollution control, and renewable and non-renewable resource management.

Outcome: Students will understand that environmental problems are fundamentally economic problems that come about because there is a market failure (e.g., an externality or public good) and that environmental problems have economic solutions.

Components:Lecture(In person)Attributes:Environmental StudiesRequirement Group:Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201.Room Requirements:Electronic Classroom(1)

Course ID:010705

ECON 329(3)

Health Economics

Prerequisites: Sophomore standing and a minimum grade of ""C-"" in ECON 201.

This course provides an understanding of the unique economic complexities of the health care industry and individual health behaviors. Relying on economic principles of scarcity, efficiency, productivity, and market behavior, demand and supply of health care, the role of government in determining health care policy, and medical practices are explored.

01-JAN-2015

ECON 602E(1.5) Course ID:002479 15-MAY-2014 Global Issues in Economics Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues. Components: Lecture Course Equivalents: ECON 424E Requirement Group: Restricted to students in the Graduate School of Business MBA for Executives program. ECON 622(3) Course ID:009828 01-JAN-2013 Derivative Securities Prerequisite: FINC 450 This course is an introduction to options, futures, forwards and swaps as derivative securities. After an overview of these securities, a detailed examination of the methods of valuing options will be presented. Binomial trees and a discussion of the Black-Scholes option pricing model will be emphasized, followed by insights into option contracts as useful risk management instruments. A brief introduction to stochastic calculus is also given. Stock, index, debt, commodity, foreign currency and futures options are reviewed, and option strategies are analyzed as managerial tools in financial decision-making. Skills developed in this course include analytical and decision-making, creative thinking and communication. Throughout the course the notion of risk both as potential loss and opportunity for gain and its management will be highlighted. Lecture(In person) Components: Requirement Group: Prerequisite: FINC 450. Room Requirements: Electronic Classroom(1) Course ID:009830 27-SEP-2010 ECON 623(3) Topics in Derivative Securities Prerequisite: FINC 622 or ECON 622 This course builds on FINC 622 and extends the analysis of derivatives by focusing on futures and swaps. It also builds on the previous study of options, particularly by illustrating the power of lattice methods. The course is designed to give a better understanding of how to actually work with and price derivatives. Financial derivatives are complicated and controversial instruments that are often misunderstood by the broader public and that come under frequent attack (some surely deserved). An aim of this course is to build a better understanding of the social function of derivative markets in three ways. First, we consider the social function of derivatives explicitly; second, we focus on the role of derivatives in the recent (or still Lecture(In person) Components: Course Equivalents: FINC 623 Requirement Group: Prerequisite: FINC 622 or ECON 622 Derivative Securities **Room Requirements:** Electronic Classroom(1) ECON 624(3) Course ID:010883 25-JUN-2008 Mathematics for Finance and Economics Lecture(In person) Components: Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1) ECON 625(3) Course ID:010884 27-SEP-2010 Applied Econometrics Prerequisite: ECON 420 and ISOM 491 The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects. Lecture(In person) Components: Course Equivalents: FINC 625 Requirement Group: Prerequisite: ECON 420 and ISOM 491

School of Business Admin - Finance - Subject: Finance

18-DEC-2013 FINC 557M(1.5) Course ID:012711 Enterprise Risk Management Prerequisite: Must be part of the Cohort of Intercontinental MBA students. This course explores the emerging practice of ""enterprise risk management"" (ERM) or ""integrated risk management" "-a new managerial outlook on managing risk. Enterprise risk management considers all the risks faced by the firm and attempts to integrate these disparate risks into a single unified analytical framework. Traditionally, risk has been managed in the compartments of financial risk, operating risk, and credit risk. Outcomes: Upon completing this course, students will have a greater understanding of the nature of risk that affect the entire enterprise and they will be able to analyze risk is a more systematic and rigorous manner. Components: Lecture(Hybrid) Requirement Group: Restricted to students in the Intercontinental MBA program Room Requirements: Electronic Classroom(1) FINC 559(3) Course ID:003033 12-NOV-2013 Federal Watching & Monetary Policy Prereg: FINC 450 The Federal Reserve is the most important economic policy-making institution in the U.S. This course attempts to demystify the Fed by examining its purpose, organization, function, and operations, in particular with predicting the impact of monetary policy on financial markets and interest rates. Outcome: Students will be able to understand the monetary policy operations of the Federal Reserve, how and why they are undertaken, interpret its actions, and predict the impact for the economy, including interest rates. Students will become ¿Fed watchers.; Components: Lecture Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: General Classroom(1) FINC 599(3) Course ID:009663 31-MAR-2010 Special Topics Prerequisite: FINC 450. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary. Outcome: Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings Components: Lecture(In person) Requirement Group: Prerequisite: FINC 450. FINC 600E(3) Course ID:003034 01-JAN-2014 Financial, Investment & Portfolio Management Executive MBA Students Only. Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks, and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty. Lecture(In person) Components: Course Equivalents: FINC 450E **Requirement Group:** Restricted to students in the Graduate School of Business MBA for Executives program. |------------------------------------|------------------|-------------|
| Topics in Derivative Securities | | |
| Prerequisite: FINC 622 or ECON 622 | 2. | |

This course builds on FINC 622 and extends the analysis of derivatives by focusing on futures and swaps. It also builds on the previous study of options, particularly by illustrating the power of lattice methods. The course is designed to give a better understanding of how to actually work with and price derivatives. Financial derivatives are complicated and controversial instruments that are often misunderstood by the broader public and that come under frequent attack (some surely deserved). An aim of this course is to build a better understanding of the social function of derivative markets in three ways. First, we consider the social

function of derivatives explicitly; second, we focus on the role of derivatives in the recent (or still Components: Lecture(In person) Course Equivalents: ECON 623 Requirement Group: Prerequisite: FINC 622 or ECON 622 Derivative Securities Room Requirements: Electronic Classroom(1) FINC 624(3)

Interest Rate Risk Management Prerequisites: FINC 450 and either FINC 622 or FINC 558.

Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.

Outcome: Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks.

Requirement Group: Prerequisites: FINC 450 and either FINC 622 or FINC 558. Room Requirements: General Classroom(1)

FINC 625(3) Course ID:010886 27-SEP-2010

Applied Econometrics Prerequisite: ECON 420 and ISOM 491

The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.

Components:Lecture(In person)Course Equivalents:ECON 625Requirement Group:Prerequisite:ECON 420 and ISOM 491Room Requirements:Electronic Classroom(1)

FINC 626(3)Course ID:01088727-SEP-2010Credit Risk Management and Structured FinancePrerequisite: FINC 622 / ECON 622 Derivative Securities

We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

HRER 416(3) Course ID:009971 26-DEC-2012

This course is designed to challenge students to systematically think about ethical dilemmas that face us as employees, managers, and Human Resource / Employment Relations professionals in work organizations. This course is only open to students in the MSHR degree program.

Learning Outcomes

Ethics of Employment and Diversity

In addition to familiarity with basic frameworks of ethical decision-making, students will grapple with ethical issues that are common in today;s workplace, including job security, unionization, employee privacy, whistleblowing, conflicts between personal morals and job requirements, gender and racial diversity, and effects of globalization on labor and employment.

Components:Lecture(In person)Requirement Group:Pre-requisite: Graduate School of Business student.Room Requirements:Electronic Classroom(1)

HRER 417(3) Course ID:009986 12-NOV-2013

Managing and Motivating in the Workplace The course primarily explores the structure and function of human behavior in organizations. Students will be

introduced to the principles of theory of perception, motivation, decision-making, job and organizational design as they relate to organizational realities such as power, politics and change.

Learning Outcomes

Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics.

HRER 422M(1.5)

04-SEP-2013 Course ID:012663 Global Human Resources Management

Prerequisite: Must be part of the Cohort of Intercontinental MBA students.

This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team-building, and communication.

Outcomes:

To survey the three types of topics covered by the field of Global HRM: 1. management of human resources in global corporations Lecture(Hybrid) Components:

Requirement Group: Restricted to students in the Intercontinental MBA program **Room Requirements:** Electronic Classroom(1)

Course ID:009989 HRER 424(3) 22-JUN-2006

Employee Benefit Plans I

Students are introduced to the theory of insurance and savings. Based on this introduction, the design, funding and administration of life, health, and disability insurance and corporate pension and savings plans are examined.

Learning Outcomes

Students learn about contemporary health, welfare, pension and Social Security plans. In addition, they learn to approach problems of cost control and legislative regulation as it applies to employers; ability to provide benefits.

Components: Lecture(In person) Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)

HRER 429(3) Course ID:010057 06-FEB-2013

Human Resource Development

This course examines how organizations develop employees with the appropriate technical, interpersonal and leadership skills to be effective in their jobs.

Learning Outcomes

Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, and to evaluate the impact of the program on the employee and organization. In addition to conducting formal training programs, students will learn how to use career planning, job rotation and performance feedback to develop employees and themselves. Students will improve their presentation, team leadership, analytical and writing skills.

Components: Seminar Course Equivalents: HRIR 429, CORD 429 Requirement Group: Pre-requisite: Graduate School of Business student.

Course ID:010058

HRER 430(3)

Organization Development

This course examines how the effectiveness and the quality of life in organizations can be increased using collaborative methods.

06-FEB-2013

Learning Outcomes Students will learn to apply concepts from team building, employee involvement, work design, and large group interventions to organizational settings. In addition, students will increase their overall knowledge and effectiveness about leadership, organization development, training and human resource management. Lecture(In person) Components: Course Equivalents: HRIR 430, CORD 430 Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)

HRER 431(3) Course ID:010059 29-JUN-2006 Strategic Change Components: Lecture(In person) Course Equivalents: CSIS 472, HRIR 431, MGMT 472 Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)

INFS 247(3) Course ID:004157 01-JAN-2015 Business Information Systems Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access). Outcome: Understanding of using information technology to support business processes, and of developing business spreadsheet and database applications. Components: Lecture(In person) Course Equivalents: INFS 247H **Room Requirements:** Electronic Classroom(1) INFS 247H(3) Course ID:012358 20-MAR-2012 Business Information Systems - Honors Restricted to SBA honors students. Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access). Outcomes: Understanding of using information technology to support business processes, and of developing business spreadsheet and database applications. Lecture(In person) Components: Course Equivalents: INFS 247 Requirement Group: Restricted to students in the Quinlan Business Honors program. Req. Designation: Business Honors Room Requirements: Electronic Classroom(1) 15-JUN-2014 INFS 346(3) Course ID:004168 Database & Data Warehousing Systems Prerequisites: Sophomore Standing, minimum grade of ""C-"" in INFS/ISOM 247. Covers current concepts in database theory and use. The course teaches design, implementation, and utilization of relational database management systems by covering the processes, tools, and methodologies such as business requirement collection, ER modeling, relational modeling, normalization, SQL, and MS Access. Outcome: Students will be able to demonstrate understanding of how to effectively develop and use business database system. Components: Lecture(In person) Requirement Group: Prerequisites: Sophomore Standing, minimum grade of "C-" in INFS/ISOM 247. Room Requirements: Electronic Classroom(1) INFS 347(3) Course ID:004169 01-AUG-2012 Systems Analysis & Design Prerequisites: Junior Standing, minimum grade of ""C-"" in INFS/ISOM 247. This course studies methods for analyzing, developing and implementing business information systems. Stages of the systems development life cycle are explored in depth. Tools and techniques for structured and object-oriented analysis and design are discussed. Outcome: Understanding of the development and implementation of business information systems. Components: Lecture(In person) Requirement Group: Prerequisites: Junior Standing, minimum grade of "C-" in INFS/ISOM 247. Room Requirements: Electronic Classroom(1) Course ID:004170 INFS 348(3) 02-JAN-2016 Client Analytics Applications This class covers current concepts in computer analytics applications. The course emphasis is on how clients can leverage modern computing architectures and technology such as, Hadoop and R, to analyze patterns across large amounts of data. These relevant technologies (Hadoop and R) will be heavily utilized in the course. Prerequisite: Minimum grade of ""C-"" in INFS 346 or COMP 353 Outcomes: The student will be able to demonstrate understanding of how to effectively use technologies such as Hadoop & R for solving business problems of varying levels of complexity. Components: Lecture(In person) Requirement Group: Prerequisite: Minimum grade of "C-" in INFS 346 or COMP 353 Room Requirements: Electronic Classroom(1)

School of Business Admin - Info Systems & Operations Mgmt - Subject: Information Systems - Bus INFS 492E(1.5) Course ID:012780 15-JUN-2015 Business Intelligence/Data Warehousing Enrollment is restricted to students in the Executive MBA Program. Explores concepts of data warehousing and business intelligence from a managerial perspective. Lecture(Hybrid) Components: Course Equivalents: INFS 600E Requirement Group: Restricted to students in the Graduate School of Business MBA for Executives program in Chicago Room Requirements: Electronic Classroom(1) INFS 492M(1.5) Course ID:012655 21-AUG-2013 Database and Data Warehousing Prerequisites: Must be part of the Cohort of Intercontinental MBA students This course uses database systems as the focus for studying concepts of data modeling and data manipulation. Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and using it to support business processes. Outcomes: Understanding the development and use of business database systems. Components: Lecture(Hybrid) Requirement Group: Restricted to students in the Intercontinental MBA program Room Requirements: Electronic Classroom(1) INFS 493(3) Course ID:004192 29-JUN-2012 Strategic Uses of IT Focuses on how to think about strategic use of information and information technology for competitive advantage. It introduces different approaches dealing with (e-)business strategy in ever-changing, IT-intensive environments. (Online) case discussions are used to illustrate the application of various approaches. Outcome: Think strategically about information technology to gain a competitive advantage. Components: Lecture(In person) Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1) INFS 493E(1.5) Course ID:012776 15-APR-2015 Strategic Use of Information Technology Enrollment is restricted to students in the Executive MBA Program. Focuses on the use of information technology for competitive advantage, including the management of information as a corporate resource, and information systems planning and its relationship to corporate planning. Lecture(In person) Components: Course Equivalents: INFS 601E, ISSCM 601E Requirement Group: Restricted to students in the Graduate School of Business MBA for Executives program in Chicago **Room Requirements:** Electronic Classroom(1) INFS 494(3) Course ID:004193 21-DEC-2015 Data Mining

Data Mining involves the search for patterns in large quantities of data. The fundamental techniques used in data mining include, but are not limited to, clustering, decision trees, neural networks, and association analysis.

Outcome: The student will be able to build models using an industry-standard package and interpret the results. Components: Lecture(In person) Course Equivalents: CSIS 494 Requirement Group: Prerequisites: ISOM 491 & INFS 492 & Must be enrolled in the Graduate School of Graduate School of Bus

15-JUN-2016

SCMG 488(3) Course ID:012391 15-JUN-2016

Prerequisites: OPMG 486 (Global Logistics).

A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.

Outomes: Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain. Components: Lecture(In person) Requirement Group: Prerequisite: OPMG 486 Global Logistics; Graduate School of Business students

Room Requirements: General Classroom(1)

SCMG 489(3) Course ID:012389 Supply Chain Analytics Prerequisites: OPMG 486 (Global Logistics).

A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.

Outcomes: Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems.

Components:Lecture(In person)Requirement Group:Prerequisite: OPMG 486 Global Logistics; Graduate School of Business studentsRoom Requirements:Lab - Computer(1)

School of Business Admin - Marketing Department - Subject: Marketing

Course ID:009852 15-JAN-2015 MARK 201(3) Principles of Marketing

Prerequisite: Sophomore standing.

Principles of Marketing - Honors

This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.

Outcome: Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization. Lecture(In person) Components: Course Equivalents: MARK 201H, CPST 340 Requirement Group: Pre-requisite: Sophomore standing or above. Room Requirements: Electronic Classroom(1)

MARK 201H(3) Course ID:012375 02-NOV-2012

Prerequisites: Sophomore standing or above; Restricted to SBA honors students.

This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.

Outomcomes: Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization. Lecture(In person) Components: Course Equivalents: CPST 340, MARK 201 Requirement Group: Prerequisite: Sophomore standing or above; restricted to SBA honors students Req. Designation: Business Honors Room Requirements: Electronic Classroom(1)

MARK 310(3) Course ID:004949 15-MAR-2006

Prerequisites: Junior standing, minimum grade of ""C-"" in MARK 201.

This course develops an understanding of how consumers behave before, during and after the consumption process through a discussion of cultural, social and perceptual factors.

Outcome: Students evaluate consumer behavior and apply their understanding in the creation of a marketing plan designed to improve the brand equity of a firm. Components: Lecture

Requirement Group: Prerequisites: Junior standing, minimum grade of "C-" in MARK 201. **Room Requirements:** General Classroom(1)

Course TD:013164

Course TD:004951 MARK 311(3) 15-JUN-2013

Prerequisites: Junior standing, minimum grade of ""C-"" in MARK 201 and ISOM 241.

This course develops an understanding of the research process from problem formulation through research report preparation. Both qualitative and quantitative research methodologies are discussed. The focus is on using research results in marketing decision making. Empirical data are analyzed using state of the art analytical tools.

Outcomes: Students identify managerial problems, research objectives, design data collection instruments, and sampling procedures. Data collection and analysis is discussed. Cases, exercises and/or a written research proposal or report is a primary outcome of the course.

Components: Lecture Requirement Group: Prerequisites: Junior standing, minimum grade of "C-" in MARK 201 and ISOM 241. **Room Requirements:** General Classroom(1)

MARK 320(3)

Consumer Behavior

Marketing Research

Marketing for Environmental Sustainability The course shows students how to use marketing to address the complexities of sustainability including: climate change, poverty, food shortages, oil depletion and species extinction. Design-for-environment, full-cost pricing, greening the channels of distribution and life-cycle impact are some of the concepts covered in this course.

Prerequisites: MARK 201 and Junior Standing

Outcomes: Provide students with the knowledge and skills needed to develop marketing products that contribute to environmental sustainability. Components: Lecture(In person)

15-JUN-2015

School of Business Admin - Management - Subject: Entrepreneurship

ENTR 310(3) Course ID:011488 05-FEB-2010

This course will prepare the student for the application of entrepreneurial innovation and problem solving skills in a corporate or new venture setting. Students will apply the process of innovation through primary and secondary research, and apply a problem solving process to various business issues. Students will learn to research exiting business models and economic and market trends for indicators of pending change. Course knowledge and skills will be presented through lecture, research, exercise and real world business issue applications. A combination of individual competencies and team competencies will prepare the student to move to the next level of entrepreneurial studies.

Learning Outcomes:

Innovation and Entrepreneurship

-Demonstrate an understanding of the meaning of modern day entrepreneurship. Components: Lecture(In person) Course Equivalents: MGMT 381 Requirement Group: Prerequisites: Junior Standing, minimum grade of "C-" in MGMT 201, ACCT 201/201H, MARK 201, and ECON 2

Room Requirements: Electronic Classroom(1)

ENTR 311(3) Course ID:011736 15-JUN-2013 Social Entrepreneurship (Not for Profit ventures) Prerequisite: Junior Standing, ENTR 310

This course introduces the student to the financial similarities of the traditional, not-for-profit organization; however, it also provides students with new insights and tools to effectively measure the social benefit and return on capital spent by applying entrepreneurial business principles.

.Learning Outcomes

¿Demonstrate an understanding of the term ¿social entrepreneurship,¿ what it includes and what makes it different.

¿Demonstrate the use of analytical tools to quantify social issues with potential for a sustainable positive Components: Lecture(In person) Attributes: Engaged Learning Requirement Group: Prerequisites: Junior standing; minimum grade of "C-" in ENTR 310. Req. Designation: Service Learning Room Requirements: Electronic Classroom(1)

ENTR 312(3) Course ID:011737 02-AUG-2010 Intellectual Property & Commercialization Prerequisite: Junior Standing, ENTR 310.

This course will not attempt to teach the legal details of patent law and international intellectual property regulation, but it will provide the process for contractual approval to search, test and ultimately negotiate the rights to IP commercialization. Students will execute an opportunity analysis using the entrepreneurial five-step Pro-Forma process to determine the probability of commercial success Learning Outcomes geneous an understanding of the role Intellectual Property (IP) plays in the creation of new markets. geneonstrate an understanding of the legal definition of IP and differentiate between open source technology and true IP.

Components:Lecture(In person)Requirement Group:Prerequisites: Junior standing; minimum grade of "C-" in ENTR 310.Room Requirements:Electronic Classroom(1)

ENTR 313(3) Course ID:011738 15-JUN-2015 Entrepreneurship - Global Opportunity Scan

Enrollment Requirements: Pre- or Co-requisite ENTR 310 and Junior standing.

Entrepreneurial Marketing Pre-requisites: Junior standing; minimum grade of C- in MGMT 381.

The course ¿entrepreneurial marketing; is aimed at students who plan to start a new venture or take a job as a marketing professional in an established firm which pursues an innovative marketing approach. Students will study a full spectrum of marketing instruments that are especially suitable for entrepreneurial firms aiming for high growth and innovation yet faced by limited resources and industry dynamism. Students will work in teams on marketing plans for their own venture or for other high profile entrepreneurs or executives. The focus of this course is on hands-on experiences and practical relevance of innovative marketing concepts.

Strategy and Leadership

The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders.

This course is restricted to students in the MBA program and should be taken during the student's final quarter.

Outcomes: Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity. Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into

MGMT 435(3)Course ID:00521315-MAR-2006Department Consent RequiredMicroenterprise Consulting

In the Jesuit tradition of using knowledge to serve humanity, students utilize and improve their business knowledge and skills by meeting the real-life business consulting needs of individual entrepreneurial and not-for-profit clients starting up or operating businesses in economically distressed communities.

Outcomes: Students improve skills in service-oriented communication, project management, teamwork, and cross-functional business analysis; and learn how locally-owned business can foster community economic development. Consulting clients receive a feasibility analysis or business plan to help guide business operations and obtain financing for a new or struggling business.

27-SEP-2010 MGMT 483(3) Course ID:010488 Strategic Entrepreneurship and Innovation Management This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project. Lecture(In person) Components: Requirement Group: Pre-requisite: Graduate School of Business student. **Room Requirements:** Electronic Classroom(1) Course ID:012083 12-NOV-2013 MGMT 484(3) Recognizing Entrepreneurial Opportunities This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science. Outcomes: Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities. Components: Lecture(In person) Room Requirements: Electronic Classroom(1) MGMT 485(3) Course ID:013276 15-MAR-2016 Social Enterprise Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact. Components: Lecture(In person) Requirement Group: Pre-requisite: Graduate School of Business student. **Room Requirements:** Electronic Classroom(1) MGMT 570(3) Course ID:009651 06-APR-2005 Negotiations and Mediations Lecture(In person) Components: Requirement Group: Pre-requisite: Graduate School of Business student. MGMT 570M(3) Course ID:012659 31-OCT-2013 Negotiations and Mediations Prerequisites: Must be part of the Cohort of Intercontinental MBA students This course is designed to improve the understanding of and skills in negotiations and mediation. After an introduction to the fundamental principles of bargaining and negotiation, the first module will address the essential elements of international negotiations. The second module will continue the focus on personal competencies and the development of negotiation skills, including how to develop integrative (win-win) outcomes. Topics progress to more complex negotiations, as well as managing conflicts thorough mediation. Throughout the course, in-class simulations and out-of-class assignments are employed to introduce negotiation concepts and to develop new skills. Components: Lecture(Hybrid) Requirement Group: Restricted to students in the Intercontinental MBA program **Room Requirements:** Electronic Classroom(1) Course ID:010486 09-JAN-2013 MGMT 571(3) Enterprise Risk Management Prerequisite: FINC 450 This course explores the emerging practice of ""enterprise risk management"" (ERM) or ""integrated risk management""-a new managerial outlook on managing risk. Enterprise risk management considers all the risks faced by the firm and attempts to integrate these. Lecture(In person) Components: Course Equivalents: FINC 557 Requirement Group: Prerequisite: FINC 450. Room Requirements: Electronic Classroom(1)

ANTH 314(3) Course ID:001128 15-JUN-2013

Applied Anthropology

Prerequisite: ANTH 304 or Instructor approval

This course offers a hands-on introduction to the application of anthropological principles and methods to non-academic, ¿real world¿ problems. Course sessions will be dedicated to situating applied anthropology within the broader discipline, learning methods, and practicing applied cultural techniques. Students will also develop and carry out an applied cultural anthropology project.

Outcomes: Students will: situate applied anthropology in the broader discipline; practice a variety of applied methodological techniques; work with a community partner to design a project; prepare a comprehensive and clearly written report.

Components:Field Studies(In person)Attributes:Engaged LearningRequirement Group:Prerequisite: ANTH 304 or Instructor's PermissionReq. Designation:Undergraduate ResearchRoom Requirements:Electronic Classroom(1)

ANTH 315(3) Course ID:001129 29-JUN-2012 Identities: Race, Ethnicity, and Nationalism Prerequisites: ANTH 100 or ANTH 102.

Drawing on case studies, this course examines anthropological understandings of ""race,"" ethnicity, and nationalism.

Outcome: Students will emerge able to understand historical anthropological theories concerning group identities (tribes, race, ethnic groups); the symbolic construction of group identities; the political dimensions of collective identities; dynamics between religion and ethnicity; and the role of colonialism & the state in shaping ethnic relations.

Prerequisite: ANTH 304 or Instructor approval

Ethnographic Methods

This course is designed to offer an introduction to qualitative methods in anthropology. Students will learn methodologies such as participant observation, interviewing, and document analysis, and we will also address ethical issues in field research. Students will design and carry out an ethnographic research project.

Outcomes: Students will: demonstrate in-depth knowledge of qualitative research techniques; critically discuss ethical implications of ethnographic research; undertake original ethnographic fieldwork; prepare a comprehensive, theoretically informed, and clearly written report based on original ethnographic data.

Components:Field Studies(In person)Attributes:Engaged Learning, Urban StudiesRequirement Group:Prerequisite: ANTH 304 or Instructor's PermissionReq. Designation:Undergraduate Research and Writing IntensiveRoom Requirements:General Classroom(1)

ANTH 318(3) Course ID:001132 29-JUN-2012 Material Worlds: Art and Expressive Culture Prerequisite: ANTH 100 or ANTH 102.

This course examines anthropological approaches to art and expressive culture, drawing on case studies from around the world.

Outcome: Students will be able to demonstrate an understanding of different theoretical models for analyzing expressive culture; the social organization of art; symbolic dimensions; psychological approaches; gender/identity issues; political aspects of art; and dynamics of change in culture and art (evolution of new meanings, tourist art).

Components:LectureRequirement Group:Prerequisite: ANTH 100 or ANTH 102Room Requirements:General Classroom(1)

29-JUN-2012 ANTH 324(3) Course ID:001135 Human Evolution

Prerequisite: ANTH 101 or ANTH 103.

This course provides a detailed assessment of the fossil record pertinent to the emergence and evolution of humans up through the origin of modern people. The interpretation of this record within the context of important biological principles is emphasized, as is the methodology of doing historical science with paleontological data.

Outcome: Students will develop an understanding of the course of human biological history from the perspective of the pertinent fossils record as well as a mastery of the biological principles and scientific methodology that apply to assessing that history.

Components: Lecture Attributes: Forensic Science, Neuroscience Requirement Group: Prerequisite: ANTH 101 or ANTH 103 **Room Requirements:** General Classroom(1)

ANTH 325(3)

Course TD:001136 01-APR-2011 Department Consent Required Primatology-Behavior & Ecology

This course focuses on the interrelationship of the behavior and ecology of our closest living relatives, the primates (apes, monkeys, and prosimians).

Outcome: Students will be able to demonstrate an understanding of how ecological and reproductive factors influence primate behavior, and how this information relates to primate conservation strategies and to an increased understanding of human behavior and evolution.

Components: Lecture Course Equivalents: BIOL 325 Environmental Studies, Neuroscience Attributes: Room Requirements: General Classroom(1)

ANTH 326(4) Human Osteology 01-APR-2011

01-JAN-2016

Department Consent Required

Prerequisite: ANTH 101, or ANTH 103, or background in biology.

This course (and lab) focuses on the human skeletal system, providing a hands-on opportunity to explore anatomy and physiology, growth and development, and techniques used by biological and forensic anthropologists to evaluate individuals and populations.

Course ID:001137

Course ID:010938

Outcome: Students will be able to demonstrate superior knowledge of skeletal anatomy, analyses of skeletal remains from archaeological contexts, and apply current techniques designed to determine human variation, stature, ancestry, age-at-death, sex, and pathological conditions.

Components: Laboratory, Lecture Course Equivalents: BIOL 326 Forensic Science Attributes: Room Requirements: Lab - Archeology(1)

ANTH 328(3)

Pompeii and Herculaneum

The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.

Outcome: Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to ""read"" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life. 29-JUN-2012 ANTH 360(3) Course ID:001146

Issues in Archaeology Prerequisite: ANTH 101 or ANTH 104.

Specific theoretical, methodological, and research problems in archaeology with focus on current research in the discipline. Topics include but are not restricted to: environmental archaeology; ethnoarchaeology and experimental archaeology; the study of prehistoric craft specialization, trade, demography, and urbanism.

Outcome: Students will be able to draw connections between contemporary archaeological method and theory and current research issues in anthropology. Components: Lecture

Requirement Group: Prerequisite: ANTH 101 or ANTH 104 Room Requirements: General Classroom(1)

ANTH 361(3) Course ID:001148 15-JUN-2013

Issues Cultural Anthropology Prerequisite: ANTH 100 or ANTH 102.

The course is a vehicle for topics of particular interest to the instructor or an issue of contemporary relevance. It may be a trial run for a course later added to the official list.

Outcome: Students will be able to demonstrate how cultural anthropology is relevant to contemporary issues or how a problem can be structured around a cultural anthropological viewpoint. Components: Lecture Requirement Group: Prerequisite: ANTH 100 or ANTH 102 Room Requirements: Electronic Classroom(1)

ANTH 362(3) Course ID:001149 15-JUN-2013 Issues in Biological Anthropology Prerequisite: ANTH 101 or BIO 101.

This course considers specific topics pertinent to the discipline of physical or biological anthropology.

Outcome: Students will master theoretical perspectives and current information pertinent to the specific issues covered in each specific course. Components: Lecture Requirement Group: Prerequisite: ANTH 101 or BIOL 101

Room Requirements: General Classroom(1)

ASIA 160(3) Course ID:010773 01-MAY-2008

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historicakl trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.

Outcome: Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

Components: Lecture Course Equivalents: FNAR 160 Requirement Group: Restricted to Beijing Students

ASIA 167(3) Course ID:010330 03-MAY-2007

Religions in China

This course is a survey of various religions in China that may include, not only Confucianism and Taoism, but also Buddhism, Christianity, Islam, Judaism, Zoroastrianism, Manicheism and popular or ""folk"" religion. The course will consider the function of these various religions in the development of Chinese society and their significance in Chinese civilization from ancient mythology to contemporary practices and developments.

Outcome: Studenets will be able to demonstrate knowledge of the beliefs, practices, and institutions in varied contexts and historical periods in China, of various religions, both indigenous and ""foreign.""

Components: Lecture Course Equivalents: INTS 167, THEO 167

Requirement Group: Restricted to Beijing Students

ASIA 168(3) Course ID:010333 03-MAY-2007

Sacred Texts of China

Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.

Outcomes: Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically.

Components: Lecture Course Equivalents: INTS 168, THEO 168 Requirement Group: Restricted to Beijing Students

ASIA 169(3) Course ID:010359 07-MAY-2007

Taoism

Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.

Outcomes: Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods.

Components: Lecture Course Equivalents: INTS 169, THEO 169 Requirement Group: Restricted to Beijing Students

ASIA 191(3) Course ID:010355 01-AUG-2006

Traditional Chinese Philosophy Students will investigate Chinese ancies

Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.

ASIA 346B(3) Course ID:010497 06-NOV-2007

The Geat Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle ""bourgeoisie"" of the state by attacking various parts of the social, cultural and political structure.

Outcome: Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens.

After a brief introduction to the study of mysticism and the basics of the Islamic religion, students will consider topics including mystical understandings of the Islamic scripture (Qur'an) and the figure of the Prophet Muhammad as well as the ""inner dimensions"" of Islamic ritual practices. In addition, the course will survey the entire tradition of Islamic mysticism (tasawwuf) historically, anthropologically, and through study of the writings (in translation) of prominent Muslim mystics such as al-Ghazzali, Ibn Arabi, and Rumi. Components: Lecture Course Equivalents: INTS 364A, IWS 364, THEO 364 ASIA 365(3) Course ID:010316 15-MAR-2011 Women, Gender and Embodiment in Islam This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies. Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations. Components: Lecture Course Equivalents: WOST 365, INTS 304, WSGS 365, IWS 365, THEO 365 ASIA 366(3) Course ID:010345 15-MAR-2011 Department Consent Required Contemporary Islamic Thought and Movements This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism. College of Arts and Sciences - Biology - Subject: Biology

| BIOL 152(4) Course ID:001288 15-JUN-2016 Human Anatomy & Physiology I Lec/Lab |
|--|
| Lecture, laboratory and demonstrations. Organization of the human body from the cellular to the system level. Anatomy of specific body systems and their related physiology. Dissection of representative organs required in some laboratory exercises. (Biology 152 is for non - majors. Designed for Allied Health Students only. Does not count toward Biology Major nor Minor credit.) |
| Outcome: Students will be able to demonstrate understanding of the workings of the human body from an anatomical and physiological viewpoint. Components: Discussion(In person), Laboratory, Lecture Course Equivalents: ACBIO 152 Recempendirements: Electropic (laggroom(1)) Conceral (laggroom(1)) |
| Room Requirements: Electronic Classroom(1), General Classroom(1) |
| BIOL 153(4) Course ID:001290 15-JUN-2016 Human Anatomy & Physiology II Lec/Lab Prerequisite: BIOL 152. |
| A continuation of 152. Lecture, laboratory and demonstrations. Anatomy of specific organismal systems and their related physiology. Dissection of representative organs required in some laboratory exercises. (Biology 153 is for non - majors. Designed for Allied Health Students only. Does not count toward Biology Major nor Minor credit.) |
| Outcome: Students will be able to demonstrate understanding of the workings of the human body from an anatomical and physiological viewpoint. Components: Discussion(In person), Laboratory, Lecture Course Equivalents: ACBIO 153 |
| Requirement Group: Pre-requisite: BIOL 152. Room Requirements: Electronic Classroom(1), General Classroom(1) |
| BIOL 195(1 - 4) Course ID:009921 23-MAY-2006 Special Topics in Biology Special Topics - Specific areas of study in the biological sciences. Components: Lecture(In person) Room Requirements: Electronic Classroom(1) |
| BIOL 202(3) Course ID:013229 15-JUN-2016 |
| Introduction to Neuroscience This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in |
| neuroscience. Prerequisities: Psychology Majors and Neuroscience Majors or Minors: PSYC 101 or BIOL 101; Biology Majors: BIOL 102 & 112. |
| Outcomes: Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field. Components: Lecture(In person) Course Equivalents: PSYC 202 |
| Attributes: Neuroscience Requirement Group: Prerequisities: Psychology Majors and Neuroscience Majors or Minors: PSYC 101 or BIOL 101; Biology |
| Room Requirements: Electronic Classroom(1) |

|---|--|--|--|--|--|--|
| Human Structure and Function II | | | | | | |
| Pre-requisite: BIOL 242. Lecture, labratory and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to 1) regulation and maintenance (cardiovascular, lymphatic respiratory, digestive and | | | | | | |
| urinary systems) and reproduction and development (male and female reporductive systems.) Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111, 112, BIOL 242 and CHEM 101, 102, 111, 112. | | | | | | |
| Outcomes: Students will be able to demonstrate a comprehansive integrated knowledge and understanding of human anatomy and physiology at all levels. Components: Laboratory(In person), Lecture(In person) Requirement Group: Pre-requisite: BIOL 242. Room Requirements: Electronic Classroom(1) | | | | | | |
| BIOL 251(3) Course ID:001307 15-MAR-2006 Cell Biology | | | | | | |
| Prerequisites: BIOL 102, 112 and CHEM 102 or 106. | | | | | | |
| This course covers basic molecular and cellular studies of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells. | | | | | | |
| Outcome: Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research. | | | | | | |
| Components: Discussion(In person), Lecture Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106. | | | | | | |
| Room Requirements: Electronic Classroom(1), General Classroom(1) | | | | | | |
| BIOL 252(1) Course ID:001308 06-AUG-2012 Cell Biology Laboratory | | | | | | |
| Prerequisite or corequisite: BIOL 251. | | | | | | |
| Laboratory experiences designed to explore relationships between structure and function of subcellular components. | | | | | | |
| Outcome: Working knowledge of a variety of techniques utilized in the cell biology laboratory. Components: Laboratory Requirement Group: Pre-requisite or Co-requisite: BIOL 251. | | | | | | |
| Room Requirements: Lab - Biology(1) | | | | | | |
| BIOL 265(3) Course ID:001309 29-JUN-2012 Ecology | | | | | | |
| Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Restricted to Biology and Environmental Science/Studies students. | | | | | | |
| Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels. | | | | | | |
| Outcome: Students will understand the fundamental principles governing the interactions of organisms and their environment at the population, community, and ecosystem levels. | | | | | | |
| Components:Discussion(In person), Lecture(In person)Attributes:Environmental Studies | | | | | | |
| Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Room Requirements: Electronic Classroom(1), Electronic Classroom(1) | | | | | | |
| BIOL 266(1) Course ID:001310 06-AUG-2012 | | | | | | |
| Ecology Laboratory Prerequisite or corequisite: BIOL 265. | | | | | | |
| Laboratory and field experience designed to illustrate the principles of ecology and to give students experience in collecting, processing, and analyzing data. Field trips required. | | | | | | |
| Outcome: Students will understand the methodology and use techniques in studying interactions of organisms to the environment and to each other at the organism, population, community, and ecosystem levels. Components: Discussion, Laboratory | | | | | | |
| Components: Discussion, habitatory Attributes: Environmental Studies Requirement Group: Pre-requisite or Co-requisite is BIOL 265. Room Requirements: Lab - Biology(1) | | | | | | |
| | | | | | | |

College of Arts and Sciences - Biology - Subject: Biology

29-JUN-2012 BIOL 280(3) Course ID:001311 Evolution of Human Disease Prerequisites: BIOL 102. Introduces students to the complex interaction between human hosts and pathogens. Begins with an introduction to immunology and discussion and analysis of particular paradigms that strive to model host/pathogen interaction. Using the paradigms, paleopathological and paleodemographic information, students explore the patterns of human diseases throughout prehistory and history. Addresses the role of human biology, human culture, and changing environments. Components: Lecture Course Equivalents: BIET 280, ANTH 280 Requirement Group: Prerequisite: Biology 102 Room Requirements: General Classroom(1) BIOL 282(3) Course ID:001312 15-JUN-2014 Genetics Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Pre-requisites For Bioinformatics majors ONLY: BIOL 101; CHEM 102 or 106. This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics. Outcome: Students will develop knowledge and awareness of the genetic bases of modern biology. They will understand Mendelian principles of inheritance, chromosome and DNA structure and replication, gene expression, molecular biology, genetic bases of development and other biological processes, and quantitative, population and evolutionary genetics. Discussion(In person), Lecture Components: Attributes: Bioinformatics, Forensic Science Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Pre-requisites For Bioinformatics majors ONLY: BIOL 10 Room Requirements: Electronic Classroom(1), General Classroom(1) BIOL 283(1) Course ID:001313 29-JUL-2012 Genetics Laboratory Prerequisite or corequisite: BIOL 282. Experiments and demonstrations to illustrate chromosomal structures and transmission, molecular biology, gene linkage, gene frequencies and variation. Outcome: Students will develop technical skills and ability to interpret data from a variety of types of genetics experiments. Components: Laboratory Attributes: Bioinformatics, Forensic Science Requirement Group: Pre-requisite or Co-requisite: Biology 282. Room Requirements: Lab - Biology(1) BIOL 284(3) Course ID:012835 15-JUN-2016 Behavioral and Cognitive Neuroscience Prerequisites: For Psychology Majors & Neoroscience Majors/Minors: PSYC 202; For Biology Majors: BIOL 102 & 112 Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness. Outcome: Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms. Components: Lecture(In person) Course Equivalents: PSYC 382 Attributes: Neuroscience Requirement Group: Prerequisites: For Psychology Majors & Neoroscience Majors/Minors: PSYC 202 or BIOL 202; For Biology Room Requirements: Electronic Classroom(1)

College of Arts and Sciences - Biology - Subject: Biology

07-JUN-2010 BIOL 296(1) Course ID:011190 Instructor Consent Required Introduction to Research Prerequisites: BIOL 102, 112; Permission of the instructor; Biology Core highly recommended. Students will begin reading the literature in the field of their mentor, conduct experiments designed by the mentor, and give a presentation on their work or studies, in preparation for upper level undergraduate research. Learning Outcome: Students will develop critical reading skills and become familiar with basic lab techniques in the area of their mentor. Components: Lecture(Directed Research) Requirement Group: Pre-requisite: BIOL 102 and 112. BIOL 302(4) Course ID:001319 15-MAR-2006 General Microbiology Lec/Lab Prerequisites: BIOL 251 and 282 Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism. Outcome: Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes. Laboratory, Lecture Components: Requirement Group: Pre-requisites: BIOL 251 and BIOL 282. Room Requirements: Electronic Classroom(1) BIOL 303(1) Course ID:007304 15-JUN-2016 Seminar in Neuroscience The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses. Components: Seminar(In person) Course Equivalents: NEUR 300 Requirement Group: PSYC 101, BIOL 102 and BIOL/PSYC 202 Enrollment restricted to Neuroscience majors and minors. Room Requirements: Lab - Neuroscience(1) BIOL 304(3) Course ID:001321 25-APR-2014 Intro to Developmental Biology Prerequisite: BIOL 251. The analysis of developmental processes such as; fertilization, embryonic cleavage, cell determination and cell differentiation in selected species. Emphasis will be on experiments that reveal how these processes are controlled at the molecular and cellular levels. Outcome: Students will become familiar with a wide range of developmental biology principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern developmental biology research. Components: Lecture Requirement Group: Pre-requisite: BIOL 251. Room Requirements: Electronic Classroom(1) BIOL 310(3) Course ID:010571 15-JUN-2013 Categorical Data Analysis Prerequisite: STAT 203 or 335 An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models. Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages. Lecture(In person) Components: Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1)

Run Date: 04/01/2016 Run Time: 11:35:41

College of Arts and Sciences - Biology - Subject: Biology

19-SEP-2013 BIOL 313(3) Course ID:001326 Lab in Psychobiology Prerequisites: BIOL 102, 112, PSYC 306, and PSYC 240 or 305. A 'hands on' experience with the instrumentation, measurement techniques and experimental designs used in electrophysiological studies of nervous system function. Components: Laboratory Course Equivalents: PSYC 311 Attributes: Neuroscience Requirement Group: Prerequisite: BIOL 102, 112; PSYC 306 and PSYC 240 or 305 Room Requirements: Lab - Biology(1) Course ID:001328 BIOL 315(4) 15-MAR-2006 Introductory Immunology Lec/Lab Prerequisites: BIOL 251, 282 The study of the nature and molecular basis of immune responses. History and vocabulary of immunology; experiments involving immune recognition and destruction; theories regarding self-tolerance and immunological diseases. Outcome: Students will learn the morphology and histology of the cells involved in an immune response, as well as how the cells develop and the molecular mechanisms used to recognize and eliminate non-self material. The students will become familiar with the evasion strategies of pathogens and the consequences associated with either hyper or hypo-responsiveness. Laboratory, Lecture Components: Requirement Group: Pre-requisites: BIOL 251 and BIOL 282. Room Requirements: Electronic Classroom(1) Course ID:001330 15-MAR-2006 BIOL 316(4) Limnology Lec/Lab Prerequisites: BIOL 265 and CHEM 102 or 106. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Outcome: Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions. Students will learn to evaluate the trophic status and health of a lake by the end of the course. Components: Laboratory, Lecture Requirement Group: Pre-requisite: BIOL 265 and CHEM 102 or 106. Room Requirements: Electronic Classroom(1) BIOL 318(3) Course ID:001333 15-JUN-2015 Instructor Consent Required General Virology This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance. Prerequisites: BIOL 251 & BIOL 282 Outcomes: Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies. Components: Lecture(In person) Requirement Group: Pre-requisites: BIOL 251 and BIOL 282. Room Requirements: Electronic Classroom(1) Course ID:001334 BIOL 319(3) 15-MAR-2006 Evolution Prerequisite: BIOL 282; BIOL 265 recommended This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species,

experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships.

Outcome: Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally. They will develop an appreciation of the primary literature through reading and discussing research articles.

BIOL 342(4) Course ID:001346 01-APR-2011 Human Anatomy Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224. A mixed lecture and laboratory course providing an in-depth look at the human body at the level of gross anatomy. Outcome: Students will acquire an advanced understanding of the structure and relationships of major organ systems in the human body. Components: Laboratory(In person), Lecture(In person) Attributes: Forensic Science Requirement Group: Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224. Room Requirements: Lab - Biology(1) BIOL 346(3) Course ID:009821 15-AUG-2011 Department Consent Required Biology of Women This course focuses on the anatomy and physiology of women at different and critical times in their life span. This course also addresses social issues that effect women at different points in their life. Topics include the evolution of sex, gender differentiation, and reproduction. Outcome: Students will learn about the biology of the female system, and how it changes with age. Students will also learn through discussions and guest lectures the interplay between society, medicine and gender. Lecture(In person) Components: Course Equivalents: WOST 346, WSGS 346, ANTH 346 Women & Gender Studies Attributes: Room Requirements: Electronic Classroom(1) BIOL 350(4) Course ID:001348 17-NOV-2009 Vertebrate Physiology Lec/Lab Prerequisites: BIOL 242, 243, 251, BIOL 282, and CHEM 222 or 224. Lecture and laboratory. Animal function and structure; emphasis on organ physiology. Feeding, digestion, water relations, respiration, hormone systems, receptor and effector mechanisms, central nervous coordination, regulation of homeostasis, dynamics of the circulatory system and the physiology of bone and musculature. Outcome: Students will demonstrate detailed understanding of how organ function is regulated at cellular and systems level. Components: Laboratory, Lecture Requirement Group: Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224. **Room Requirements:** General Classroom(1) BIOL 351(3) Course ID:013221 15-JUN-2016 Sleep/Circadian Rhythms We will cover circadian rhythms one very prominent circadian-regulated behavior: sleep. We will investigate these topics at several different levels, spanning from cellular and molecular mechanisms to systems and behavioral approaches, and finally will look at pathologies of these systems that lead to human disorders. Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Introduction to Neuroscience, formerly Brain and Behavior) Outcomes: Students will become familiar with a variety of model systems used to study circadian rhythms, and learn how to critically read primary literature and lead discussions of this reading. Components: Lecture(In person) Attributes: Neuroscience Requirement Group: Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior). Room Requirements: Electronic Classroom(1) Course ID:001350 BIOL 352(3) 05-JAN-2009 Mammalian Endocrinology Prerequisite: BIOL 242 and BIOL 243. Survey of hormones that regulate metabolism, salt and water balance, calcium and phosphorus metabolism, and reproduction; special emphasis on hormonal transduction signals and integration of endocrine systems.

Outcome: Students will develop detailed understanding of how numerous aspects of metabolism are controlled at cellular and systems levels by hormone action. Components: Lecture(In person) Requirement Group: Pre-requisite: BIOL 242 & 243

Requirement Group: Pre-requisite: BIOL 242 & 243. Room Requirements: Electronic Classroom(1)

| <u>Correge of Arts and Scrences - Brology - Subject: Brology</u> | |
|--|----------------|
| BIOL 354(3) Course ID:001351 15-MAR-2006 Mammalian Reproduction Prerequisite: BIOL 251. | |
| Anatomy and physiology of male and female reproductive systems, fertilization, implantation, pregnancy, and birth; immunological aspects of reproduction. | |
| Outcome: Students will understand structure/function relationships in reproductive biology and how reproductive systems are regulated at cellular levels. Components: Laboratory, Lecture Requirement Group: Pre-requisite: BIOL 251. Room Requirements: General Classroom(1) | |
| BIOL 355(4) Course ID:001352 16-AUG-2006 Parasitology Lec/Lab A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships. | |
| Outcome: Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation. Components: Laboratory(In person), Lecture Requirement Group: Pre-requisite: BIOL 251. Room Requirements: Electronic Classroom(1), General Classroom(1) | |
| BIOL 357(3) Course ID:013219 15-JUN-2016 Neural Disease, Degeneration, and Regeneration This course offers an overview of cellular and molecular mechanisms underlying common neurodegenerative disorders. Mechanisms of neuronal cell death and application of stem cells in CNS regeneration will also be covered. Students will learn by reading assigned background materials and research articles, and participating in class discussions. Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior) | |
| Outcomes: Students will understand current advances of genetic, developmental, molecular, and cellular mechanisms underlying the neurodegenerative diseases. Students will also learn how disease mechanisms affect neural function, cognition, and behavior. Components: Lecture(In person) Attributes: Neuroscience Requirement Group: Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain as | und Behavior). |
| Room Requirements: Electronic Classroom(1) | |
| BIOL 358(3) Course ID:001355 15-JUN-2013 Developmental Neurobiology Prerequisites: BIOL 251, 282. | |
| This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. | |
| Outcome: Students will become familiar with principles of neural development and the studies that led to those principles. Students will also learn how to critically read primary research papers and present these papers to the class. Components: Discussion, Lecture Attributes: Neuroscience Requirement Group: Pre-requisites: BIOL 251 and BIOL 282. Room Requirements: General Classroom(1) | |
| BIOL 359(3) Course ID:001356 29-JUN-2012 Paleopathology Prerequisites: BIOL 251 and ANTH 326 or BIOL 326. | |
| Normal bone tissue and normal bone alterations and the impact of various disease processes on skeletal tissue. Students will be taught to assess and interpret patterns of human disease in processual rather than typological terms. Components: Lecture Course Equivalents: ANTH 359 Requirement Group: Prerequisite: BIOL 251 and ANTH or BIOL 326 Room Requirements: General Classroom(1) | |

College of Arts and Sciences - Biology - Subject: Biology

29-JUN-2012 BIOL 360(3) Course ID:001357 Department Consent Required Field Biology Prerequisites: BIOL 265 and permission of chair. Ecological study of an area in North America outside Midwest. Includes a field trip to a specific region. Trip is at student expense. Outcome: Students will become familiar with an ecosystem outside the Chicago Region; gain a first-hand understanding of the interrelationships of living things and their environment; develop a loving appreciation of ¿wilderness.¿ Components: Lecture Requirement Group: Pre-requisite: BIOL 265 Room Requirements: General Classroom(1) BIOL 362(3) Course ID:001358 15-JUN-2016 Neurobiology Prerequisite: PSYC/BIOL 202; BIOL 251, PHYS 111, PHYS 111K, or PHYS 125; PHYS 111L or 125L: PHYS 112, PHYS 112K, or PHYS 126; PHYS 112L or 126L. The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions. Outcome: Student will gain a sold foundation in nervous system structure and function. Discussion(In person), Lecture(In person) Components: Attributes: Neuroscience Requirement Group: Prerequisites: PSYC/BIOL 202; BIOL 251, PHYS 111, PHYS 111K, or PHYS 125; PHYS 111L or 125L: PHYS 112 Room Requirements: Electronic Classroom(1), Electronic Classroom(1) BIOL 363(4) Course ID:001360 15-MAR-2006 Entomology Lec/Lab Prerequisite: BIOL 265. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. Outcome: Students will learn to identify major insect groups in the field and in the laboratory. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental. Components: Laboratory, Lecture Requirement Group: Pre-requisite: BIOL 265 Room Requirements: General Classroom(1) BIOL 366(3) Course ID:001364 29-JUN-2012 Cell Physiol & Biochem Prerequisites: BIOL 251 and CHEM 224 An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. Outcome: Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned. Components: Discussion, Lecture Course Equivalents: BIOI 366, CHEM 361 Pre-requisites for Bioinformatics majors: CHEM 224 or 2 Requirement Group: Pre-requisites: BIOL 251 & CHEM 224 or 222.

Room Requirements: General Classroom(1)

BIOL 366L(2) Course ID:001365 01-APR-2011 Cell Physiology & Biochemistry Lab Introduction to modern techniques and instrumentation with an emphasis on cellular metabolism and protein biochemistry including purification and quantitation methods and enzyme kinetics. Outcome: Proficiency in performing a variety of biochemical assays and the ability to write up results as a formal lab report. Components: Laboratory Attributes: Forensic Science Requirement Group: Pre-Co-requisite with BIOL 366 or CHEM 361 Room Requirements: Lab - Biology(1) BIOL 367(4) Course ID:011440 29-JUN-2012 Instructor Consent Required Bioimaging Prerequisites: BIOL 251 and 282; PHYS 112 or 114; Instructor Permission. This course focuses on light microscopy but also includes a section on Electron Microscopy. Topics include basic optical theory, history, sample preparation, microscope operation, digital image acquisition and analysis. Outcome: Students will become adept at producing publication quality images using a variety of imaging techniques. Students will also learn how to correctly interpret results and properly present their data. Laboratory(In person), Lecture(In person) Components: Requirement Group: Prerequisite: BIOL 251 and 282; PHYS 112 or 114 Room Requirements: Lab - Biology(1), Lab - Biology(1) BIOL 368(4) Course ID:001366 13-SEP-2008 Plant Ecology Lec/Lab Prerequisite: BIOL 265. Focuses on plant population dynamics; plant-animal interactions, including herbivory, pollination, dispersal; plant community dynamics, such as the processes of succession; and the effect of global climate on the distribution of major vegetation types. The laboratory is divided between weekend field trips to local forests, prairies and bogs, and laboratory studies. Outcome: Students will achieve familiarity with major vegetation types and especially with local vegetation and natural areas; understand the dynamics of plant communities; understand the nature of research in plant ecology and gain familiarity with the primary literature; understand environmental issues as they relate to Laboratory, Lecture Components: Requirement Group: Pre-requisite: BIOL 265 Room Requirements: Lab - Biology(1), Electronic Classroom(1) BTOL 369(3) Course ID:009922 24-FEB-2010 Invertebrate Biology Broad survey of invertebrates including morphology, physiology, ecology, evolution, and systematics. Lecture(In person) Components: Requirement Group: Pre-requisite: BIOL 265 Room Requirements: Electronic Classroom(1) BIOL 370(4) Course ID:001368 15-MAR-2006 Ichthyology Lec/Lab Prerequisite: BIOL 265. Lecture and laboratory and/or field trips. Systematics, phylogeny, anatomy, physiology, behavior, functional morphology and ecology of fishes. Includes field collecting trips in Lake Michigan and local streams and lakes and individual projects/research papers. Outcome: Students will develop a detailed understanding of a range of topics in fish biology, with special emphasis on evolutionary relationships. Laboratory, Lecture Components: Requirement Group: Pre-requisite: BIOL 265 Room Requirements: Lab - Biology(1)

BIOL 373(3) Course ID:001373 15-JUN-2016 Laboratory in Neuroscience I Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. Outcome: Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques. Components: Laboratory Course Equivalents: NEUR 301, PSYC 388 Requirement Group: BIOL 362 and BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuro Room Requirements: Lab - Neuroscience(1) BIOL 375(4) Course ID:001375 15-MAR-2006 Aquatic Insects Lecture & Laboratory Prerequisite: BIOL 265. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats. Outcome: Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans. Components: Laboratory(In person), Lecture(In person) Requirement Group: Pre-requisite: BIOL 265 Room Requirements: Lab - Biology(1), Electronic Classroom(1) BIOL 376(3) Course ID:011439 29-JUN-2012 Seminar in Molecular/Cellular Neuroscience Prerequisites: BIOL 251, 282 and 362. Lecture/discussions will focus on issues central to molecular/cellular neuroscience, emphasizing mechanisms of development, maturation, synaptic plasticity, regeneration, hormonal regulation and molecular underpinnings of normal and disease-affected circuitry. Professors will first discuss a range of questions being pursued in their general area of study, then present primary research papers, illustrating analytical skills that students will then employ in their own presentations. Presentations and exams will test students' general understanding of the topics that are covered. Components: Lecture(In person) Requirement Group: Prerequisite: BIOL 251, 282, 362 Room Requirements: Electronic Classroom(1) BIOL 377(3) Course ID:009807 23-MAY-2006 Instructor Consent Required Molecular Pathogenesis Introduction to the molecular mechanisms of disease pathology and therapeutic and control strategies, using a particular disease as model. Outcome: Students will be able to explain the molecular basis for particular disease symptoms, understand therapeutic strategies, and use experimental results to form conclusions about disease molecular mechanisms. Components: Lecture(In person) Requirement Group: Pre-requisites: BIOL 251 and BIOL 282. Room Requirements: Electronic Classroom(1) BIOL 378B(3) Course ID:012923 15-JUN-2014 Department Consent Required Biological Topics for Bioethics Minor Capstone Prerequisites: Two prior science courses and two prior ethics courses required. The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological.

Outcomes: Students will understand the connection between ethical and biological issues with regard to the special topic in biology.

BIOL 379B(3) Course ID:012924 15-JUN-2014 Department Consent Required Biological Topics for Bioethics Minor Capstone Prerequisites: Two prior science courses and two prior ethics courses The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological. Outcomes: Students will understand the connection between ethical and biological issues with regard to the special topic in biology. Components: Seminar(In person) Bioethics Attributes: Room Requirements: Electronic Classroom(1) BIOL 380(3) Course ID:009679 15-MAR-2006 Instructor Consent Required Genetics and Evolution of Development This course explores the evolution of the embryo and the patterns of gene regulation and morphogenesis that drive early development. Topics include evolution of nervous system patterning, shared human, mouse and frog regulatory systems and evolution of human genetic syndromes. Outcome: Students will master the stages and regulation of development in a number of organisms through use of primary literature. Evidence of their mastery will be seen through grant writing exercises, in class presentations and conventional exams. Lecture(In person) Components: Requirement Group: Pre-requisite: Biol 282. Room Requirements: Electronic Classroom(1) 24-NOV-2008 BIOL 382(3) Course ID:001377 Molecular Genetics Prerequisites: BIOL 251, 282 and CHEM 222 or 224. This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization. Outcome: Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes. Components: Lecture Course Equivalents: BIOL 392, COMP 384 Requirement Group: Pre-requisite: BIOL 251, 282; CHEM 222 or 224. Room Requirements: Electronic Classroom(1) BIOL 383(3) Course ID:001378 29-JUN-2012 Population Genetics Prerequisites: BIOL 282 and MATH 132 or 162. BIOL 235 is recommended. Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. Outcome: Students develop knowledge and awareness of population genetic theory and information. They learn how to apply basic tools of population genetic analysis. Components: Lecture Requirement Group: Prerequisite: BIOL 282 and MATH 132 or 162. BIOL 265 recommended. Room Requirements: General Classroom(1) BIOL 385(4) Course ID:001380 01-AUG-2012 Instructor Consent Required Prin Electron Microscopy Lec/Lab Prerequisites: Permission of instructor, BIOL 341 recommended. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Outcome: Student will become adept with the various techniques needed to produce research quality electron micrographs. Students will also learn how to correctly interpret their results, and properly present their

College of Arts and Sciences - Catholic Studies - Subject: Catholic Studies

CATH 100(3 - 6)Course ID:010572 15-AUG-2011 Introductory Topics in Catholic Studies Introductory level course for topics cross-listed with other courses that focus on areas of Catholic studies but are not included among the courses listed in the Catholic Studies Program. Outcome: Students will master a topic in Catholic Studies not addressed in other courses. Components: Lecture(In person) Attributes: Catholic Studies Room Requirements: General Classroom(1) CATH 101(3) Course ID:011239 05-MAY-2009 Evol Wst Idea/Inst to 17C This course traces the early development of Western civilization from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation. Outcome: Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills. Lecture(In person) Components: Course Equivalents: HIST 101 Attributes: CORE PRE-2012 Historical Knowledge Room Requirements: Electronic Classroom(1) CATH 101D(3) Course ID:012182 21-OCT-2011 Department Consent Required Development of Western Thought Honors Discussion Prerequisite: Catholic Studies students must be enrolled in the Honors Program and must be completing the first section of the course HONR 101 (cross-listed with CATH 102). This course is the second half of the Freshmen Honors program protocol of Honors 101, where students receive 6 credit hours for intensive reading, lectures, and discussion groups with professors. Components: Lecture(In person) Course Equivalents: HONR D101 Attributes: CORE PRE-2012 Theological and Religious Studies Requirement Group: Restricted to students in the Honors Program. Req. Designation: Honors Room Requirements: General Classroom(1) Course TD:012183 21-OCT-2011 Department Consent Required CATH 102(3) Western Traditions Honors-Antiquity to Middle Ages This course is restricted to Catholic Studies Minors enrolled in the Honors Program. This foundational course in the history of Western culture from antiquity to the Middle Ages discusses such writers ranging from Homer all the way to Augustine. Students will pose questions and comments about some of the ideas and texts that helped shaped Western culture, including many that come out of the western Christian tradition. Components: Lecture(In person) Course Equivalents: HONR 101 CORE PRE-2012 Philosophical Knowledge Attributes: Requirement Group: Restricted to students in the Honors Program. Req. Designation: Honors Room Requirements: Auditorium(1) Course ID:011232 04-MAY-2009 CATH 104(3) Jesus Christ The study of the person of Jesus Christ. Outcome: Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship. Lecture(In person) Components: Course Equivalents: THEO 267 Attributes: CORE PRE-2012 Theological and Religious Studies Room Requirements: Electronic Classroom(1)

20-JUN-2012

29-JUN-2012

CHEM 100(3) Course ID:012301

College Chemistry for a Sustainable Future Retricted to the Pre-Collegiate Summer Scholar students.

Prerequisites: High school geometry and high school algebra.

Through a combination of lecture, discussion and group activities, students in this course will explore the role of chemistry in everyday life in our world. We will examine essential principles of matter, including atomic and molecular structure, patterns of chemical reactivity, energy transfer, and biomolecules. Chemical concepts in these areas will be applied to identifying problems and solutions to the related human and environmental issues of climate, water, energy, resources and health.

Components:Lecture(In person)Requirement Group:Class restricted to Pre-Collegiate Summer Scholars.Room Requirements:Electronic Classroom(1)

CHEM 101(3) Course ID:001578 20-JUN-2012 General Chemistry A Lecture/Discussion

Prerequisite: MATH 117 or equivalent. A year of high school chemistry is recommended.

Co-requisite: CHEM 111 and MATH 118.

A lecture and discussion course including topics on atomic and molecular structures, states of matter, energetics, and stoichiometry of reactions.

Outcome:Students will learn basic chemical principles in these areas.Components:Discussion, LectureAttributes:Bioinformatics, Forensic Science

CHEM 102(3) Course ID:001581 General Chemistry B

Prerequisites: CHEM 101 or CHEM105; MATH 118.

Room Requirements: General Classroom(1)

This lecture and discussion course is a continuation of 101 and includes topics on equilibrium systems, chemical thermodynamics, electrochemistry, and descriptive chemistry.

Outcome: Students will learn basic chemical principles in these areas. Components: Discussion, Lecture Attributes: Bioinformatics, Forensic Science Requirement Group: Prerequisite: Chem 101 or 105 and Math 118 or equivalent (ALEKS score 75-100)

CHEM 102D(0) Course ID:001582 20-JUN-2012 General Chemistry B Discussion Components: Discussion Room Requirements: General Classroom(1) Course ID:001583 15-JUN-2013 CHEM 105(4) Chemical Principles Prerequisites: MATH 117 or equivalent, and successful completion of a year of high school chemistry. Chemistry and Biochemistry Majors only. Lecture, discussion and laboratory course for majors covering stoichiometry, reactions in aqueous solution, states of matter, electronic structure, thermodynamics, chemical bonding, molecular geometry and intermolecular forces. Emphasis given to writing electron configurations and Lewis diagrams, predicting molecular geometry and properties, mass/mole conversions and solving thermodynamic and gas law problems.

Outcome: Students will learn basic chemical principles in these areas. Components: Discussion, Laboratory, Lecture Requirement Group: Prerequisite: MATH 117, MDT, or ALEKS score of 60-74 Room Requirements: General Classroom(1)

29-JUN-2012 CHEM 215(4) Course ID:001599

Elem Ouant Analysis Prerequisites: Chem 106 or Chem 102 and 112.

This course includes lecture and laboratory. This is a laboratory-intensive course for chemistry majors and recommended for chemistry minors. Topics covered include conventional wet chemical and modern instrumental methods associated with the practice of analytical chemistry. Lecture topics include chemical equilibrium and statistical analysis of data.

Outcome: Students will learn basic chemical principles in these areas. Components: Laboratory, Lecture Forensic Science Attributes: Requirement Group: Prerequisites: Chem 106 or Chem 102 & 112 Room Requirements: General Classroom(1)

CHEM 221(4) Course ID:001601 15-JUN-2014 Organic Chem I Lec/Disc Prerequisites: CHEM 102 & CHEM 112 OR CHEM 106. Prerequisites for Bioinformatics Majors ONLY: CHEM 102 or CHEM 106

A lecture, discussion and laboratory course for chemistry majors covering structure and bonding in organic molecules; nomenclature, chemical and physical properties and reactions of non-aromatic hydrocarbons, alkyl halides, alcohols, ethers; stereochemistry and conformational analysis; and spectroscopy.

Outcome: Students will understand the chemical behavior of organic molecules and the mechanisms of reactions.

| Components: | Discussion, Laboratory, Lecture |
|--------------------|--|
| Attributes: | Bioinformatics, Forensic Science |
| Requirement Group: | Prerequisites: CHEM 102 & CHEM 112 OR CHEM 106. Prerequisites for Bioinformatics Majors ONLY: CHEM 102 |

20-JUN-2012

Room Requirements: General Classroom(1)

CHEM 222(4) Course ID:001604 20-JUN-2012 Organic Chem II Lec/Disc Prerequisite: CHEM 221 or 223. Chemistry majors only.

A lecture, discussion and laboratory course for chemistry majors continuing from 221 covering nomenclature, properties, reactions, syntheses, and spectroscopy of further classes of aliphatic and aromatic compounds, carbohydrates and other polyfunctional compounds.

Outcome: Students will be able to assign IUPAC names, spectroscopically identify, prepare, and propose reactions for these groups. Components: Discussion, Laboratory, Lecture Attributes: Bioinformatics, Forensic Science Requirement Group: Prerequisite: CHEM 221 or 223. Chemistry majors only. Room Requirements: General Classroom(1)

Course ID:001607

CHEM 223(3) Organic Chemistry A Lect & Disc Prerequisites: CHEM 102 or 106.

Lecture and discussion course for non-chemistry majors surveying nomenclature, structures, properties, stereochemistry, reactions, mechanisms, and syntheses of aliphatic hydrocarbons, alkyl halides, alcohols, and ethers.

Outcome: Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data.

| components: | Discussion, Lecture | | |

CHEM 224(3) Course ID:001609 20-JUN-2012

Organic Chem B Lec/Disc Prerequisite: CHEM 223 or 221

The second semester lecture and discussion course of a two semester sequence, a continuation of 223 for non-chemistry majors emphasizing the organic chemistry of conjugated systems, aromatic compounds, carbonyl compounds, amines, carboxylic acids and their derivatives, carbohydrates, lipids, and proteins.

Outcome: Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data.

| Components: | Discussion, Lecture |

CHEM 225(1) Course ID:001611 Organic Chemistry Lab A Pre-requisites: CHEM 102 & 112; Or CHEM 106. Co-Requisite: CHEM 223

A laboratory course for non-chemistry majors designed to reinforce lecture topics from 223 and to expose students to the safe handling of organic chemicals.

Outcome: Students will acquire basic laboratory techniques and practices for working with organic chemicals.

Attributes: Forensic Science

Requirement Group: Pre-requisites: CHEM 102 AND 112; Or CHEM 106. Co-Requisite: CHEM 223 Room Requirements: Lab - Chemistry(1)

CHEM 226(1) Course ID:001612 Organic Chemistry Lab B

Co- or prerequisite: CHEM 224.

Prerequisite: CHEM 225.

CHEM 300(1 - 6)

A laboratory course for non-chemistry majors designed to reinforce lecture topics from 224 and to expose students to organic synthesis.

Outcome: Students will perform reactions to prepare known organic compounds and then isolate and characterize the reaction products.

Course ID:001613

Undergraduate Research Prerequisites: prior consultation with the instructor and a completed agreement form. Agreement forms for this directed study course are obtained from the department office, and the completed form (signed by the student, instructor, and chairperson) must be deposited in the chemistry office before the student can register for the course.

This course gives undergraduate students an opportunity to participate in research in a selected area.

Outcome: Students will accomplish the research task defined in the contractual arrangement between the student and the instructor.

Course ID:001623 29-JUN-2012 CHEM 313(1) Environmental Chem Lab Prerequisites: CHEM 106 or 102 and 112. Co-requisite: CHEM 312. This laboratory course will cover the most important environmental applications including water analysis, detection of persistent organic pollutants, and heavy metals. Outcome: The student will be able to prepare and quantify environmental samples with the appropriate analysis method. Components: Laboratory Requirement Group: Prerequisites: Chem 106 or Chem 102 & 112 Room Requirements: Lab - Chemistry(1) CHEM 314(4) Course ID:012792 15-JUN-2014 Instrumental Analysis Prerequisites: CHEM 212, 214, and 302 This course discusses and demonstrates how instrumental techniques such as atomic spectroscopy, molecular spectroscopy, mass spectrometry and chemical separations can be used to identify the chemical composition of a sample. Outcome: Students will be able to select the most suitable analytical method to identify a sample. The hands-on approach will enable students to perform instrumental analysis independently. Components: Laboratory(In person), Lecture(In person) Requirement Group: Prerequisites: CHEM 212,214, & 302 Req. Designation: Writing Intensive Room Requirements: Electronic Classroom(1), Electronic Classroom(1) CHEM 315(3) Course ID:012793 11-JAN-2016 Introduction to Forensic Toxicology Prerequisites: CHEM 222 or 224. This course stresses the practical and theoretical aspects to forensic toxicology, the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter. Outcome: Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic toxicology. Components: Lecture(In person) Attributes: Forensic Science Requirement Group: Prerequisite: CHEM 222 or 224 Room Requirements: Electronic Classroom(1) CHEM 316(3) Course ID:012754 11-JAN-2016 Introduction to Forensic Drug Chemistry Pre-requisites: (CHEM 222 or 224) and CHEM 212 & 214; Co-requisite CHEM 316L This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed. Outcomes: The techniques, skills, advances and limitations of the modern forensic laboratory discussed. The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting. Components: Lecture(In person) Attributes: Forensic Science

Requirement Group: Pre-requisites: (CHEM 222 or 224) and CHEM 212 & 214; Co-requisite CHEM 316L

Room Requirements: Electronic Classroom(1)

CHEM 316L(1) Course ID:012755 11-JAN-2016 Introduction to Forensic Drug Chemistry Laboratory Pre-requisites: (CHEM 222 or 224) and CHEM 212 & 214; Co-requisite CHEM 316 This course provides an introduction to the basic laboratory techniques used in the modern forensic drug analysis. The use of the microscope in the identification of plant materials, common chemical color and ion tests, and chromatographic separations techniques are used to collect data, interpret results and form accurate conclusions. Outcomes: The students will be able to perform the basic laboratory techniques used in a modern forensic drug laboratory to conduct an analysis, including analysis, interpretation of data, and issuing reports. Components: Laboratory(In person) Attributes: Forensic Science Requirement Group: Pre-requisites: (CHEM 222 or 224) and CHEM 212 & 214; Co-requisite CHEM 316 Room Requirements: Lab - Chemistry(1) Course ID:012591 21-MAR-2013 CHEM 323(3) Medicinal Chemistry Prerequisites: CHEM 222 or 224 This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME, patenting of IP, and the ethical aspects of pharmaceuticals. Outcomes: Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs. Components: Lecture(In person) Requirement Group: Prerequisite: CHEM 222 or 224 Room Requirements: Electronic Classroom(1) CHEM 329(4) Course ID:001624 20-JUN-2012 Qualitative Organic Analysis Components: Laboratory, Lecture Room Requirements: General Classroom(1) CHEM 330(3) Course TD:001626 20-JUN-2012 Intro to Physical Chemistry Lecture Components: Room Requirements: General Classroom(1) CHEM 339(3) Course ID:001628 20-JUN-2012 Microcomp Interfacing in Chem Components: Laboratory, Lecture **Room Requirements:** General Classroom(1) Course ID:001630 06-AUG-2012 CHEM 340(3) Advanced Inorganic Chemistry Prerequisite: CHEM 302. Lecture course covering modern theories of atomic and molecular structure as applied to inorganic chemistry with discussion of acid-base theories, the chemistry, spectra and reaction mechanisms of coordination and organometallic compounds. Symmetry is used to develop molecular orbital diagrams, predict geometry, hybridization schemes and interpret electronic spectra. Outcome: Students will learn chemical principles in these areas. Discussion(In person), Lecture(In person) Components: Requirement Group: Pre-requisite: CHEM 302. Room Requirements: General Classroom(1), General Classroom(1)

College of Arts and Sciences - Chemistry and Biochemistry - Subject: Chemistry

CHEM 341(1) Course ID:001631 29-JUN-2012

Advanced Inorganic Laboratory Prerequisite or Co-requisite: CHEM 340.

A laboratory course illustrating topics and techniques used in modern inorganic chemistry; coordination and organometallic compounds are prepared and characterized by IR, UV-Vis and NMR spectroscopy, and magnetic susceptibility measurements. All experimental work is recorded in a laboratory notebook and includes a formal written report.

Outcome: Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements.

Components:LaboratoryRequirement Group:Pre or Co-req Chem 340Room Requirements:Lab - Chemistry(1)

CHEM 361(3)Course ID:00163315-JUN-2015Principles of BiochemistryPrerequisites: CHEM 222 or 224 and 226.

Prerequisites for Bioinformatics majors: Chem 222 or 224.

This course examines the structural' functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways.

Outcome: Students will be able to demonstrate an understanding of biological molecules and how they are metabolized.

CHEM 370(3) Course ID:011973 06-AUG-2012

Biochemistry I Prerequisites: CHEM 222 or 224 and 226.

This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.

Outcome: Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized.

Components:Discussion(In person), Lecture(In person)Requirement Group:Prerequisite: CHEM 222 or 224/226. Restricted to Chemistry and Biochemistry Majors.Room Requirements:Auditorium(1), Auditorium(1)

| Prerequisite: CHEM 370 | | |
| This is the second part of a two-semester Bioghemistry] | | |

This is the second part of a two-semester Biochemistry lecture series that emphasizes important biochemical concepts on lipid, amino acid and nucleotide metabolic pathways as well as the structure and function of nucleic acids. Special topics on sensory systems, motility, immunology and drug development will also be discussed.

Outcome: Students will be able to demonstrate an understanding of metabolic pathways and of current research topics in biochemistry.

Components:Discussion(In person), Lecture(In person)Requirement Group:Prerequisite: CHEM 370. Restricted to Biochemistry MajorsRoom Requirements:Electronic Classroom(1), Electronic Classroom(1)

CHEM 372(2)Course ID:01197715-JUN-2015Biochemistry Laboratory IPrerequisite: CHEM 370

This laboratory is designed to simulate a research experience and to teach basic techniques utilized in a biochemistry laboratory. The course theme involves a comparative investigation of the enzyme glyceraidehyde-3-phosphate dehydrogenase (GAPDH) from various animal sources. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on GAPDH from either an aquatic or land animal source, e.g., trout, tuna, pork beef or chicken.

Outcome: Students will be able to purify and characterize an enzyme in a research context.Components:Discussion(In person), Laboratory(In person)Requirement Group:CHEM 370 & CHEM 226 or 222Room Requirements:Lab - Chemistry(1), Lab - Chemistry(1)

Course ID:011978

CHEM 373(2) Biochemistry Laboratory II Prerequisite: CHEM 371

This laboratory course is designed to simulate a research project in wich molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. he course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedure requied in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form.

College of Arts and Sciences - Chemistry and Biochemistry - Subject: Chemistry

25-JUL-2012 CHEM 479(1 - 9)Course ID:012428 Department Consent Required Research in Chemical Education Pre-/co-requisites: RMTD 400 and CIEP 229. This course is restricted to Chemistry Ph.D. students. This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills. Outcomes: Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field. *describe and apply methods for preparing research data collected for publication. *describe and apply methods for analyzing chemical education research projects & manuscripts. Components: Laboratory(In person) Requirement Group: Pre-/co-requisites: RMTD 400 and CIEP 229. This course is restricted to Chemistry Ph.D. students. Room Requirements: Lab - Chemistry(1) CHEM 480(3) Course ID:011390 20-JUN-2012 Department Consent Required Chemistry for Teachers I Lecture(In person) Components: Room Requirements: Electronic Classroom(1) CHEM 491(1) Course ID:012151 20-JUN-2012 Instructor Consent Required Laboratory Investigations in Chemistry C A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts. Outcomes: Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district. Components: Laboratory(In person) Room Requirements: Lab - Chemistry(1) CHEM 492(1) Course ID:011054 20-JUN-2012 Department Consent Required Special Topics in Chemistry Lecture(In person) Components: Room Requirements: Electronic Classroom(1) CHEM 493(1) Course ID:011786 20-JUN-2012 Instructor Consent Required Special Topics in Chemistry Prerequisite limitation: Must be enrolled in M.Ed. in Chem Ed program Designed for participants in the M.Ed. Chem Ed program to learn about cutting edge research in chemistry. outcomes: Increased awareness of modern areas of chemical research. Lecture(In person) Components: Room Requirements: Electronic Classroom(1) CHEM 494(1) Course ID:011858 20-JUN-2012 Department Consent Required Special Topics in Chemistry C: Innovations on the Horizon Chemical researchers are making rapid progress in expanding our knowledge of atomic and molecular structure, pharmaceuticals, properties of minerals and in many other areas. This course will focus on a few of the most recent and exciting developments in chemistry and study how these advances were made and their possible uses for humanity. Outcome: Understanding and familiarity with recent advances in chemistry. Components: Lecture(In person) Requirement Group: Restricted to M.Ed. Science Education students only. (SCED-MED) Room Requirements: Lab - Chemistry(1) CHEM 495(4) Course ID:010501 20-JUN-2012 Department Consent Required Chemistry I for High School Teachers Components: Lecture(In person) Room Requirements: Electronic Classroom(1)

discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago.

Outcome: Students understand the iportance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.

15-MAR-2006

15-JUN-2015

This course surveys archaeological research in Greece covering the Paleolithic Age through the early Iron Age (c. 700 B.C.E.).

Outcome: Students should be able to demonstrate knowledge of the main archaeological sites and their contents and the importance of archaeological material for reconstructing knowledge about the period; students should also be able to demonstrate knowledge of archaeological methodology and how evidence is gathered, classified and interpreted.

Components: Lecture Course Equivalents: ANTH 375 Room Requirements: General Classroom(1)

An advanced course in the Iliad and/or Odyssey enriched by study of Homeric scholarship from the time of Wolf's Prolegomena (1795) to the present day. Concentrations can include such key issues as ""the Homeric question,"" the Parry-Lord theory, narratology, rhetorical criticism, and the psychiatric interpretations of Dr. Jonathan.

Prerequisite: CLST 272 is recommended.

Outcomes: Students will be able to place the Homeric poems into their historical and literary context. Components: Lecture(In person) Room Requirements: Electronic Classroom(1)

Course ID:013072

CLST 378(3) Course ID:001972 15-JUN-2015

Sport in Ancient Greece & Rome

This course focuses on the practices of and attitudes toward athletics of the ancient Greeks and Romans.

Outcome: Students should be able to demonstrate knowledge about the educational, philosophical, and political significance of athletics from Homeric times through the Roman Empire. They should be able to assess and interpret written, artistic and archaeological evidence relating to ancient athletics.

College of Arts and Sciences - Classical Studies - Subject: Latin

15-MAR-2006

LATN 101(3) Latin T

This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of Latin, and simple readings in the language.

Course ID:009838

Outcome: students should be able to demonstrate basic knowledge of Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Latin sentences and passages into English.
Components: Lecture(In person)

Room Requirements: General Classroom(1)

LATN 102(3) Course ID:009839 15-OCT-2012

Latin II

Prerequisite: LATN 101.

This course continues the study of the fundamentals of the Latin language, including more vocabulary, grammar, syntax and more advanced readings. (Latin I or its equivalent is a prerequisite for this course.)

Outcome: students should be able to demonstrate advanced knowledge of basic Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately more advanced Latin sentences and passages into English.

Components:Lecture(In person)Room Requirements:General Classroom(1)

LATN 271(3) Course ID:004331 15-AUG-2011 Introduction to Roman Prose Prerequisites: LATN 101 and 102 or their equivalents. This course centers on translation of representative selections from the prose works of Golden and Silver Age authors, with special emphasis on review of Latin grammar as it is encountered in the selected texts.

Outcome: students should be able to translate the selected prose passages in Latin with accuracy, analyze and appreciate different prose styles, as well as demonstrate understanding of the content of the passages.

Components:LectureAttributes:Rome StudiesRoom Requirements:General Classroom(1)

LATN 281(3) Course ID:004333 15-JUN-2014

Intro to Roman Historians

Prerequisites: LATN 101 and 102 or their equivalents This course centers on translation of representative selections from the historical works of Republican, Augustan and other Latin authors.

Outcome: students should be able to translate accurately Latin historical prose passages, analyze and appreciate their style and contents, and demonstrate knowledge and understanding of their various contexts and meanings.

COMP 215(3) Course ID:010342 07-SEP-2012

Object Oriented Programming with Mathematics

Prerequisites: Math 132 or Math 162 or permission of instructor

This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.

Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems. Components: Lecture(In person) Course Equivalents: MATH 215 Requirement Group: Pre-requisite: MATH 132 or MATH 162.

Room Requirements: Electronic Classroom(1)

COMP 250(3)Course ID:00950320-MAY-2015Introduction to Scientific and Technical CommunicationPrerequisite: A minimum grade of C- in COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215.

This course trains students in writing clear, readable, and well-organized technical communications, including presentations, end-user documentation, internal project documentation, and scientific papers.

Outcome: students will learn to write clear technical documentation. Components: Lecture(In person) Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215 Req. Designation: Writing Intensive

COMP 251(3) Course ID:002171 15-JUN-2013

Introduction to Database Systems Prerequisites: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.

Outcomes: Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data. Components: Lecture(In person) Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

Room Requirements: Electronic Classroom(1)

COMP 264(3)Course ID:00964620-MAY-2015Introduction to Computer SystemsPrerequisites: COMP 170 or COMP 215Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensices or InformationTechnology Minor.

This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.

Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs.

Components: Lecture

15-JUN-2015 COMP 271(3) Course ID:002174 Data Structures: Algorithms and Applications Prerequisites: COMP 170 or COMP 215 Co-requisite: COMP 163 or MATH 201 or declared Computer Science Minor, Computer Crime and Forensics Minor, or Information Technology Minor. This course introduces key data structures such as lists, sets, and maps, as well as their implementations. Performance and analysis of algorithms are covered along with applications in sorting and searching. Outcome: Students will learn to design new data structures as well as learn to use existing data structures in applications. Components: Laboratory, Lecture Attributes: Bioinformatics Requirement Group: Prerequisites: COMP 170 or COMP 215 and Co-requisite: COMP 163 or MATH 201 Room Requirements: General Classroom(1) COMP 288(1 - 3) 01-JAN-1901 Course ID:002180 Computer Science Topics Lecture Components: **Room Requirements:** General Classroom(1) 15-JUN-2013 COMP 300(3) Course ID:009419 Data Warehousing and Data Mining Prerequisite: Comp 251 or Comp 271 This course covers theory and practice of extremely large information storage (warehousing) and analysis (mining) mechanisms. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence. Outcome: Students will be able to define and critically analyze data warehouse and mining approaches for fields such as security, forensics, privacy, and marketing. Components: Lecture(In person) Requirement Group: Prerequisite: Comp 251 or Comp 271 Room Requirements: Lab - Computer(1) COMP 305(3) Course ID:009417 15-JUN-2013 Database Administration Prerequisites: Comp 251 or Comp 271 Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems. Outcome: Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments. Lecture(In person) Components: Requirement Group: Prerequisite: Comp 251 or Comp 271 **Room Requirements:** Lab - Computer(1) COMP 309(3) Course ID:002182 15-JUN-2015 Numerical Methods This course offers an introduction to topics such as error analysis, interpolation and approximation, and the numerical solution of problems involving differentiation, integration, and ordinary and partial differential equations. Prerequisites: (COMP 170 or COMP/MATH 215), MATH 212 and MATH 264 Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics. Components: Lecture Course Equivalents: MATH 309 Requirement Group: Prerequisites: (COMP 170 or 215) & MATH 212 and 264 Room Requirements: General Classroom(1)

COMP 312(3) Course ID:010231 15-JUN-2013

Open Source Computing Prerequisite: Comp 251 or Comp 271

This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.

Outcome: Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively.

COMP 313(3) Course ID:009966 29-AUG-2012 Intermediate Object-Oriented Development

Prerequisite: COMP 271.

Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects.

Outcome: A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java.

Components:Lecture(In person)Requirement Group:Prerequisite: COMP 271Room Requirements:Lab - Computer(1)

COMP 314(1) Course ID:010224 15-JUN-2013

Problem Solving Strategies I Co-requisite or Prerequisite: COMP 271

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.

Outcome: Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.

Course ID:010232

Components:Seminar(In person)Requirement Group:Co-requisite or prerequisite: Comp 271Room Requirements:General Classroom(1)

COMP 315(2) Problem Solving Strategies II Prerequisite: Comp 314

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.

20-AUG-2007

Outcome: Ability to lead n a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.

Components:Seminar(In person)Room Requirements:Electronic Classroom(1)

COMP 317(3) Course ID:009773 03-MAY-2006 Social, Legal, and Ethical Issues in Computing This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.

Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system. Components: Lecture(In person) Room Requirements: General Classroom(1)

15-JUN-2015 COMP 319(1) Course ID:010768

Introduction to UNIX Prerequisite: COMP 170 and COMP/MATH 215

An introduction to the UNIX operating system. Topics include files and directories, electronic mail, security, advanced file systems, network utilities, network file sharing, text utilities, shell programming, UNIX internals, UNIX system administration (essentials), the X windowing system, systems programming, and secure shell (SSH).

Outcome: After taking this course, students will develop working knowledge of Unix and be able to use modern Unix operating systems such as Linux, OS X, or Solaris. Components: Laboratorv

Requirement Group: Prerequisite: COMP 170 or MATH 215

COMP 320(3) Course ID:009416 05-NOV-2007

Software Systems Analysis Pre-requisite: COMP 163 and 170 or Instructor Approval.

Software systems analysis and design document user needs, create system architecture, and guide implementation. This course teaches the Unified Modeling Language (UML), and uses current software tools for analysis and design.

Outcome: Students will be able to use techniques of analysis and design, document results using UML, and understand how to communicate in team-oriented settings.

Lecture(In person) Components: Requirement Group: Pre-requisites: COMP 163 and 170. **Room Requirements:** Lab - Computer(1)

COMP 322(3)

Course ID:013169 Software Development for Wireless and Mobile Devices

This course will focus on the unique challenges, methods, tools, and technologies for developing software applications for wireless and mobile devices, smart mobile phones, and the growing world of mobile connected devices.

Prerequisite: Comp 313 Intermediate Object Oriented Development

Outcomes:

1. Understand challenges of software design for resource limited devices.

2. Know the architecture fo one or more state-of-the-art mobile operating systems

Course TD:010327

Lecture(In person) Components:

Room Requirements: Electronic Classroom(1)

COMP 324(3) Course ID:013155 15-JUN-2015

Client-Side Web Development

This course covers the design and implementation of the presentation layer of dynamic web applications. Topics include visual design and usability, multi-channel and multi-modal applications, markup of static and dynamic content, and client-side executable content. HTML/CSS/JavaScript are introduced quickly, followed up with the stack of current JavaScript frameworks and libraries used in practice.

Prerequisite: COMP 271 or Instructor permission

Outcomes: Familiarity with the most common effective tools for creating responsive, dynamic, and interactive web content with client-side tools.

15-JUN-2015

Components: Lecture(Blended) Requirement Group: Prerequisite: COMP 271 **Room Requirements:** Electronic Classroom(1)

COMP 328(3) Algebraic Coding Theory Prerequisite: MATH 212

Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes with algebraic structure and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, effciency considerations, and Shannon's fundamental theorem of information theory.

Components: Lecture(In person) Course Equivalents: MATH 328 Requirement Group: Prerequisite: MATH 212 Room Requirements: General Classroom(1)

College of Arts and Sciences - Computer Science - Subject: Computer Science

Course ID:002184 29-JUN-2012 COMP 330(3) Software Engineering Prerequisite: COMP 271. Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project. Outcome: Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others. Components: Lecture Requirement Group: Prerequisite: COMP 271 Room Requirements: General Classroom(1) COMP 331(3) Course ID:002185 15-JUN-2015 Cryptography Prerequisites: Mathematics (one of COMP 163, MATH 313 or MATH 201) and Programming (either COMP 125, COMP 150, COMP 170, COMP 215, or equivalent). This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed. Components: Lecture(In person) Course Equivalents: MATH 331 Requirement Group: Prerequisites: (COMP 163 or MATH 313 or MATH 201) and (COMP 125 or COMP 150 or COMP 170 or COMP 215). Room Requirements: General Classroom(1) Course ID:002187 29-JUN-2012 COMP 333(3) Formal Methods in Software Engineering Prerequisite: Comp 313 As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software. Outcomes: An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC. Components: Lecture Requirement Group: Pre-requisite: COMP 313. **Room Requirements:** General Classroom(1) COMP 336(3) 01-JAN-2016 Course ID:009582 Markup Languages Pre-requisite: Comp 271 This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT. Outcome: After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services.

Components:Lecture(In person)Requirement Group:Prerequisite: COMP 271Room Requirements:Lab - Computer(1)

| College of Arts and Sciences - Computer Science - Subject: Computer Science |
|--|
| COMP 337(3)Course ID:00218829-JUN-2012Introduction to ConcurrencyPrerequisite: Comp 313. |
| Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems. |
| Outcome: An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture Requirement Group: Pre-requisite: COMP 313. Room Requirements: General Classroom(1) |
| COMP 338(3)Course ID:00218929-JUN-2012Server-based Software DevelopmentPrerequisite:COMP 313 |
| Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific technologies. |
| Outcome: An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture Requirement Group: Pre-requisite: COMP 313. Room Requirements: General Classroom(1) |
| COMP 339(3) Course ID:009583 01-JAN-2016 Distributed Programming Prerequisite: COMP 313, COMP 363 or COMP 374 |
| This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security. |
| Outcome: After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies. |
| Components:Lecture(In person)Requirement Group:Prerequisite: COMP 313 or 363 or 374Room Requirements:Lab - Computer(1) |
| COMP 340(3) Course ID:010307 15-JUN-2014 Computer Forensics |
| Prerequisites: COMP 150 and (COMP 264 or COMP 317 or COMP 343) |
| The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations. |
| Outcome: The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols. Components: Lecture(In person) Requirement Group: Prerequisites: (COMP 150 or COMP 170 or COMP/MATH 215) and (COMP 264 or COMP 317 or COMP Room Requirements: Electronic Classroom(1) |
| COMP 341(3) Course ID:013171 15-JUN-2015 Human-Computer Interaction Limitations in human-computer interaction are as much due to human factors, cognitive limits, expectations, motivations, and inertia as technological capabilities. Systematic methods will be used to evaluate and improve designs through both qualitative feedback and statistical, hypothesis-driven testing on web pages, GUIS, mobile apps and many non-traditional interfaces. |
| Prerequisite: COMP 271 |

Prerequisite: COMP 271

Outcomes: Students will be exposed to a wide array of non-traditional computing interfaces, and be able to evaluate, design and develop better human-computer interfaces using research-based, systematic approaches.

COMP 342(3) Course ID:013042 15-JUN-2015 Introduction to Web Application Development An introduction to webpage development using JavaScript, jQuery and associated client-side tools. Prerequisite: COMP 170 Outcomes: Students will be able to create webpages using JavaScript and related tools and protocols, and interface a webpage with a database. Components: Lecture(In person) Requirement Group: Prerequisite: COMP 170 Room Requirements: Lab - Computer(1) Course ID:002190 15-JUN-2013 COMP 343(3) Intro to Computer Networks Prerequisite: Comp 264 or Comp 271 This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some Java programming is required. Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed. Lecture Components: Requirement Group: Prerequisite: Comp 264 or Comp 271 Room Requirements: General Classroom(1) COMP 344(3) Course ID:013157 15-JUN-2015 Web Services Programming Web services are building blocks for enterprise applications that use open data exchange standards and transport protocols to exchange data with calling clients. This course studies the architectures, frameworks, and tools required to develop and compose web services and clients, as well as integrate service-oriented systems with legacy systems. Prerequisite: COMP 313 Outcomes: An understanding of the design space of software architecture. Proficiency in designing, implementing, deploying and composing systems from web services. Components: Lecture(In person) Requirement Group: Pre-requisite: COMP 313. Room Requirements: Electronic Classroom(1) COMP 346(3) Course ID:002191 15-JUN-2013 Intro Telecommunications Prerequisite: Comp 264 or Comp 271 This course introduces the fundamental concepts of telecommunication networks, including requirements of voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system. Outcome: Students will understand how modern telephone systems work. Lecture Components: Requirement Group: Prerequisite: Comp 264 or Comp 271 Room Requirements: Electronic Classroom(1) 29-JUN-2012 Course ID:010233 COMP 347(3) Intrusion Detection and Computer Security Prerequisite: COMP 150 or COMP 170 This course covers techniques and algorithms for detecting unusual usage patterns that typically signal a break-in, including techniques for detecting evasive or stealthy attacks. Also covered are differences in detecting local versus network intruders. Additional topics: computer viruses, computer security management, computer forensics.

Outcomes: Students will learn to configure ID systems (e.g. SNORT) and analyze their output. They will also understand both network-based and host-based monitoring techniques. Components: Lecture(In person) Requirement Group: Prerequisite: COMP 150 or COMP 170

Room Requirements: Electronic Classroom(1)

COMP 348(3) Course ID:009857 15-JUN-2015

Network Security Prerequisite: COMP 264 or COMP 271 or COMP 347

This course continues some of the topics introduced in COMP 347. The course covers methods and tactics to keep network attackers at bay and teaches mechanisms to identify and potentially stop potential intruders. Analyses of specific attack mechanisms may be considered.

Outcomes: An understanding of how to secure networks using encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

Components:Lecture(In person)Requirement Group:Prerequisite: COMP 264,271,347Room Requirements:Lab - Computer(1)

COMP 349(3) Course ID:010234 15-JUN-2013 Wireless Networking and Security

Prerequisite: Comp 264 or Comp 271

This course will explore the wireless standards, authentication issues, and common configuration models for commercial versus institutional installations and analyze the security concerns associated with this ad-hoc method of networking.

Outcome: Students will gain an understanding of wireless networking, protocols, and standards and security issues.

Components:Lecture(In person)Requirement Group:Prerequisite: Comp 264 or Comp 271Room Requirements:Electronic Classroom(1)

COMP 351(3) Course ID:009423 15-JUN-2013

Network Management Pre-requisite: Comp 264 or Comp 271

This course introduces the current state of the art in automated management of computer networks, including protocols such as SNMP and its attendant naming conventions, network management systems, and important issues in administrative network configuration.

Outcome: Students will become familiar with the SNMP protocol, with how large-scale Network Management Systems operate and are configured, and with advanced network configuration. Components: Lecture(In person) Requirement Group: Prerequisite: Comp 264 or Comp 271 Room Requirements: Lab - Computer(1)

COMP 353(3) Course ID:002193 15-JUN-2013 Database Programming

Prerequisite: COMP 251 or COMP 271

This course introduces relational and object databases to support database creation and application development. Use of commercial database products will give a practical orientation.

Outcome: Students will learn SQL, database design and application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation. Components: Lecture(In person) Course Equivalents: BIOI 353 Requirement Group: Prerequisite: Comp 251 or Comp 271

COMP 363(3) Course ID:002197 15-JUN-2013 Desgn and Analysis Computer Algorithms Prerequisites: (Comp 163 or Math 201) and Comp 271 and (Math 131 or Math 161) Theoretical design and analysis of computer algorithms may be supplemented by small amounts of programming. Outcome: The ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes. Components: Lecture(In person) Course Equivalents: BIOI 363 Attributes: Bioinformatics Requirement Group: Prerequisite: (Comp 163 or Math 201) and Comp 271 and (Math 131 or Math 161) Room Requirements: General Classroom(1) COMP 364(3) Course ID:002198 01-JAN-2016 High Performance Computing Prerequisite: COMP 313, COMP 363 or COMP 374 This course covers parallel architectures and parallel models of computation. Algorithms for achieving high performance in various computational contexts are discussed. Models such as shared memory, message passing, and hybrid modes of computing are introduced. Outcome: Students will learn how to engineer solutions to practical problems in multiprocessor architectures and using large physical memories. Components: Lecture Requirement Group: Prerequisite: COMP 313 or 363 or 374 Room Requirements: General Classroom(1) COMP 366(3) Course ID:002199 01-JAN-2016 Microcomputer Des & Interfac This course covers computer architecture, CPU logic, data acquisition, signal conditioning, analog/digital conversion and computer interfacing. Prerequisite: COMP 271 Outcomes: Students will gain a working knowledge of interfacing techniques and design, hands-on experience with professional interfacing hardware and software, and the ability to document and report experimental results. Components: Laboratory Course Equivalents: PHYS 366 Requirement Group: Prerequisite: COMP 271 COMP 370(3) Course ID:009418 29-JUN-2012 Software Quality and Testing Prerequisite: Comp 271. The course teaches software testing and quality control concepts, principles, and techniques including black box and white box testing, coverage testing, test case development, and regression testing. Outcome: Students will learn how to prevent errors, how to get 'bugs' out of software, and be able to apply this knowledge in other courses and projects. Components: Lecture(In person) Requirement Group: Prerequisite: COMP 271 Room Requirements: Lab - Computer(1) 01-AUG-2011 COMP 372(3) Course ID:002202 Programming Languages Prerequisite: Comp 313. There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms. Outcome: An understanding of key principles and paradigms underlying the design and implementation of commonly used programming languages; exposure to formal mechanisms for describing language syntax and semantics; programming experience in several representative languages.

COMP 379(3) Course ID:013158 15-JUN-2015 Machine Learning Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal. Prerequisite: COMP 271 Outcomes: Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making. Components: Lecture(Blended) Requirement Group: Prerequisite: COMP 271 Room Requirements: Electronic Classroom(1) COMP 380(3) Course ID:002208 15-MAR-2006 Intro to Computer Graphics Prerequisite: COMP 271 This course introduces modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL. Outcome: Student will learn how to program real-time interactive applications using libraries like OpenGL. Components: Lecture Requirement Group: Pre-requisite: COMP 271 Room Requirements: General Classroom(1) COMP 381(3) Course ID:010122 14-JUN-2006 Bioinfomatics Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution. Outcome: Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences Lecture(In person) Components: Course Equivalents: BIOI 388, BIOL 388 Requirement Group: Pre-requisite: Biol 282. Room Requirements: Electronic Classroom(1) COMP 382(3) Course ID:002209 15-MAR-2006 Intro to Compilers Prerequisite: COMP 260 and 272 This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler. Outcome: students will learn how a compiler is built. Components: Lecture Requirement Group: Pre-requisite: COMP 260 and COMP 272. Room Requirements: General Classroom(1) Course ID:009421 01-JAN-2016 COMP 383(4) Computational Biology Prerequisites: COMP 271 and COMP 381 (Equivalencies: BIOI/BIOL 388) This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis. Outcome: Students will learn, in detail, foundational methods and algorithms in bioinformatics. Lecture(In person) Components: Course Equivalents: BIOI 383 Attributes: Bioinformatics Requirement Group: Prerequisites: COMP 271 and COMP 381 (Equivalencies: BIOI/BIOL 388)

College of Arts and Sciences - Computer Science - Subject: Computer Science

15-JUN-2015 COMP 384(3) Course ID:013121 Instructor Consent Required Metagenomics Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches. Prerequisite: BIOL 282 Outcomes: Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting Lecture(In person) Components: Course Equivalents: BIOL 382, BIOL 392 Room Requirements: Lab - Computer(1) COMP 386(3) Course ID:013043 15-JUN-2016 Computational Neuroscience Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques. Prerequisites: COMP 150 or COMP 170 Outcomes: Appreciation that many aspects of neuroscience cannot be understood without appropriate mathematical or computational frameworks, and ability to adeptly apply these frameworks in the various domains of neuroscience. Lecture(In person) Components: Neuroscience Attributes: Requirement Group: Prerequisite: COMP 150 or COMP 170 Room Requirements: Electronic Classroom(1) 15-MAR-2006 COMP 388(1 - 6) Course ID:002210 Topics in Computers Science This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies. Outcome: Understanding of an emerging area of Computer Science. Components: Lecture Room Requirements: General Classroom(1) COMP 390(3) Course ID:002211 15-JUN-2013 Broaden Particip STEM (Computing, Math & Science) Students will learn about underrepresentation of various population groups in STEM fields (science, technology, engineering, mathematics), as well as some of the reasons and negative effects of this situation. They will learn about techniques and educational materials for ameliorating this situation and will engage in relevant service learning activities. Outcomes: Students gain first-hand experience with broadening STEM participation and seeing how they can make a difference in the lives of other students and contribute to national needs. Components: Lecture(In person) Attributes: Engaged Learning Reg. Designation: Service Learning Room Requirements: Electronic Classroom(1) Course ID:002212 01-AUG-2012 COMP 391(1 - 6)Department Consent Required Internship in CS Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Program Director, followed by final reports from the student and the employer.

Outcome:Application of classroom skills to real-world situations.Components:Field StudiesAttributes:Engaged LearningReq. Designation:Internship

College of Arts and Sciences - Computer Science - Subject: Computer Science

COMP 397(1) Course ID:013044 15-JUN-2015 Research Seminar Supplements CS Seminar by targeting students directly engaging in research and facilitating contributions in ongoing projects. Progress in outside projects tracked through milestones such as abstracts, small fellowship-style proposals, informal updates, and outcome-oriented goal setting. Emphasizes creating lasting impacts through establishing project continuity and presenting posters, papers, and slide shows. Outcomes: Regular progress on research projects and final presentations of results for demonstration to department faculty and students, and potential use at professional conferences. Components: Seminar(In person) Room Requirements: Electronic Classroom(1) COMP 398(1 - 6) Course ID:002213 01-AUG-2012 Department Consent Required Independent Study The student and a sponsoring faculty member will determine an advanced topic for the student to work on. Outcome: Knowledge of an advanced topic. Independent Study Components: Attributes: Engaged Learning Req. Designation: Undergraduate Research 15-JUN-2014 COMP 399(1) Course ID:002214 Computer Science Seminar The department seminar is designed to bring together students interested in understanding and engaging in extracurricular applications of computer science, with a focus on ongoing research. Speakers will include department faculty, research students, and invited outside speakers. Students will be asked to read relevant literature and participate in discussions. Outcome: Students will be exposed to a wide range of topics in computer science, participate in discussions, and provide feedback to assess their general understanding of the presented material. Components: Lecture(In person) Room Requirements: Electronic Classroom(1) COMP 409(3) Course ID:002216 01-JAN-2016 Advanced Numerical Analysis Components: Lecture Course Equivalents: MATH 409 Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 410(3) Course ID:002217 01-JAN-2016 Operating Systems The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes. Outcome: Students will learn important topics in advanced operating systems and be able to make presentations on the topics. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) Course ID:009706 23-MAY-2005 COMP 411(3) Computer Systems Administration Lecture(In person) Components: Room Requirements: General Classroom(1) COMP 412(3) Course TD:009707 01-JAN-2016 Open Source Computing This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers. Outcome: Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

College of Arts and Sciences - Computer Science - Subject: Computer Science

| COMP 413(3)Course ID:01236501-JAN-2016Intermediate Object-Oriented DevelopmentPrinciples of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing. |
|--|
| Outcomes: Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development. Components: Lecture(In person) Room Requirements: Electronic Classroom(1) |
| COMP 416(1 - 2) Course ID:002218 01-JAN-1901 Social Issues in Computing Components: Seminar Components: Seminar Requirement Group: Restricted to Graduate School students. Room Requirements: Seminar(1) |
| COMP 417(3)Course ID:00970815-MAR-2006Social and Ethical Issues in ComputingThis course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies. |
| Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system. Components: Lecture(In person) Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) |
| COMP 418(3) Course ID:00220 01-JAN-2016 Combinatorial Mathematics The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula. Outcome: Students will learn mathematical techniques in discrete mathematics and applied combinatorics. Components: Lecture Course Equivalents: MATH 418 Requirement Group: Restricted to Graduate School students. |
| Room Requirements: General Classroom(1) COMP 420(3) Course ID:012214 07-DEC-2011 Software Systems Analysis Prerequisites: COMP 271 07-DEC-2011 |
| This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design. |
| Outcomes: Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation. Components: Lecture(In person) Requirement Group: Comp 271 or permission of instructor Room Requirements: Electronic Classroom(1) |
| COMP 421(3)Course ID:00221915-MAR-2006Math Models & SimulationThis course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered. |
| Outcome: Student will learn foundations of discrete event simulation Components: Lecture Course Equivalents: MATH 421, STAT 421 Requirement Group: Restricted to Graduate School students. Room Requirements: Lab - Computer(1) |

College of Arts and Sciences - Computer Science - Subject: Computer Science

15-MAR-2006 COMP 434(3) Course ID:009712 Enterprise Software Development The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors. Outcome: Students will learn the architecture of EJB, entity and message and session beans. Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 436(3) Course ID:009713 01-JAN-2016 Markup Languages This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT. Outcome: After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 437(3) Course ID:002224 15-MAR-2006 Intro Concurrent Programming Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems. Outcome: An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 439(3) Course ID:009714 24-FEB-2010 Distributed Systems This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource. Outcome: Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 441(3) Course ID:009722 15-MAR-2006 Human-Computer Interface Design This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems. Outcome: Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces. Components: Lecture(In person) Room Requirements: General Classroom(1)

COMP 442(3) Course ID:009723 15-MAR-2006 Server-Side Software Development

Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.

Outcome: An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development.

Components:Lecture(In person)Requirement Group:Restricted to Graduate School students.Room Requirements:General Classroom(1)

Course Catalog

Run Date: 04/01/2016 Run Time: 11:35:41

COMP 443(3) Course ID:002225 15-MAR-2006 Computer Networks This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion. Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) Course ID:009715 24-FEB-2010 COMP 446(3) Telecommunications This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed. Outcome: Students will learn how telephone and data networks work. They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system. Components: Lecture(In person) Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 447(3) Course ID:009716 15-MAR-2006 Intrusion Detection and Computer Forensics This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored. Outcome: Students will learn to configure ID systems (eq., snort) and analyze their output. They will also understand both network-based and host-based monitoring techniques. Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 448(3) Course ID:009717 15-MAR-2006 Network Security This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks. Outcome: Students will gain an understanding of how to secure computers and network environments. Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 449(3) Course ID:009718 15-MAR-2006 Wireless Networking and Security This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking. Outcome: Students will gain an understanding of wireless networking, protocols, and standards and security issues. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 450(3) Course ID:002226 01-JAN-1901 Microprogramming & Microprocess Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

COMP 453(3) Course ID:009719 15-MAR-2006

Database Programming

This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.

Outcome: Students will learn application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation. Components: Lecture(In person) Requirement Group: Restricted to Graduate School students.

Room Requirements: General Classroom(1)

Course ID:002227 15-MAR-2006

Course TD:002228

Course ID:002229

Algorithms & Complexity

This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.

Outcome: Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes.
Components: Lecture
Requirement Group: Restricted to Graduate School students.

Room Requirements: General Classroom(1)

COMP 462(3) Advanced Computer Architecture

COMP 460(3)

This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.

15-MAR-2006

15-MAR-2006

Outcome: Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems. Components: Lecture

Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

COMP 464(3)

High-Performance Computing

This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.

Outcome: Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

CSED 301(3) Introduction to Programming/CS 15-MAR-2006

15-MAR-2006

This course provides an introduction to programming with an overview of other topics in computer science.

Course ID:009702

Outcome: Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work.

Components: Lecture(In person) Room Requirements: General Classroom(1)

Course ID:009704

CSED 317(3) Social Issues in Computing

This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.

Outcomes: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system. Components: Lecture(In person)

Room Requirements: General Classroom(1)

Course ID:009703 15-MAR-2006

Tech Admin PC Clusters

CSED 330(3)

This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.

Outcome: Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab.

Components: Laboratory(In person) Room Requirements: Lab - Computer(1)

Course ID:009700 15-MAR-2006 CSED 331(3) Management of PC Cluster

Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.

Outcome: Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them.

Laboratory(In person) Components: Room Requirements: Lab - Computer(1)

CSED 343(3)

Course ID:009701 Introduction to Computer Networks

14-JUL-2005

How a computer network is put together, from lowest to highest levels. TCP/IP protocols and the construction of the internet; LAN protocols such as Ethernet and ATM; internetworking protocols such as IP; transit protocols such as TCP and UDP; congestion and security issues. Components: Lecture(In person)

Room Requirements: General Classroom(1)

CSED 401(3) Course ID:009695 15-MAR-2006 Intro to Programming & CS

This course provides an introduction to programming with an overview of other topics in computer science.

Outcome: Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work.

Components: Lecture(In person)

Requirement Group: Restricted to Graduate Education Students.

Basic concepts covered include data communications hardware and software, transmission media, and network topology, with an emphasis on local area networks (LANs) and client server applications. Issues related to the management of LANs, wide area networks, and international telecommunications networks will be presented. The course will address technical and managerial issues related to the use of telecommunications for strategic advantage and its role in business organizations. Business cases involving the planning, designing, implementation, and management of communications networks in business organizations will be discussed.

UCSF 137(3)

Course ID:012233 The Scientific Basis of Environmental Issues

29-JAN-2013

This is a foundational Tier I class; it is prerequisite to all Tier II science core classes.

The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues.

Outcomes: 1) Exhibit knowledge of the nature of the four Earth systems 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data.3) Understand the role of energy and Components: Lecture(In person)

College of Arts and Sciences - CORE Academic Subject - Subject: University Course

UNIV 302(3) Course ID:010490 15-JUN-2013 Department Consent Required Ricci Seminar Beijing A research seminsr in which a Ricci Scholar develops a project and refines it under the tutelage of a faculty mamber based in Beijing. The focus of the project will be Beijing-, China-, or Asia-centered. Seminar Components: Requirement Group: Restricted to Beijing Students Req. Designation: Writing Intensive UNIV 340(1) Course ID:011495 08-FEB-2010 Department Consent Required Ricci Scholars Seminar Components: Seminar UNIV 370(0) Course ID:011856 01-MAY-2015 Responsible Conduct in Research and Scholarship Loyola University actively promotes a culture of responsible and ethical behaviors among all people associated with the University. This includes the LUC faculty, staff, and students of all levels. This course provides students with a strong foundation of the basic ethical principles and professional standards that can then be built upon by future experiences. Topics include the nine identified by Office of Research Integrity critical to research activities as well as those of value to scholars here at LUC. Taught over a three day period, students will be presented with information and relevant background and given the opportunity to apply these ethical principles in a small group setting. NOTE: This course satisfies the LUC policy requirements for students that are enrolled in graduate programs, Lecture Components: UNIV 392(3) Course ID:012284 01-AUG-2012 Instructor Consent Required Internship Seminar: Ignatian Leadership for Orientation Leaders Prerequisites: Approval by the Office of First Year Experience This is a seminar course for Orientation Leaders. Students in this course will complete at least 100 internship hours in the Office of First Year Experience's Orientation program. Students will reflect on their work experience in the context of leadership theory and the tradition of Ignatian leadership specifically. Outcomes: 1. Development understanding of leadership theories, reflection on actions, and Ignatian traditions of leadership. 2. Enhance connection to the institution through internship work, and academic and professional learning and development. 3. Foster critical thinking and reflective writing skills. Lecture(In person) Components: Attributes: Engaged Learning Reg. Designation: Internship Room Requirements: Electronic Classroom(1) UNIV 410(3) Course ID:011295 09-JUL-2014 Introduction to Geographic Information Systems This combined lecture and practicum course explores both traditional, contemporary and critical theories and applications of geographic information systems (GIS). CJC 310(3) Contemporary Police Issues

This course provides an in-depth examination of specific contemporary issues in policing related to recruitment and training, education and retention, innovations in policing strategies, police policies and practices, professionalism and ethics.

Course ID:002373

Outcome: Students will be able to identify and discuss the impact that current issues in policing have on police operations, effectiveness, and police-community relations.

Components:

Room Requirements: General Classroom(1)

CJC 312(3)

Course ID:012311 Popular Culture and the Criminal Justice System

Lecture

his course will examine the interrelationship among crime, the media, the criminal justice system, and other forms of popular culture. Topics include media representations of crime and criminal justice, social media, and the social construction of myths about crime and the criminal justice system.

Outcomes: Students will be able to (1) know the meaning of the social construction of deviance; (2) know and be critical of the manner in which crime and criminal justice are portrayed in the media, and their effect on public opinions and images of the latter; and (3) analyze and evaluate the effects of popular culture. Components: Lecture(In person)

Room Requirements: General Classroom(1)

Course ID:002377 15-JUN-2013

CJC 322(3) Criminal Law

This course is an introduction to the principles underlying the definition, constitutionality, and application of criminal laws. It includes the analysis of court decisions regarding various state and federal crimes, and the rules of individual responsibility and accountability for those crimes.

Outcomes: Students will be able to demonstrate an understanding of the constitutional limitations on the construction of statutory crimes, the elements of different crimes, and the principles governing individual responsibility and accountability for those crimes.

Components: Lecture Room Requirements: General Classroom(1)

Course ID:002378 15-JUN-2013

Criminal Procedure

CJC 323(3)

This course provides an in-depth, sophisticated coverage of criminal procedures surrounding investigations, stops, searches and seizure, arrests, interrogations, and procedural remedies.

Outcome: Students will be able to identify and articulate the origin, interpretation and application of legal procedures as they relate to matters involving the police, and how these relate to the overall operation and effectiveness of the criminal justice system

Components: Lecture Room Requirements: General Classroom(1)

15-JUN-2013 CJC 330(3) Course ID:002380 Written Communication in Criminal Justice

Prerequisite: UCWR 110 (or equivalent), and major or minor in Criminal Justice & Criminology.

This course is designed to introduce students to the different ways of writing and critical thinking in criminal justice. Topics will vary, but may include writing summaries of empirical studies, personal opinion pieces, personal statements, and literature reviews; how to use the library and internet to assist in writing assignments; and writing from a social science perspective.

Outcomes: Students will be able to (1) critically think about criminal justice issues and problems, (2) use library, internet, and other sources to develop the content of their writings; and (3) to write effectively for a variety of specific purposes in criminal justice.

Components: Lecture(In person) Requirement Group: Prerequisite: UCWR 110 (or equivalent); major or minor in Criminal Justice & Criminology Room Requirements: General Classroom(1)

Organized Crime

CJC 351(3)

This course offers an introduction to the study of organized crime in U.S. society. Emphasis is given to the history and development of traditional organized crime in Chicago. Emerging organized crime groups are also studied. In addition, this course offers an introduction to the concept of transnational organized crime.

Outcomes: Students will articulate the extent and nature of organized crime, how it relates to other forms of criminal behavior, and the effectiveness of the justice system;s response to it.

Lecture Components: Room Requirements: General Classroom(1)

CJC 352(3) Gangs

This course examines the historical development of urban street gangs with a view toward understanding their structure, characteristics, purposes, and activities. Particular emphasis is given to the history and development of street gangs in Chicago.

15-JUN-2013

Outcomes: Students will demonstrate an understanding of the causes and history of street gangs, the methods used to control them, and their impact on society and the criminal justice system. Components: Lecture(In person) Course Equivalents: URB 352 Attributes: Urban Studies **Room Requirements:** General Classroom(1)

CJC 353(3) Course ID:002388 15-JUN-2013

White Collar Crime

This is a study of non-traditional crime engaged in by governmental and corporate entities, and persons in the ¿white collar; professions. It includes state political crimes, corporate violence and abuse of power, as well as occupational, financial, and environmental crimes, and enforcement of laws against such crimes.

Outcomes: Students will be able to describe the nature and extent of white collar crime, how it differs from traditional crime, and the manner in which laws against such crimes are enforced. Components: Lecture

College of Arts and Sciences - Criminal Justice & Criminology - Subject: Criminal Justice & Criminolo

CJC 414(3) Course ID:002420 15-JUN-2013 General Special Topics Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System. Outcomes: To analyze and discuss topics in criminal justice. Components: Seminar(In person) Requirement Group: Restricted to Graduate School students. **Room Requirements:** Electronic Classroom(1) Course ID:002410 15-JUN-2013 CJC 415(3) Mental Illness and Crime Prerequisites: Graduate students only This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders. Seminar(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: Electronic Classroom(1) CJC 416(3) Course ID:002416 15-JUN-2013 International Criminal Justice This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CJC 417(3) Course ID:012610 23-MAY-2013 Forensic Science and the Criminal Justice System Graduate Students Only. This course introduces the basic principles and applications of the biological, chemical, physical, medical and behavioral sciences currently practiced and the limitations of the modern crime laboratory. The course then explores uses of forensic science and the applicability to the criminal justice system. Current issues, examples, and presentations are integrated into course material. Outcomes: Understand the basic concepts, strengths, limitations and challenges of the forensic sciences discipline, the application of the forensic sciences to the management, operations, and policies of criminal justice system, from crime scene processing through adjudication. Seminar(In person) Components: Requirement Group: Restricted to graduate students. Room Requirements: Electronic Classroom(1)

CJC 499(1 - 6) Independent Study Course ID:002421

15-JUN-2013

Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic.

Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

College of Arts and Sciences - Criminal Justice & Criminology - Subject: Forensic Science

Course ID:011822 20-NOV-2013 FRSC 380(3)

Introduction to Forensic Science Prerequisites: CRMJ 101; Forensic Science Majors Only.

This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.

Outcome: Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice. -----

BIOI 387(3) Genomics

BIOI 388(3)

Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.

Outcome: Students will acquire an in-depth knowledge of the nature of genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge and its application to systems biology and biomedicine.

Components:Lecture(In person)Course Equivalents:BIOL 387Room Requirements:Electronic Classroom(1)

Bioinfomatics Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution.

Course ID:010426

Outcome: Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences

Components: Lecture(In person) Course Equivalents: COMP 381, BIOL 388 Room Requirements: Electronic Classroom(1)

BIOI 390(4) Course ID:010427 09-JUL-2007

Molecular Biology Laboratory Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224.

This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing.

Outcome: Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects.

Dance History: Renaissance to Present

This course is a survey of the history of theatrical dance from the Renaissance through the present. It provides a basic knowledge of the origins of theatrical dance forms, from the development of ballet in the courts of Louis XIV, through Vaudeville and stylistic revolutions of Modern Dance, to contemporary choreographic innovators and performance practices.

Outcome: Students will be able to identify and describe significant events, artists, performance practices, forms, and styles in the history of theatrical dance; to locate these facts in cultural context; to relate the evolution of dance forms to cultural history; and to apply this comprehension to enhanced appreciation and informed critique of contemporary dance. Lecture(In person)

01-JAN-2016

DANC 313(2) Course ID:010770 01-JAN-2016

Required Skills: Student must demonstrate correct alignment and articulation at the barre, in the center and traveling in all advanced vocabulary. Students need required strength and skill to correctly demonstrate all variations of petit and grand allegro, adagio and turns.

This class develops students; ability to execute ballet technique at a pre-professional level. Students work towards mastery of ballet utilizing advanced vocabulary, style, alignment, spatial, musical and performance skills. Students apply advanced ballet studies by preparing and presenting a public performance. May be repeated 8 times for credit.

Outcomes: Students improve strength, coordination, flexibility, dynamics and spatial skills. They Components: Performance(In person) Attributes: Engaged Learning Requirement Group: Prerequisite: DANC 311 or permission of Department Req. Designation: Public Performance Room Requirements: Dance Studio(1)

Course ID:010771

DANC 314 Pointe II: Continuing Pointework This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 313 Ballet V Advanced Ballet or 343 Advanced Majors Ballet. Students must be enrolled in Advanced Ballet to be eligible for enrollment in Pointe II.

This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with DANC 313 Ballet V or 343 Advanced Majors Ballet. May be taken 8 times for credit.

Outcome: Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced Components: Performance(In person) Attributes: Engaged Learning Requirement Group: Co-Requisites: DANC 313 Ballet V Advanced Ballet or DANC 343 Advanced Majors Ballet Req. Designation: Public Performance Room Requirements: Dance Studio(1)

DANC 321(2)Course ID:01027601-JAN-2016Instructor Consent RequiredModern Dance III: Intermediate Modern Dance Theories and TechniquesInstructor permission required.Instructor Consent Required

This course develops students' ability use modern dance technique. Students study the dance technique of Martha Graham and her influence on Modern Dance in America. Students apply and synthesize all aspects of technique by preparing for and presenting a public performance. This course may be taken six times for credit.

Outcomes: Students increase core strength, coordination, flexibility and correct posture, improve dramatic awareness and develop physical power. Students demonstrate beginning synthesis and application of Graham technique in performance.

Components:Performance(In person)Attributes:Engaged LearningReq. Designation:Public PerformanceRoom Requirements:Studio - Fine Arts(1)

DANC 324(1) Course ID:012251 03-APR-2012 Department Consent Required Intermediate Majors Modern Dance

Prerequisites: Must be an enrolled dance major. Admission into the major is by audition.

Modern Dance is studied at an Intermediate Level and begins an intensive period of technical and artistic development. This studio course develops core strength, coordination and musical, spatial and performance skills.

Outcomes: Students will improve coordination, phrasing, improve physical power, shift of weight, anatomical awareness, performance, projection, flexibility and placement. They will gain awareness of Martha Graham's technique of contraction and release and her role in the development of Modern Dance.
Components: Performance(In person)

Requirement Group: Must be an enrolled dance major Room Requirements: General Classroom(1)

DANC 331(2) Course ID:010277 01-JAN-2016 Instructor Consent Required Jazz Dance III: Intermedaite Jazz Dance Theories and Techniques Permission of the Instructor.

This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.

Outcomes: Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance.

Prerequisites: Must be an enrolled dance major. Admission into the major is by audition.

Course ID:012250

This class is designed to develop students' ability to execute ballet technique at the pre-professional level.

Outcomes: Students will demonstrate correct alignment in all elements of class and have strong working vocabulary of adagio, pirouettes, petite allegro, and grand allegro. Additionally they will demonstrate Components: Performance(In person) Requirement Group: Must be an enrolled dance major

Requirement Group: Must be an enrolled dance major **Room Requirements:** Studio - Fine Arts(1)

DANC 360(3) Course ID:012263 Dance Pedagogy

Prerequisities: Dance major or dance minor.

The study child development, sequential dance pedagogy, biomechanics, nutrition and classroom management techniques as it relates to the teaching of dance. Coursework includes lecture, readings, model teaching, and research. Students observe master teachers instructing children of all ages and create sequential lesson plans consisting of all elements of dance pedagogy.

Outcomes: Students will demonstrate a working knowledge of child development in relationship to age-appropriate dance skills as well as behavioral expectations. They will develop strategies that address the sequences of skill acquisition as well as concrete strategies for classroom management.

Components: Lecture(In person) Requirement Group: Must be a dance major or minor Room Requirements: Studio - Fine Arts(1) DANC 394(1 - 6)

DANC 370(3) Course ID:011169 01-JAN-2016 Department Consent Required Dance Composition: DANC Capstone

Prerequisite: Must be a Dance Major or Dance Minor to enroll. Placement in Level III or higher dance technique courses. Permission of the department required.

This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.

Learning Outcomes: Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience.

DANC 398(1 - 3) Research in Dance

Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.

Must be a declared dance major or minor to enroll.

Outcomes: Students will learn discipline-specific language skills, research ethics and methodologies. Students will gain valuable skills disseminating research through performances, scholarly articles, Components: Supervision(In person) Attributed: Franced Lowring

FNAR 115(3) Course ID:003047 15-JUN-2015

An introduction to the equipment, processes and aesthetics of photography as an art form and visual communication. Covering camera operation, exposure meter, lens characteristics, file management, image corrections, and inkjet printing. Equally emphasized are photographic aesthetics, photography as communication, individual expression, and visual literacy.

A fully adjustable digital camera is required.

Outcomes: Apply knowledge of camera and editing to creative and expressive ends; visually demonstrate an understanding of subject, aesthetics, form, and content; formulate critical judgments and communicate those ideas to others.

 Components:

The Crafts of China

FNAR 160(3)

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historicakl trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.

Outcome: Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

Components: Lecture Course Equivalents: ASIA 160

Requirement Group: Restricted to Beijing Students

FNAR 170(3) Course ID:009843 01-JAN-2016

Three-Dimensional Design An examination of the basic elements and organizational systems of spatial expression through the application of design principles and theory.

Outcome: Students will be able work with a variety of materials to produce three-dimensional objects in space, and understand how to control the viewer;s reaction to those objects through the manipulation of solidity, transparency, movement and time.
Components: Lecture

Room Requirements: Studio - Fine Arts(1)

FNAR 190(3) Color Theory Prerequisite: majors only

An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, and symbolic dimensions through the application of past and current theory.

Course ID:003061

Outcome: Students will be able to manipulate color papers, paints and inks in a series of specific exercises that explore the many aspects of color to the end of understanding how color influences human reactions to information and products.

FNAR 234(3) Course ID:012532 01-JAN-2016 Digital Media II: Vector An exploration of vector illustration using Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression. Outcomes: Students gain an understanding of software skills and design basics. They develop the ability and techniques to manipulate software in the production of artistic compositions effectively combining image and typography. Components: Lecture(In person) Attributes: Film & Digital Media Studies, International Film & Media Studies Room Requirements: Lab - Computer(1) Course ID:003083 FNAR 235(3) 01-JAN-2016 Figure Studio Prerequisite: FNAR 113 or FNAR 114 or permission of the instructor An advanced level studio course designed to introduce the human form with an emphasis on the application of drawing and wet media. Skeletal anatomy and concepts of visualization and proportion will be explored. Observational and conceptual problems will be introduced.. The course may be taken twice for credit. Outcome: Students will be able to demonstrate an understanding of the human form and anatomy through expanded practice and articulation of both formal and artistic ideas. Components: Lecture Course Equivalents: THTR 235 Room Requirements: Studio - Fine Arts(1) Course ID:003085 01-JAN-2016 FNAR 251(3) African-American Art An introduction to the achievements of Americans of African descent beginning with African roots through the Harlem Renaissance to the contemporary work of such internationally recognized artists as Richard Hunt and Martin Puryear. Content may vary according to the particular focus of the instructor. Outcome: Students will be able to demonstrate knowledge of the richness of African-American visual arts as they developed within and outside the purview of traditional art venues. Components: Lecture Course Equivalents: AFR 251 African Studies and the African Diaspora, Black World Studies Attributes: Room Requirements: General Classroom(1) Course ID:003086 01-JAN-2016 FNAR 260(3) The Art of Bookbinding An introduction to the basic methods of bookbinding exploring traditional and one-of-a-kind artists books. Sewn, glued and free form structures will form the basis for the study of image and text within the framework of a personal approach to alternative surfaces. Outcomes: Students will be able to construct and manipulate a wide variety of media using the grammar and language of the book form. Through selected projects students will utilize compositional elements and descriptive to communicate ideas and concepts in book form. Components: Lecture Room Requirements: Studio - Fine Arts(1) 01-JAN-2016 FNAR 304(3) Course ID:009846 Paris in the Nineteenth Century An examination of Nineteenth Century art in Paris as shaped by contemporary changes in the physical, social and economic life of the city. Outcome: Students will be able to demonstrate knowledge of nineteenth century art and artists in the context of the emergence of a modern, industrial urban complex. FNAR 305(3) Course ID:003090 01-JAN-2016

An examination of American painting, sculpture, and architecture from the colonial period to the period immediately following World War II. Emphasis is placed on the development of specifically American art forms as they evolved from their dependency upon European sources.

Outcome: Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the earliest days of the Republic when Europe served as a source of training and inspiration to the beginnings of modern times when global developments shifted the focus of artistic inspiration to New York. **Components:** Lecture

Room Requirements: General Classroom(1)

FNAR 306(3) Course ID:003091 01-JAN-2016

Contemporary Art 1945-Present

An examination of recent developments in American and European art beginning with the physical shift of the center of artistic authority from Paris to New York during and immediately after World War II.

Outcome: Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the mid-twentieth century to the present day. They will also understand the major theoretical issues of the period.

Components: Lecture Room Requirements: General Classroom(1)

FNAR 311(3)Course ID:00309201-JAN-2016Std Wrkshp Advn Draw & PaintngPrerequisite: FNAR 213 or FNAR 214 or equivalent

The most advanced level studio course in painting and drawing and is designed to aid the student in developing a body of creative work from conception to production to presentation. This course is conducted as an individual studio practicum between the instructor and student. The course may be taken twice for credit.

Outcome: Students will demonstrate a strong understanding of their own creative process through the development of a cohesive body of work.

Components: Lecture Room Requirements: Studio - Fine Arts(1)

Course ID:003093 01-JAN-2016

Course ID:003094

Design III Prerequisite: FNAR 170

FNAR 312(3)

An application of two- and three-dimensional principles and methodologies to advanced studio projects in fine and applied areas.

Outcomes: Students will be able to develop a series of multi-dimensional structures that utilize planar and spatial techniques to communicate a body of information and sensory experiences to others. Components: Lecture Room Requirements: Studio - Fine Arts(1)

01-JAN-2016

FNAR 314(3) Painting III Prerequisites: FNAR 114 and 214

An advanced level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114 and expanded in FNAR 214. This course will explore a range of painting materials and substrates. Emphasis is placed on critique and the development of conceptual problems to build technical, perceptual, and personal expressive interpretation. Outcome

Students will develop a body of work through expanded practice and articulation of both formal and artistic ideas.

FNAR 316(3) Course ID:003096 01-JAN-2016

This course for the serious student of photography expands upon previous film and darkroom courses and covers the use of medium and large format cameras, 19th century and alternative printing techniques, digital transparencies for contact printing, archival processing, and print finishing techniques. This course encourages students to synthesis all aspects of photography in the effort to create a cohesive portfolio of work. A fully adjustable SLR film camera is required. Photography: Film and Darkroom (FNAR 215) is a prerequisite.

Outcomes: Students will be able to demonstrate an advanced understanding and application of film exposure and development; develop proficiency with medium and large format cameras and their various printing possibilities; and produce a cohesive series of photographic works that integrate technical, formal and **Components:** Lecture(In person)

Course ID:003097 01-JAN-2016 FNAR 318(3) Printmaking TTT Prerequisite: FNAR 218 A continued exploration of Printmaking I, II which enables the student to enhance technical and conceptual skills in printmaking mediums. Outcome: Through selected projects students will demonstrate knowledge of contemporary trends in printmaking including new digital media and photomechanical processes. They will acquire analysis skills and functional critical knowledge of the grammar and language of prints. Components: Lecture Room Requirements: Studio - Fine Arts(1) FNAR 319(3) Course ID:011522 01-JAN-2016 Lighting Techniques Prerequisite: FNAR 219 This course introduces the advanced photography student to studio and location lighting with tethered digital capture. This course refines and expands digital imaging skills learned in previous courses with an emphasis on workflow and professional quality output as it specifically applies to studio and location lighting. A fully adjustable digital SLR camera is required. Photography: Digital Imaging (FNAR 219) is a prerequisite, concurrent enrollment is acceptable. Outcome: Students demonstrate advanced understanding and application of digital photographic technology; develop proficiency in studio lighting and digital capture; and produce a cohesive series of photographic Components: Lecture(In person) Requirement Group: Prerequisite: FNAR 219 Room Requirements: Studio - Fine Arts(1) FNAR 322(3) Course ID:009859 01-JAN-2016 Sculpture & Ceramics III: Advanced Studio Prerequisite: FNAR 222 or FNAR 224 (prerequisite) An advanced studio course in which students investigate an expanded range of materials, techniques and concepts, towards further development of a personal approach to Ceramics and Sculpture. Visual and written research is a component of the course, as is personal reflection and group discussion. Outcomes: Demonstrate the ability to select and apply appropriate materials and methods to resolve complex visual and conceptual concepts; and meaningfully discuss key issues pertaining to the subject. Lecture(In person) Components: Requirement Group: Prerequisite: FNAR 222 or 224 Room Requirements: Studio - Fine Arts(1) FNAR 332(3) Course ID:003103 01-JAN-2016 Visual Communication III Prerequisites: FNAR 232 and portfolio accepted or permission of instructor.

A continued study of the principles underlying graphic design combined with an emphasis on the communicative power of typography and image.

Outcome: Students gain an understanding of how contemporary design is used to communicate. They begin to develop a sophisticated body of work and advance in their ability to evaluate visual communication.

FNAR 359(3) Course ID:009855 01-JAN-2016 Japanese Art and Culture An examination of the cultural background and major art forms of Japan from earliest times until the twentieth century. Outcome: Students will demonstrate knowledge of the philosophical and religious sources of the major art forms of Japan. They will recognize the dual formative influences of indigenous traditions and those of foreign origin in what becomes a uniquely Japanese adaptation and resolution of ideas expressed effectively either verbally or visually. Components: Lecture(In person) Course Equivalents: ASIA 359 Attributes: Asian Studies, International Studies Room Requirements: General Classroom(1) FNAR 360(3) Course ID:009861 01-JAN-2016 Picturing Women in Renaissance and Baroque Art An examination of issues related to women, art, and society in early modern Europe (15th-17th centuries) through a study of women as subject matter, viewers, producers, and patrons of art. A multi-disciplinary approach is employed to explore how gender as a social, political, and psychological category is reflected in and reinforced by visual culture. Outcome: Students will demonstrate knowledge of the ways gender is constructed in society, the origins and effects of gender attitudes, the interrelation between gender and visual culture, and the ways women have claimed agency. Students will critically analyze visual culture and gender attitudes and demonstrate knowledge of feminist theory and scholarly methods. Components: Lecture(In person) Course Equivalents: WOST 360, WSGS 360 European Studies, Women & Gender Studies Attributes: Room Requirements: General Classroom(1) FNAR 364(3) Course ID:012533 01-JAN-2016 History of Graphic Design A survey of the evolution of graphic communication from prehistory through postmodern design and the digital revolution. Outcomes: Students will demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of graphic communication in relation to its social-historical context. Components: Lecture(In person) Room Requirements: Electronic Classroom(1) FNAR 365(3) Course ID:003122 01-JAN-2016 History of Photography A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events. Outcome: Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present. Components: Lecture Course Equivalents: ICVM 365 Film & Digital Media Studies, International Film & Media Studies Attributes: Room Requirements: General Classroom(1) FNAR 367(3) Course ID:003125 01-JAN-2016 History of Architecture An examination of the history of the built environment from the earliest known forms to contemporary examples, in terms of architectural theory, structural realities and socio-cultural usages.

Outcome: Students will be able to demonstrate an understanding of the many ways architecture serves the human race, and be able to constructively analyze the specific functions buildings serve within their particular cultural temporal milieu.

MUSC 122(3) Course ID:013235 15-JUN-2016

Introduction to Digital Music Computers and digital tools have been seeping into the world of music, and this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition. Prerequisites: MATH 118 or equivalent (COMP 150 is preferred)

Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments. Components: Lecture(In person) Course Equivalents: COMP 122 Requirement Group: Prerequisite: MATH 118 Room Requirements: Lab - Computer(1)

MUSC 142(3) Course ID:009593 01-JAN-2016

For the student who has never had voice instruction and is interested in learning the art of vocal performance. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach in elementary school.

Course ID:005453

Outcome: A basic vocal ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music.

 Components:
 Lecture(In person)

 Course Equivalents:
 THTR 142, THTR 242

 Attributes:
 CORE PRE-2012 Artistic Knowledge and Experience, Artistic Knowledge and Experience

Music Theory I Co-requisite: MUSC 145.

MUSC 144(3)

Class Voice for Beginners

An introduction to the fundamentals of melodic construction in all the diatonic modes (major/minor and modal) and culminates in control of two-part counterpoint. Melodies will be examined and broken down into their essential components. The class strengthens the basic musicianship skills of the student through performance of the students' written compositions illustrating the class concepts. Must be taken concurrently with MUSC 145.

01-JAN-2016

Outcome: Through the study of melody students will develop an understanding of musical notation, the organization and color of all diatonic scales (major/minor and modal), interaction between intervals, transposition and its implications, rythmic and beat structure, and begin developing critical analysis **Components:** Lecture(In person)

Requirement Group: The co-requisite for MUSC 144 is MUSC 145. Room Requirements: Music Room(1)

MUSC 145(1) Course ID:010311 01-JAN-2016

Musicianship Lab I Co-requisite: MUSC 144.

This course reinforces concepts presented in Music Theory I and introduces students to the basic concepts of sight singing, ear training and dictation. The voice is the class's primary focus. This course must be taken concurrently with MUSC 144.

Learning Outcomes: Recognize Music Theory I concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano. Apply these concepts to student's primary instrument. Components: Lecture(In person)

Room Requirements: Studio - Fine Arts(1)

MUSC 153(3) Course ID:010788 01-JAN-2016 The Music of China

This course surveys the broad range of Chinese musical traditions as well as the practice of fieldwork, music theory and methdological issues encountered in Chinese music studies.

Outcome: Students will identify Chinese musical traditions throughout history and their connections to the Chinese language, history, cultural and religious studies and politics.

Components: Lecture

Requirement Group: Restricted to Beijing Students

MUSC 244(3) Course ID:005463 01-JAN-2016

Music Theory II Co-requisite: MUSC 245; Prerequisite: MUSC 144

An introduction to the fundamentals of harmonic progressions controlled through either expansions of a tonic-dominant phrase structure, elaborations of two-part counterpoint structures, or control of the three basic root motion models. Music will be analyzed using chord matrixes and reductions into two-part frameworks. The class strengthens the basic musicianship skills through performance students compositions illustrating the class concepts. Must be taken concurrently with MUSC 245.

Outcome: Through the study of harmony students will develop an understanding of all chord types, root motion, cadence types, how tonal music expands upon the basic tonic-dominant phrase, voice leading techniques, and **Components:** Lecture(In person)

Requirement Group: The co-requisite for MUSC 244 is MUSC 245. Room Requirements: Music Room(1)

MUSC 245(1) Course ID:010323 01-JAN-2016 Musicianship Lab II Co-requisite: MUSC 244. Students build on basic voice and board skills acquired in Musicianship Lab I and reinforce concepts introduced in Music Theory II by recreating the concepts on the keyboard and voice. This course must be taken concurrently with MUSC 244. Learning Outcomes: Recognize Music Theory II concepts by ear, dictate accuratley those concepts, and recreate them on the voice and piano. Apply these concepts to student's primary instrument. Components: Lecture(In person) **Room Requirements:** Music Room(1) MUSC 246(3) Course ID:010815 01-JAN-2016 Composition I Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance. Outcome: Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions. Components: Lecture(In person) Attributes: Engaged Learning Req. Designation: Public Performance Room Requirements: General Classroom(1) MUSC 247(3) Course ID:011172 01-JAN-2016 Composition II Prerequisite: MUSC 246. This course deals with the study of melody, counterpoint, harmony, and shorter forms. In addition to the study of theory and form, students compose an original piece of music for two instruments that is presented professionally at a public performance. Outcome: Through the study of related scores and with the supervision of instructor, students compose an original work for violin and piano or violoncello and piano. Components: Performance(In person) **Room Requirements:** Music Room(1) Course ID:012247 09-APR-2012 MUSC 248(3) Jazz Composition and Arranging Prerequisite: MUSC 144 A study of the harmonic, melodic, and rhythmic theories that lead to the ability to compose and arrange in the jazz idiom. Emphasis will be placed on common harmonic progressions, scale / chord relationships, melody, song forms, and extended harmony and reharmonization. Students will also learn the basic principles of arranging and music notation, culminating in a final composition and arranging project for jazz quintet.

Outcomes: The ability to compose and arrange music for small jazz combos of up to two horns plus rhythm section.

Components:Performance(In person)Requirement Group:Prerequisite: MUSC 144Room Requirements:Music Room(1)

THTR 100(3) Course ID:007060 01-JAN-2016 Intro to Theatre Exp This course is an introductory study of the theatrical art form and its contemporary production practice. Students engage in a series of workshops and participatory creative projects. Outcome: Students will demonstrate the ability to identify the variety of collaborating arts and artists that combine to create of a work of theatre; to analyze a play script for live performance; to evaluate theatrical production; and to creatively apply knowledge of theatrical process through expressive and creative endeavors. Components: Lecture Attributes: CORE PRE-2012 Artistic Knowledge and Experience, Artistic Knowledge and Experience Room Requirements: General Classroom(1) THTR 100D(0) Course ID:011186 01-JAN-2016 Intro to Theatre Experience - Discussion Components: Discussion(In person) Room Requirements: Electronic Classroom(1) Course ID:009903 01-JAN-2016 THTR 111(2) Ballet I: Introduction to Ballet Dance Theories and Techniques Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student;s body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance. Outcome: Students will improve their posture, flexibility and coordination. They will develop a reference for enjoying ballet performances and create a foundation for further dance training. Components: Lecture(In person) Course Equivalents: DANC 111 CORE PRE-2012 Artistic Knowledge and Experience Attributes: Room Requirements: Lab - Theater(1) THTR 121(2) Course ID:009902 01-JAN-2016 Modern Dance I: Introduction to Modern Dance Theories and Techniques Modern Dance I is designed to increase student;s body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey. Outcome: Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet. The will understand the history of the development of modern dance as a uniquely American art form. Lecture(In person) Components: Course Equivalents: DANC 121 Attributes: CORE PRE-2012 Artistic Knowledge and Experience Room Requirements: Lab - Theater(1) THTR 130(3) Course ID:010796 01-JAN-2016 Introduction to Martial Arts This course introduces the student to Chinese Wushu. Two forms of Wushu will be selected for in depth study each semester. Students will explore the origins of the sports studied and their importance to Chinese culture and philosophy while learning the specific physical techniques. Outcome: Students will improve their balance, flexibility and coordination while learning the basic moves of two forms of Wushu. They will develop a reference for appreciating th eplace of Wushu in Chinese culture and create a foundation for further Wushu training. Components: Lecture Course Equivalents: ASIA 130 Requirement Group: Restricted to Beijing Students THTR 131(2) Course TD:009904 01-JAN-2016 Jazz I - Introduction to Jazz Dance Theories and Techniques Jazz I is designed to increase the student¿s body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. Outcome: Students will improve their strength, coordination, flexibility and correct posture. They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions. Components: Lecture(In person) Course Equivalents: DANC 131 CORE PRE-2012 Artistic Knowledge and Experience Attributes:

Introduction to Opera

Class Voice for Beginners

Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.

Outcome: Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions.

Lecture(In person) Components: Course Equivalents: MUSC 154R, MUSC 154 Room Requirements: Music Room(1)

Dramatic & Theatrical Process

THTR 203(3)

This course is an introduction to the basic methods of analyzing and interpreting plays representative of the modern stage (from Ibsen to the present). It explores how text analysis is, for all theatre artists, a critical first step in transferring the printed play text to the stage.

Outcome: Students will acquire the ability to analyze a play's structure and ideational content, its characters, and the potential challenges each play presents to theatre artists seeking to produce the play on the stage for a modern audience.

Components: Lecture **Room Requirements:** General Classroom(1)

> Course ID:007062 15-JUN-2016

THTR 204(3) Playwriting

This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure. Prerequisite: THTR 100 or THTR 203

Outcome: Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play.

Components: Lecture Engaged Learning, Film & Digital Media Studies, International Film & Media Studies Attributes: Requirement Group: Prerequisite: THTR 100 or THTR 203 Req. Designation: Public Performance Room Requirements: General Classroom(1)

THTR 205(3) Course ID:007063 01-JAN-2016 Theatre in Chicago I

This course is an introductory to live theatre performances available in the rich Chicago Theatre Scene.

Outcome: Students will demonstrate appreciation of the range of theatre experiences available in the city of Chicago.

Components: Lecture Room Requirements: General Classroom(1)

Theatre in Chicago II

THTR 207(3) Course ID:007065 01-JAN-2016

Theatre in Chicago II follows the same format as Theatre in Chicago I. This course enables students to repeat the course for credit, extending experience and application of critical terminologies and analytical frameworks to attendance of additional live theatre performances in the city of Chicago.

Outcome: This course extends outcomes for THTR 205 by application to a broader range of experience in live theatre attendance.

THTR 209(3) Course ID:010550 01-JAN-2016 Screenwriting This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and story-telling fundamentals, writers develop a working sense of the paradigm and the art of dramatic writing. Extensive writing requirements cover all aspects of screenwriting, culminating in the development of a workable screenplay. Outcome: Students will demonstrate an understanding of the fundamentals of screenwriting through the completion of various writing exercises and the creation of a screenplay. Components: Lecture(In person) Course Equivalents: COMM 326 Room Requirements: General Classroom(1) THTR 212(2) Course ID:009905 01-JAN-2016 Ballet II: Continuing Ballet Dance Theories and Techniques Prerequisite: THTR 111 or permission of the instructor. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form. Outcome: This class further develops strength, posture, flexibility and coordination. Progressions include more work en releve; at the barre, development of leg extensions, single leg jumping and more complex movement combinations. Students will develop awareness of a dancer¿s role in a ballet production. Lecture(In person) Components: Course Equivalents: DANC 212 Room Requirements: Lab - Theater(1) THTR 222(2) Course ID:009901 01-JAN-2016 Modern Dance II - Continuing Modern Dance Theories and Techniques Prerequisite: THTR 121 or permission of the instructor. This course is designed to further increase student;s body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. Outcome: Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations. Components: Lecture(In person) Course Equivalents: DANC 222 Room Requirements: Lab - Theater(1) THTR 227(3) Course ID:009900 01-JAN-2016 Stage Management This course explores the role of the stage manager in theatrical production from pre-production through closing documentation.

Outcome: Students will demonstrate understanding of the responsibilities and duties of a Stage Manager to a production; develop the necessary communication and organizational skills to fulfill these responsibilities in a production experience; and be exposed to various techniques and tools used in professional stage management.

Components: Lecture(In person) Requirement Group: Prerequisite: THTR 100 or THTR 203 Room Requirements: General Classroom(1)

THTR 232(2) Course ID:009906 01-JAN-2016 Jazz II - Continuing Jazz Dance Theories and Techniques Prerequisite: THTR 131 or permission of the instructor.

Jazz II is designed to further develop student;s ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance.

Outcome: Students will improve their dance technique, performance skills and appreciation of Chicago¿s rich tradition of Jazz dance performance. Lecture(In person) Components: Course Equivalents: DANC 232 Room Requirements: Lab - Theater(1)

THTR 349(3) Studies in Dramatic Criticism

Course ID:007105

01-JAN-2016

This course studies the various criteria which different ages and cultures have used to evaluate drama and its performance, from the Greeks to the present.

Outcome: the student will gain an historical perspective on the process of evaluation of drama and its performance in many diverse cultures. This will help the student to assess present day western evaluative criteria for drama and its performance more objectively.

Components: Lecture Requirement Group: Prerequisite: THTR 203 Room Requirements: General Classroom(1)

Course TD:013239 15-JUN-2016

THTR 355(3) Sound Design I

This course is an introduction to the principles of sound design with and emphasis on theatrical performance. The student will develop a process for approaching sound design, and for expressing their concept and intention in a collaborative and presentation setting. Prerequisite: THTR 252

Outcomes: The student will develop a process by which to approach sound design as well as an understanding of equipment and control of theatrical sound production.

Lecture(In person) Components: Requirement Group: Prerequisite: THTR 252 Room Requirements: Lab - Theater(1)

Course ID:013240 15-JUN-2016

THTR 356(3) Sound Design II

This course is a continuation of work begun in THTR 355: Sound Design I. The student will develop a process for approaching sound design, and for expressing their concept and intention in a collaborative and presentation setting. Prerequisite: THTR 355 Sound Design I

Outcome: The student will develop a process by which to approach sound design as well as an understanding of equipment and control of theatrical sound production. Components: Lecture(In person) Requirement Group: Prerequisite: THTR 355 Sound Design I Room Requirements: Lab - Theater(1)

THTR 369(3) Course ID:007111 15-JUN-2016 Acting Theories and Techniques IV Prerequisite: THTR 267 This course continues the work of THTR 368 based on the needs of the students. Performance material is at discretion of the instructor. Outcome: Students will further develop performance skills and workshop areas of eakness based on individual needs and interests. Performance(In person) Components: Requirement Group: Prerequisite: THTR 267 **Room Requirements:** Lab - Theater(1) THTR 371(3) Course ID:007112 01-JAN-2016 Stage Design I Prerequisite: THTR 252 This course introduces the student to the role of the scenic designer and the process of script analysis, period research and graphic communication utilized to develop a scenic design with a focus on how collaborative interaction may inform those choices. Outcome: The student will develop a systematic approach to the scenic designer;s creative process and demonstrate the ability to communicate a scenic idea through the practice of sketches, ground plans and scale models. Lecture Components: Room Requirements: General Classroom(1) THTR 372(3) Course ID:007113 01-JAN-2016 Stage Design II Prerequisite: THTR 371 This is an advanced course in the development of the scenic designer;s creative process, skills, and techniques. Outcome: Student will further develop the skills required of a scenic designer and develop a diverse design portfolio. Components: Lecture Room Requirements: General Classroom(1) THTR 375(3) Course ID:007114 01-JAN-2016 Play Direction: THTR Capstone Prerequisite: THTR 203, 252, 266, 267, 364, 365, 366 and 367, or 375 may be taken concurrently with THTR 367. This course explores the fundamental principles of play direction. Students are required to direct a monologue, select a play script for production, develop a production concept, stage a fifteen-minute scene, and develop a detailed Director's Notebook. Outcome: Students acquire the skills to identify the basic elements of stage direction; analyze a play script from the point of view of the director; articulate and defend a production concept; develop actor-coaching skills; and identify elements of direction that communicate story, theme, and concept. Components: Performance(In person) Attributes: Engaged Learning Room Requirements: Lab - Theater(1) THTR 376(3) Course ID:007115 01-JAN-2016 Advanced Play Direction Prerequisite: THTR 375 This intensive lecture-performance course will expand on principles and practices of play direction covered in THTR 375, with particular emphasis on staging, spatial dynamics, and collaboration with design artists. Outcome: Students acquire the skills to place current trends in Directing in historical and theoretical

context; articulate a personal artistic mission in relation to the Directing in historical and theoretical concept for production; and translate conflict, story, and theme to practical application in ground-plans, staging, actor-coaching, and design choices.

Shakespeare Seminar

This course provides a capstone seminar experience for students, focusing on how Shakespeare has been interpreted on the page and the stage. It will culminate with a thesis project, either scholarly or creative, that will serve as the capstone for the Shakespeare Studies Minor.

Prerequisites: ENGL 326, THTR 365, and 9 credit hours for electives in the minor

Outcomes: Students will engage in advanced scholarly work in Shakespearean Studies towards development of a scholarly thesis or significant project. Components: Seminar(In person) Attributes: Shakespeare Studies

Requirement Group: Prerequisites: ENGL 326, THTR 365, and 9 credit hours of electives in the minor **Room Requirements:** Classroom Not Needed(1)

THTR 394(1 - 6) Course ID:011178 01-JAN-2016 Department Consent Required

Internship in Theatre

Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may e applied to the major.

Outcome: Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses.

College of Arts and Sciences - English - Subject: English

ENGL 282C(3) Course ID:012021 15-JUN-2014 African-American Literature since 1900 This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material since 1900. Outcome: Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods. Lecture(In person) Components: Course Equivalents: ENGL 282, AFR 282, ENGL 282B Attributes: CORE PRE-2012 Literary Knowledge and Experience, African Studies and the African Diaspora, Black World Studies Room Requirements: Electronic Classroom(1) ENGL 283(3) Course ID:002585 01-AUG-2012 Women in Literature Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures. This course focuses on the representation of women in literature, as discussed in a variety of literary works. Outcome: Students will be able to demonstrate understanding of the representations of women in various periods of literary history and diverse cultural contexts. Lecture Components: Course Equivalents: WOST 283, WSGS 283 Attributes: CORE PRE-2012 Literary Knowledge and Experience, Tier 2 Literary Knowledge, Women & Gender Studies Room Requirements: General Classroom(1) ENGL 285(3) Course ID:002587 15-MAR-2006 Introduction to Tragedy This course introduces students to the genre of dramatic tragedy through the study of classical and contemporary plays and such playwrights as Marlowe, Shakespeare, O;Neill, and Miller. Outcome: Students will be able to recognize and discuss some of the elements that determine whether a play is or is not a tragedy, and will be able to describe the importance of genre to the interpretation of drama. Components: Lecture Room Requirements: General Classroom(1) ENGL 286(3) Course ID:002588 15-MAR-2006 Introduction to Comedy This course introduces students to literary works which may be defined as comedy: that is, works that begin in difficulty but end happily, and works which produce laughter in their audiences. Texts may include novels, poems, plays, and film. Outcome: Students will be able to recognize and discuss some of the elements that determine whether a work is or is not a comedy, and will be able to describe the importance of genre to the interpretation of comic works. Lecture Components: Room Requirements: General Classroom(1) Course ID:011115 ENGL 287(3) 15-JUN-2014 Religion and Literature Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures. This course introduces the study of literature and religion as a contemporary field of inquiry. It aims to explain and illustrate the nature and theoretical strategies of a religious literary criticism, and to encourage an appreciation of this valuable and productive way of reading. Outcome: Students will be able to use the technical vocabulary necessary for discussing literary representations of religious and spiritual experience. Lecture(In person) Components: Attributes: CORE PRE-2012 Literary Knowledge and Experience, Tier 2 Literary Knowledge, Catholic Studies Room Requirements: Electronic Classroom(1)

College of Arts and Sciences - English - Subject: English

26-OCT-2007 ENGL 300(3) Course ID:002598 History of English Language Study of the origin and development of English: its sounds, word-forms, and syntax. Outcome: Students will demonstrate knowledge of the history of English and some understanding of linguistic theory. Components: Lecture Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) ENGL 302(3) Course ID:002600 26-OCT-2007 Structure of American English This course focuses on the study of American English, including modern grammars, theories of usage, and linguistic geography. Outcome: Students will be able to demonstrate knowledge of the unique characteristics of American English, and of the functions and effects of variations in American speech and writing. Components: Lecture Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) Course ID:002601 26-OCT-2007 ENGL 303(3) Grammar: Principles & Pedagogy A study of English grammar focusing on linguistic applications such as the teaching of Standard American English to native and non-native speakers, to speakers of Ebonics, and other classroom applications. Required for students planning to teach high school English, but open to others. Outcome: Students will demonstrate understanding of grammar and sentence structure sufficient to teach them. Components: Lecture Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) Course ID:002603 26-OCT-2007 ENGL 305(3) Survey of British Literature II This course serves as an introduction to the study of British literature from the early 18th century to the present. Authors studied will vary, depending on the instructor. Outcome: Students will receive training in the understanding, appreciation, and criticism of works of Restoration, eighteenth century, Romantic, Victorian, and modern cultures. Lecture Components: Course Equivalents: ENGL 298 Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) ENGL 306(3) Course ID:002604 01-APR-2011 Studies in Women Writers This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from any literary period. Outcome: Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature. Components: Lecture Course Equivalents: WOST 306, WSGS 306, ENGL 306A, ENGL 306B, ENGL 306C Women & Gender Studies Attributes: Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. 26-OCT-2007 ENGL 309(3) Course ID:002607 Trish Literature This course focuses on the study of one or more topics in Irish literature as defined by the subtitle each time the course is offered. Outcome: Students will be able to engage in close readings of Irish literary texts and demonstrate understanding of the particular significance of Irish literature for literary studies. Components: Lecture Course Equivalents: ENGL 349 Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) Course ID:002608 26-OCT-2007 ENGL 310(3) Advanced Writing: This is a course in writing clear and effective prose in whatever form/genre is being studied; the subtitle will define the form/genre more precisely. Outcome: Students will gain an understanding of the principles involved in writing clear and effective prose in whatever form/genre is under study, and be able to apply these principles to their own writing in this form/genre. Components: Lecture Course Equivalents: ENGL 210 Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1) ENGL 311(3) Course ID:002609 22-MAR-2013 U.S. Latino/a Literature Prerequisites: UCWR 110 plus one 200-level ENGL course. Students will study literature by U.S. Latino and Latina writers (esp. Mexican American, Puerto Rican, Dominican American, and Cuban American). Readings will highlight the variety of aesthetic styles and cultural points of view that characterize this rapidly growing field. Issues like language (bilingualism, translation, and code-switching), immigration, nationalism, transnationalism, and citizenship will be especially important. Outcomes: Students will develop analytical tools, culturally-specific terms, and critical questions to help them to interpret and to write about Latino/a literature. Components: Lecture(In person) Attributes: Latin American Studies Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: Electronic Classroom(1) ENGL 312(3) Course ID:002610 15-JUN-2014 Studies in World Literature in English Pre-requisites: UCWR 110 and a 200-level English course This course adopts a transnational, trans-historical approach to Anglophone world literatures. Readings may include global, postcolonial, and/or diasporic literatures in English. Outcome: Students will develop analytical tools, culturally-specific terminology, and critical questions to enable them to interpret and formulate arguments about global English-language literatures. Components: Seminar(In person) Course Equivalents: INTS 312, ENGL 312A, ENGL 312B, ENGL 312C International Studies Attributes: Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: Electronic Classroom(1) ENGL 312A(3) Course ID:012025 26-MAY-2011 Studies in World Literature in English before 1700 This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers before 1700. Outcome: Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English. Lecture(In person) Components: Course Equivalents: INTS 312, ENGL 312B, ENGL 312C, ENGL 312 **Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course. **Room Requirements:** Electronic Classroom(1)

Border Literatures

ENGL 313(3)

This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures will vary, and may include Hispanic-American writers, the Caribbean poet, Derek Walcott, and other literatures that move between disparate locations (England, India, Africa, Burma, etc.).

Outcome: Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts.

Components: Lecture Course Equivalents: ENGL 313A, ENGL 313B, ENGL 313C Attributes: International Studies Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: General Classroom(1)

ENGL 313A(3)

Border Literature before 1700

Course ID:012028 26-MAY-2011

This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures before 1700 will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).

Outcome: Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts.

Lecture(In person) Components: Course Equivalents: ENGL 313B, ENGL 313C, ENGL 313 Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. **Room Requirements:** Electronic Classroom(1)

Studies in Postmodernism

ENGL 350(3)

Prerequisites: UCWR 110 and any 200-level English course

Postmodernism, as an aesthetic response to postmodernity, is an interdisciplinary concept, originating in architecture and encompassing literature, art in various media, digital media, and literary and cultural theory. Focusing primarily on Western literature and theory after WWII, this course investigates postmodernism as a literary period, an aesthetic style, an historical moment, and a cultural problematic.

Outcomes: Students will learn how the term ""postmodernism"" functions as a literary period, an aesthetic style, an historical moment, a cultural problematic, as well as a theoretical imperative. Lecture(In person) Components: Requirement Group: Pre-requisite: UCWR 110 and one 200-level English course. Room Requirements: Electronic Classroom(1)

ENGL 351(3)

Contemporary Literature Contemporary literature is most often defined as literature produced after WWII. This course explores the challenge of defining ¿contemporary¿ literature by reading a range of texts from the period in their aesthetic, social, historical, and cultural contexts.

15-JUN-2014

26-OCT-2007

26-OCT-2007

Outcome: Students will learn critical and analytical tools for reading contemporary literature. Components: Lecture(In person) Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. Room Requirements: Electronic Classroom(1)

Course ID:002637

Course ID:002639 26-OCT-2007 ENGL 354(3)

Contemp Critical Theory

This course, which is required of all English majors, introduces students to critical terminology and to issues in contemporary criticism and theory. Readings may include critical works that have informed and established formalist, feminist, psychoanalytic, and Marxist approaches to literary analysis, as well as those associated with gender studies, cultural studies, postcolonialism, and deconstruction.

Outcome: Students will be able to demonstrate knowledge and understanding of significant texts and theories relating to issues in contemporary criticism. Components: Lecture Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course.

Room Requirements: General Classroom(1)

Studies in Literary Criticism

Intensive study of specific topics in the field of literary criticism and theory.

Course ID:002640

Course ID:002641

Outcome: Students will be able to demonstrate an understanding of significant works in the designated field, and will be able to discuss relevant theoretical and critical perspectives. Components: Lecture

Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course. **Room Requirements:** General Classroom(1)

ENGL 356(3)

History of Rhetorical Theory

ENGL 355(3)

This course is an historical survey of major trends and figures in rhetorical theory. Rhetoric will be studied as a theory of the use of language to create responses in an audience, and as a theory of discourse alongside literary theory and philosophy.

Students will become familiar with: major trends and figures in the history of rhetorical theory; Outcome: areas of intersection between rhetorical theory and other kinds of discourse concerned with the nature and effect of language (and possibly other media), especially within philosophy and literary theory; selected theories concerning the social and political force of rhetoric.

College of Arts and Sciences - European Studies - Subject: European Studies

Course ID:013063 15-JUN-2015 EURO 101(3)

Introduction to European Studies This course serves as an introduction to the interdisciplinary field of European studies. It provides an overview of the major disciplines represented in the program, introduces the main approaches covered in the program, and discusses some of the most important topics involving European states, regions, and the European Union.

Restricted to European Studies minors.

Outcomes: Students will gain a basic understanding of how different disciplines contribute to the study of Europe at the state, sub-state and supra-state levels. Components: Lecture(In person) European Studies Attributes: Requirement Group: Restricted to European Studies Minors. Room Requirements: Electronic Classroom(1)

Course ID:013064 15-JUN-2015

European Studies Capstone

EURO 301(3)

This capstone class is intended to provide seniors a chance to reflect on what they have learned as European Studies minors by focusing on a particular theme. The class takes an interdisciplinary and cross-national approach. Students develop a major research project.

Restricted to Juniors and Seniors minoring in European Studies.

Outcomes: Through this course students will gain an understanding of the ways in which various fields and their approaches to European Studies can help answer specific important questions about the region.

Components: Lecture(In person) Attributes: European Studies Requirement Group: Must be a European Studies minor. Restricted to juniors and seniors. Room Requirements: Electronic Classroom(1)

College of Arts and Sciences - Fine Arts - Subject: Fine Arts

FNAR 116(3) Course ID:003048 15-MAR-2006 Color Slide Photography A non-darkroom, introductory course to the equipment, techniques and aesthetics of creative photography that emphasizes camera controls, principles of composition, concepts of color theory, the unique potential of the projected image, and personal expression. An adjustable 35mm camera is required. Outcome: Students will be able to demonstrate an understanding and application of exposure, depth of field, rendering motion, full frame composition, sequential imagery, balance of film and light source, and the functions of color, all of which support the practice of creative photography. Components: Lecture Room Requirements: Studio - Fine Arts(1) Course ID:003050 15-MAR-2006 FNAR 119(3) Watercolor Techniques An introduction to the basic elements of watercolor painting including: the application of drawing, design, and color principles. A variety of techniques and materials will be explored including, watercolor paints and pencils, and brush and masking techniques. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the watercolor painting idiom. Outcome: Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas. Components: Lecture Room Requirements: Studio - Fine Arts(1) FNAR 126(3) Course ID:003054 15-MAR-2006 Metal Sculpture and Welding This course introduces students to the manipulation of iron, steel and steel alloys. Students learn how to choose gauges of steel, cut with oxy-acetylene torch and metal cutting wheels and blades and attach steel by traditional welding techniques. Outcomes: Students will be able to operate a torch safely; cut and weld cleanly, file grind and polish, forge, hammer and shape steel sheeting; demonstrate the ability to convert two-dimensional ideas into cogent three-dimensional forms; demonstrate understanding and control over hazardous technical processes and demonstrate understanding of the evaluative criteria of metal work. Components: Lecture Room Requirements: Studio - Fine Arts(1) FNAR 129(3) Course TD:003055 15-MAR-2006 Printmaking-Monotypes An introduction into the various methods of producing one of a kind highly individual prints from a vast array of printing surfaces. A variety of materials will be explored through assignments which encourage an understanding of technique, perceptual thinking and expression of form. Outcomes: Students will be able to demonstrate a functional knowledge of a wide variety of printing media, be able to utilize the basic tools particular to each medium and produce a consistent series of formal images through recognition of their expressive properties. Lecture Components: Room Requirements: Studio - Fine Arts(1) FNAR 152(3) Course ID:010799 01-APR-2011 Drawing China This is an introductory drawing course. There are no pre-requisites nor prior experience need to succeed in this course. Beijing is our laboratory and the topic of all class drawings. Outcome: Students will be able to draw trees, buildings, automobiles, vegetables, human beings in real life situations and in perspective. Components: Lecture Course Equivalents: ASIA 152 CORE PRE-2012 Artistic Knowledge and Experience, Asian Studies Attributes: Requirement Group: Restricted to Beijing Students

HIST 333(3) Course ID:003572 15-JUN-2015 Ireland:Colony to Nation State This course traces the transformation of Britain's oldest colony into an independent nation between the seventeenth and twentieth centuries. Outcome: Students will develop an understanding of how Irish nationalism shaped British and Irish history and use Ireland as a template to develop critical thinking and communications skills about the transformation of colonies into independent states. Components: Lecture Course Equivalents: INTS 333 Attributes: European Studies, International Studies Room Requirements: General Classroom(1) HIST 334(3) Course ID:010377 27-JAN-2016 The Vikings The Vikings are popularly thought of as invaders, maurauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense. Outcome: Students will gain an understanding of the impact of the Vikings on mainstream European development (and vice versa); a knowledge of recent historiographical issues concerning the Vikings; and an awareness of the various types of primary sources (written and material) for this period. Lecture(In person) Components: Course Equivalents: MSTU 326 Attributes: Medieval Studies Room Requirements: General Classroom(1) HIST 335(3) Course ID:003574 15-JUN-2015 Italy 19th & 20th Centuries This course studies the major currents in Italy from the defeat of Napoleon to the present. Outcome: Students explore the political, social, religious, economic and intellectual currents against the background of Italy;s unification as a nation-state. Components: Lecture Course Equivalents: INTS 335, ROST 335 Attributes: European Studies, International Studies, Rome Studies Room Requirements: General Classroom(1) HIST 336(3) Course TD:003575 15-JUN-2015 Germany in Twentieth Century This course will cover the major phases of modern German history: Wilhelmine Germany, Volkish Germany, Germany in the First World War, Weimar Germany, National Socialist Germany, Germany in the Second World War, Post-War West Germany, East Germany, and Reunification. While setting forth the background of political and social developments, we will carefully consider responses to these issues by leaders in German intellectual and cultural life. Outcome: Students will apprehend the role of Germany in World War I; the turn to the Weimar Republic; the Rise and Fall of National Socialism; the emergence of two Germanies as a consequence of defeat in World War II; reunification in 1989; and cultural responses to these developments. Components: Lecture Course Equivalents: INTS 336 Attributes: European Studies, German Studies, International Studies **Room Requirements:** General Classroom(1) HIST 337(3) Course ID:003576 15-JUN-2015 The Nazi Revolution The course will deal with the causes, main features and consequences of the Nazi movement in Germany and Europe from 1919 to 1945. Outcome: The students explore the origins of Nazism and the reasons for Hitler; s success. Students appreciate the elements of ¿Nazi culture,¿ the nature of Nazi rule in the 1930s, Nazi foreign policy and aggression in the 1930s, and World War II. They acquire a sense of the Nazi movement as a phenomenon growing out of unique German circumstances as well as one reflecting the larger context of modern western history. Components: Lecture

College of Arts and Sciences - History - Subject: History

HIST 345A(3) Course ID:011751 13-JUL-2010

The course explores cultural change in Chinese history through a focus on urban life, material culture and the arts, with particular reference to the transitional period from the end of the last imperial dynasty through to the eve of World War II. Students will be exposed to a range of important historical materials from this period, including fiction, painting, autobiography, and travel literature. Museums, art galleries and historical sites in Beijing will provide an important learning resource as the class explores the meaning of ""modern"" in this critical period.

Outcomes: Students completing this subject will have: 1. developed a familiarity with major aspects of cultural change in early twentieth century China, including change in the built environment, art, literature, and print culture (newspapers, advertising). Components: Lecture(In person)

Requirement Group: Restricted to Beijing Students

HIST 346(3) Course ID:003585 01-APR-2011

This course examines the attempt to create and foster the growth of a socialist state and society in China under the Chinese Communist Party, with attention to the steady transformation of society, the economy, and political life since 1949.

Outcome: Students will be able to assess the major convulsive episodes such as land reform, the Great Leap Forward, the Great Proletarian Cultural Revolution, the Four Modernizations, and the impact and legacy of Mao Zedong.

Cultural Revolution-China

The Geat Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle ""bourgeoisie"" of the state by attacking various parts of the social, cultural and political structure.

Outcome: Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens.

HIST 373A(3) Course ID:010461 11-AUG-2007

Crime and Punishment

This course examines how notions of crime and punishment have evolved between the nineteenth and twentieth centuries (with the early modern period serving as a backdrop).

Outcome: Students will be able to draw conclusions on what precisely caused the shifts in punishment, with attention to such things as the professionalization of the judiciary, industrialization and urbanization, the American Civil War, and Constitutional changes. Students will also gain an understanding of sociological and anthropological approaches to this topic.

Components: Lecture(In person) Room Requirements: General Classroom(1)

HIST 374(3) Course ID:010380 15-JUN-2014

Black Politics

This course will present a general overview of black politics in America, including the major black political ideologies and their theoretical underpinnings and the role of race in urban politics in the late twentieth and early twenty-first centuries.

Outcome: Students will gain an understanding of how the circumstances of Reconstruction shaped black political ideologies; how blacks came into political power in major urban centers; and what the contours of debate are in the balck community over provocative issues such as the criminal justice system, affirmative action, reparations, and education.

The Mexican Revolution in Popular Imagination

10-MAY-2012

This course explores debates about the Mexican Revolution (1910-1917) by analyzing its interpretation in scholarship and its representations in memoir, fiction, art and film.

Outcome: Students will demonstrate an understanding of the Mexican Revolution as an event and as a myth in history and popular culture.

Components:Lecture(In person)Attributes:International Studies, Latin American StudiesRoom Requirements:General Classroom(1)

HIST 376(3) Course ID:003614 15-MAR-2006

This course will cover the process of frontier expansion in American history.

Outcome: Students will understand the frontier as a social process that was part of the American experience from its earliest colonial origins to the end of the nineteenth century. Students will also understand the frontier as a place in the western United States where Americans engaged in cooperation, conflict, and conquest with native peoples, Mexicans, and Asians. This course, (and its companion, HONORS 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty.

Outcome: Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time. Written and visual expressions of these themes are examined in relation to the political and cultural **Components**.

The United States Experience

Prerequisite: Restricted to students in the Honors Program.

This course examines the question, ""Who are we in the United States of America?"" Students approach this question using multiple texts and visual materials that address social, political, and cultural aspects of the U.S. experience. The course illustrates the main contours of American society and the American story, and explores the ways in which our self-image as a people reflects and contradicts reality.

Outcomes: Students will understand the role of key historical processes such as the frontier experience, industrialization, immigration, religious pluralism, and the struggle for equality in the development of a distinctive American story. They will learn to use available public sources to conduct research on aspects **Components:** Lecture(In person)

 POST 199(1 - 6)
 Course ID:010764
 01-APR-2011

 Topics in Polish Studies: Introductory
 Introduction to a specific theme in Polish Studies, e.g. Polish immigration, emergent Poland after World War II, etc.

 Outcome: To gain a basic knowledge of Poland through its art, history, politics, religion, philosophy, or cinema.

 Components:
 Lecture(In person)

 Attributes:
 Polish Studies

 Room Requirements:
 General Classroom(1)

POST 299(1 - 6) Course ID:010765

Topics in Polish Studies: Intermediate Topics

Exploration of important themes in Polish Studies, such as Polish immigration, emergent Poland after World War II, etc.

Outcome: To enhance knowledge of Polish Studies through different disciplines: art, history, politics, religion, philosophy, or cinema. Components: Lecture(In person)

 Attributes:
 Polish Studies

 Room Requirements:
 General Classroom(1)

Polish Studies Capstone Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.

Outcomes: Students will be able to integrate their coursework in the POST minor with their major concentration.

Course ID:010707

The second half of the 20th century saw significant and sustainable expansion of political rights and civil liberties especially in predominantly Catholic countries in Europe and Latin America. Most recently, democratic struggles have gained impetus in several Muslim countries in the Middle East and South-East Asia. Particularly interesting is the transformation of religious actors (e.g., the Catholic Church, clergy, non-governmental organizations, political parties) from bastions of authoritarian status quo into supporters of progressive political change. 27-JUN-2008 INTS 313A(3) Course ID:010896 History of Iraq This course studies the formation of modern Iraq and the failure to implement a democratic state and rule of law since the demise of the Ottoman Empire and British occupation. Outcome: Students will gain an understanding of the extent to which the original formation of Iraq was an Ottoman policy, how the ending of Hashimite rule in 1958 empowered in a new group of paramilitary rulers, and why the removal of the ancient regime by American troops has resulted in ever greater instability. Students will make use of anthropological and sociological as well as historical methodologies. Components: Lecture(In person) Course Equivalents: HIST 313A Room Requirements: General Classroom(1) INTS 314(3) Course ID:003928 04-MAR-2007 Identities: Race, Ethnicity, and Nationalsim Prerequisites: ANTH 102, or ANTH 271, or Culture Area Requirement. Drawing on case studies, this course examines anthropological understandings of ""race,"" ethnicity, and nationalism. Outcome: Students will emerge able to understand historical anthropological theories concerning group identities (tribes, race, ethnic groups); the symbolic construction of group identities; the political dimensions of collective identities; dynamics between religion and ethnicity; and the role of colonialism & the state in shaping ethnic relations. Components: Lecture Course Equivalents: ANTH 315 INTS 315(3) Course ID:003929 01-JAN-1901 International Management International Management. The time period studied will span from the end of the 19th century through the 20th century. Outcome: students will learn to situate major historical events such as the May Fourth Movement in their proper geographical, chronological, and thematic context; and recognize the extent to which history is at the core of current Chinese leaders' speeches, policy making, and rule making. Lecture(In person) Components: Course Equivalents: ASIA 346A, HIST 346A Room Requirements: General Classroom(1) INTS 346B(3) Course ID:010498 06-NOV-2007 Cultural Revolution-China The Geat Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle ""bourgeoisie"" of the state by attacking various parts of the social, cultural and political structure. Outcome: Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism. | | | | |

Islamic Mysticism

This course will explore various dimensions of Islamic mysticism (Sufism) in both traditional and contemporary manifestations. After a brief introduction to the study of mysticism and the basics of the Islamic religion, students will consider topics including mystical understandings of the Islamic scripture (Qur'an) and the figure of the Prophet Muhammad as well as the ""inner dimensions"" of Islamic ritual practices. In addition, the course will survey the entire tradition of Islamic mysticism (tasawwuf) historically, anthropologically, and through study of the writings (in translation) of prominent Muslim mystics such as al-Ghazzali, Ibn Arabi, and Rumi.

Room Requirements: General Classroom(1)

IWS 365(3) Course ID:011953 15-MAR-2011 Women, Gender and Embodiment in Islam

This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies. Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations.

Components: Lecture(In person) Course Equivalents: WOST 365, INTS 304, WSGS 365, ASIA 365, THEO 365 Room Requirements: Electronic Classroom(1)

IWS 366(3) Course ID:011952 15-MAR-2011

Contemporary Islamic Thought and Movements

This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism.

Course ID:012744 LITR 291(3) 15-JUN-2015 Italian Women Writers This course is a comparative study of 20th century Italian & Italian-American writers from different periods and geographic areas. What unites these writers in addition to their nationality and ethnicity is that the city of Rome played a central role in their development as artists. Special emphasis will be given to the construction of the female and male subject; ties among women, and the dynamic interplay of gender, politics, spirituality, etc. Outcomes: To identify the differences between women and men who hail from different parts of Italy and different immigrant communities in America, while highlighting their common national heritage. To understand the city of Rome as having played a central role in literary history from the 19th century to the present. Components: Lecture(In person) European Studies, International Studies, Rome Studies, Women & Gender Studies Attributes: Room Requirements: Electronic Classroom(1) LITR 292(3) Course ID:010335 01-MAY-2015 Modern Chinese Fiction This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture. Outcome: Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course. College of Arts and Sciences - Loyola University Chicago - Subject: Urban Studies

URB 125(3) Course ID:011775 01-AUG-2012 Chicago-Growth of a Metropolis This course explores the development of Chicago metropolitan region from the 1830;s to the present day. Students will explore the urban area not only through texts, but also through fieldwork. Outcome: Students will be able to demonstrate understanding of the geography, history and people of the Chicago metropolitan region. Lecture(In person) Components: Course Equivalents: SOCL 125 Attributes: CORE PRE-2012 Societal and Cultural Literacy Room Requirements: Electronic Classroom(1) 02-AUG-2010 URB 201(3) Course ID:011777 Social Welfare Policy & Serv I Prerequisite: sophomore standing. Analysis of institutional structures of welfare as they relate to social problems. Selected major values and interests in American society are used to analyze the social welfare institution. Students will be able to describe and analyze current social welfare policies and social services within a historical, societal and political context. Components: Lecture(In person) Course Equivalents: SOWK 201 CORE PRE-2012 Societal and Cultural Literacy Attributes: Room Requirements: Electronic Classroom(1) URB 234(3) Course ID:011776 02-AUG-2010 City, Suburbs & Beyond Study of the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region. Outcome: Students will understand fundamental facts and theories about the character and development of cities and urban regions. Lecture(In person) Components: Course Equivalents: SOCL 234 Room Requirements: Electronic Classroom(1) URB 320(3) Course TD:011772 30-1111-2010 Urban Economics Prerequisites: Sophomore standing, minimum grade of ""C-"" in ECON 201 and 202. This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime. Students will understand the economic forces that shape urban agglomerations. Students will Outcome: understand the economic and ethical trade-offs of various urban economic policies. They will be able to think critically about the economic forces that make a city grow and contract over time. Components: Lecture(In person) Course Equivalents: ECON 320 Requirement Group: Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202. Room Requirements: Electronic Classroom(1) Course ID:011770 URB 352(3) 30-JUL-2010 Gang Activity & Control The course examines the emergence of street gangs in American society with a view toward understanding their structure, characteristics, purpose and activities, and reviews and evaluates prevention and control strategies. Outcome: Students will be able to demonstrate an understanding of the causes of street gangs, the methods used to control street gangs, and the impact of street gang activity on society and the criminal justice system. Components: Lecture(In person)

21-JAN-2009 MATH 140L(3) Course ID:011066 Geometry for Middle Grade Teachers

The content covered in this course will include: Area, perimeter, volume, surface area, Properties of two and three dimensional figures, points, lines, planes, space, the Pythagorean theorem, transformations, fractals, tessellations, perspective drawings and informal proofs. The material covered will address Illinois Learning Standard Goal 7 and Goal 9 and related content performance descriptors for educators. The course is designed for Elementary education majors that wish to enhance, enrich and deepen their knowledge of Geometry and apply for a 6th-8th grade Mathematics endorsement from the State of Illinois.

Mathematics Content Area Standards 7 (Measurement) and 9 (Geometry) from the Content-Area Standards for Educators document published by the Illinois State Board of Education will be emphasized.

Components: Lecture(In person) **Room Requirements:** General Classroom(1)

MATH 141L(3) Course ID:011067 21-JAN-2009 Number Theory for Middle Grade Teachers

Greatest common divisors, prime factorization, decimal fractions, continued fractions, primes, composite numbers, tests for divisibility, perfect numbers, polygonal numbers, numbers bases, and patterns in addition and multiplication tables are a sample of the topics covered. (Illinois Learning Standard Goal 6 and related performance descriptors). Appropriate use of technology (spread sheets, CAS, etc.) will also be addressed.

Outcome: Students will obtain an understanding of topics from Number Theory that are addressed in the middle grade mathematics curriculum.

Lecture(In person) Components: Room Requirements: General Classroom(1)

MATH 142L(3)

Course ID:011068 History of Mathematics for Middle Grade Teachers

This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonjs Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.

Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that are studied in the middle grade mathematics curriculum. Components: Lecture(In person)

Room Requirements: General Classroom(1)

MATH 143L(3)

Course TD:011069 Probability and Statistics for Middle Grade Teachers

Data collection and display, simulations, surveys, probability and elementary statistics such as mean, median, mode, standard deviation, etc. will be the focus of this course (Illinois Learning Standard Goal 10) Appropriate techniques for graphing (scatter plots, histograms, regression, correlation) with and without technology will be a focus of this course.

Outcome: Students will obtain a background in the fundamentals of descriptive and inferential statistics, along with an understanding of their uses and misuses, as addressed in middle school mathematics curriculum. Components: Lecture(In person)

Object-Oriented Programming with Mathematics

Prerequisites: Math 132 or Math 162 or permission of instructor

This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.

Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems. Components: Lecture(In person) Course Equivalents: COMP 215 Requirement Group: Pre-requisite: MATH 132 or MATH 162 Room Requirements: Electronic Classroom(1)

Course ID:005028 08-JUN-2011 MATH 263(4) Multivariable Calculus Prerequisite: MATH 162 This course covers the differential and integral calculus of multivariable and vector valued functions, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem; software packages such as MAPLE may be used. Outcome: Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics. Lecture(In person) Components: Requirement Group: Pre-requisite: MATH 162. Room Requirements: General Classroom(1) MATH 264(3) Course ID:005029 15-MAR-2006 Ordinary Differential Equations Prerequisite: MATH 263 This course covers the theory, solution techniques, and applications surrounding linear and non-linear first and second-order differential equations, including systems of equations; software packages such as MAPLE may be used. Outcome: Students will obtain an understanding of elementary differential equations and their applications. Components: Lecture Requirement Group: Pre-requisite: MATH 263. Room Requirements: General Classroom(1) MATH 266(3) Course ID:013161 15-JUN-2015 Differential Equations and Linear Algebra This course provides an introduction to basic topics in ordinary differential equations and linear algebra. Topics include first and second-order differential equations, Laplace transform, systems of first-order differential equations, systems of linear algebraic equations, matrix algebra, bases and dimension for vector spaces, linear independence, linear transformations, determinants, eigenvalues, and eigenvectors. Prerequisites: MATH 263 Outcomes: Students will learn fundamental results and methods in ordinary differential equations and linear algebra, with a strong emphasis on topics that are particularly relevant for Engineering Science. Lecture(In person) Components:

Requirement Group: Prerequisite: Completion of Math 263 Room Requirements: Electronic Classroom(1)

Course ID:010320 30-AUG-2010

Problem-Solving Seminar

MATH 277(1)

In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra.

Learning Outcome: To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills.

29-MAY-2013

Course ID:012616 MATH 422(3) Advanced Topics in Number Theory

Prerequisites: MATH 201 or the equivalent or permission of the instructor

Topics chosen from: Pythagorean triples, Fermat¿s Last Theorem, Pell¿s equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.

Outcomes: Understand the importance of historically significant concepts and problems in number theory. Understand the proofs of related theorems. Solve problems and prove theorems from topics covered in class.

Lecture(In person) Components: Requirement Group: Prerequisite: MATH 201 Room Requirements: Electronic Classroom(1)

College of Arts and Sciences - Mathematical Sciences - Subject: Statistics

15-MAR-2006

Intro to Stochastic Processes Prerequisite: MATH 212; STAT 203 or 335 This course discusses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion. Outcome: Students will obtain a background in stochastic processes that will allow them to apply them in areas like genetics, population growth, inventory, cash management, and gambling theory. Components: Lecture Course Equivalents: MATH 306 Room Requirements: General Classroom(1) STAT 307(3) Course ID:006773 29-JUN-2012 Statistical Design & Analysis of Experiments Prerequisite: STAT 203 or 335 This course discusses comparative experiments, analysis of variance, fixed and random effects models, and a variety of design models; packaged computer programs such as SPSS or SAS will be used extensively. Outcome: Students will obtain the background in statistical design and analysis of experiments needed to apply them in their own areas of interest. Components: Lecture Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1) STAT 308(3) Course ID:006774 29-JUN-2012 Applied Regression Analysis Prerequisite: 203 or 335 This course discusses simple and multiple linear regression methods, multiple comparison estimation procedures, residual analysis, and other methods for studying the aptness of a proposed regression model; packaged computer programs such as SPSS and SAS will be used extensively Outcome: Students will obtain an extensive background in the applications of regression analysis. Components: Lecture Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1) STAT 310(3) Course ID:010570 15-JUN-2013 Categorical Data Analysis Prerequisite: STAT 203 or 335 An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models. Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages. Lecture(In person) Components: Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1) 15-JUN-2013 STAT 321(3) Course ID:006777 Computational Aspects of Modeling and Simulation Prerequisites: STAT 203 or STAT 335 This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Outcomes: Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable. Components: Lecture Course Equivalents: COMP 356

Requirement Group: Prerequisite: STAT 203 or 335

Room Requirements: General Classroom(1)

15-JUN-2016 STAT 335(3) Course ID:006775 Introduction to Biostatistics Prerequisite: BIOL102; MATH 132 or 162 Prerequisites for Bioinformatics Majors ONLY: BIOL 101; MATH 132 or MATH 162 This course provides an introduction to the statistical methods used in designing biological experiments and in data analysis, including computer laboratory assignments with biological data. Students interested in research in the life sciences will obtain a background in the appropriate Outcome: use of statistical methods as an experimental tool. Components: Lecture Course Equivalents: BIOL 335 Bioinformatics, Forensic Science Attributes: Requirement Group: Prerequisite: BIOL102; MATH 132 or 162 Prerequisites for Bioinformatics Majors ONLY: BIOL 101; MATH 13 **Room Requirements:** General Classroom(1) STAT 336(3) Course TD:006776 15-JUN-2013 Advanced Biostatistics Prerequisites: STAT 203 or STAT 335 This course provides an overview of advanced topics in applied statistics with particular application in biology and medicine, including the interpretation of Minitab, SAS and S-Plus computer output. Outcome: Students interested in applied statistical methods will obtain skill in experimental design, linear regression, categorical data analysis and logistic analysis, nonlinear regression, bioassay and drug synergy methods, as well as multivariate and survival statistical methods. Components: Lecture(In person) Course Equivalents: BIOL 336 Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1) STAT 337(3) Course ID:009420 20-JAN-2016 Ouantitative Methods in Bioinformatics Prerequisite: STAT 203 or 335 This course develops the mathematical and statistical methods necessary to analyze and interpret genomic and proteomic data, including signal analysis, sequence alignment methods, data-base search methods useful in bioinformatics and data mining. Outcome: Students will obtain the quantitative skills used in BLAST, including inference, stochastic processes and hidden Markov models, random walks, microarray analysis and biological sequence analysis. Components: Lecture(In person) Course Equivalents: BIOI 337, BIOL 337 Attributes: Bioinformatics Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1) STAT 358(3) Course ID:006778 01-JAN-1901 Meth in Operation Research Components: Lecture Course Equivalents: MATH 358 Room Requirements: General Classroom(1) STAT 388(1 - 3) Course ID:006779 15-JUN-2013 Topics : Prerequisites: STAT 203 or STAT 335 This course covers advanced topics in statistics, such as multivariate analysis, sampling theory, non-parametric methods, decision theory, and Bayesian analysis. Outcome: Students will obtain an understanding of an advanced topic in their major. Components: Lecture(In person) Requirement Group: Prerequisite: STAT 203 or 335 Room Requirements: General Classroom(1)

CHIN 101(3) Course ID:001677 01-APR-2011 Chinese I

This is an introductory course in Modern Standard Chinese (Mandarin) for students with none or little prior experience in Chinese. This course introduces the four basic communicative skills in Chinese: listening, speaking, reading and writing, and emphasizes on conversation.

Outcome: Students will achieve active control of Chinese sound system and writing system. They will be able to understand and respond to greetings, as well as talk about family members, time, hobbies and friends. They will learn nearly 200 characters. Components: Lecture

Course Equivalents:ASIA C01Attributes:Asian StudiesRoom Requirements:General Classroom(1)

CHIN 102(3) Course ID:001679 01-APR-2011 Chinese II

Prerequisite: CHIN 101

CHIN 102 is a continuation of CHIN 101. Students will expand their knowledge of Chinese characters, vocabulary and grammar, improve their skills on listening, speaking, reading, and writing skills, and learn more cultural knowledge.

Outcome: Students will be able to make appointments, talk about Chinese learning experience, school life, shopping, weather and transportation. Aside from dialogues, they will also read a short dairy and a letter. They will learn some 200 new characters.
Components: Lecture

Course Equivalents: ASIA CO2 Attributes: Asian Studies Room Requirements: General Classroom(1)

CHIN 103(3) Chinese III Prerequisite: CHIN 102

CHIN103 builds on the knowledge and skills gained in CHIN 101-102. This course develops conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts.

01-APR-2011

01-APR-2011

Outcome: Students will learn dialogues used in the contexts of dinning out, studying in library, asking directions, attending birthday party, seeing a doctor, and dating.
Components: Lecture

Course ID:001681

Course ID:001683

Course Equivalents: ASIA C03 Attributes: Asian Studies Room Requirements: General Classroom(1)

CHIN 104(3) Chinese IV Prerequisite: CHIN 103

Chinese 104 is the continuation of Chinese 103. This course further extends students; knowledge of Chinese vocabulary and grammar, and improves their skills in listening, speaking, reading, and writing.

Outcome: Students will learn expressions in the contexts of renting an apartment, mailing a letter and traveling in both mainland China and Taiwan, talking about hometown and sports, and checking in at the airport.

Elementary French I

Loyola University Chicago

Course Catalog

Run Date: 04/01/2016 Run Time: 11:35:41

College of Arts and Sciences - Modern Languages & Literatures - Subject: French

FREN 101(3) Course ID:003180 01-JAN-2015

Prerequisite: No previous knowledge of French is expected. Please go to http://www.luc.edu/modernlang/exam.shtml for placement test instructions, especially if you took any French courses in high school or college.

Description: Taught in French. Instructs basic communicative French, the people and cultures where it is spoken, using formal and informal registers, and speaking in present and future time. Students will listen and respond, read and write, ask and answer simple questions in basic functional French. Content: personal topics, everyday living

Outcomes: Student will successfully interpret and express needs pertaining to home, work, college, leisure, Components: Lecture

Room Requirements: General Classroom(1)

FREN 102(3) Course ID:003181 15-JUN-2015

Elementary French II

Taught in French. Continuation of basic French inter-communication skills both producing French (speaking and writing), and interpreting French (listening and reading.) The aim is to comprehend and contribute to discussions about families, housing, sports, travel, and traditions in French.

Enrollment Conditions: FREN 101 or one semester college French with C- or better, or placement test score. Please go to Modern Languages home page for placement test instructions. You must take the placement test if you took any French courses in high school.

Outcomes: Students will comprehend and speak in present, future, and past narrative; get and give simple direction; share personal information. Achievement level desired: ACTFL* Novice Low to Mid.

Components:

Room Requirements: General Classroom(1)

Lecture

FREN 103(3) Course ID:003182 15-JUN-2015

Intermediate French I Taught in French. Course continues to work on focus on pronunciation, grammar. and developing conversational and writing fluency. Students will read excerpts of French and francophone media or

literature. Topics include the environment and the many francophone cultures and tasks include Nnrrating in more complex past, future and hypothetical contexts.

Enrollment Conditions: FREN 102, or equivalent French at another college, with C- or better, or placement test score. Exam required for placement on the basis of high-school work: please go to Modern Languages home page for placement test instructions.

Outcomes: Students become more fluent and precise in expressing opinions, asking and answering more probing Components: Lecture

MLSC 152(1) Course ID:005325 15-JUN-2014 Physical Training II Enrollment Requirements: MLSC 151 or Departmental Consent is required to enroll in this course. ROTC students must take MLSC 152 section 001. Non-ROTC students must take MLSC 152 section 002. MLSC 152 is designed to develop fitness capabilities. The course implements stretching, strength building and cardiovascular exercises from the Army Physical Readiness Training Program to develop students physically and mentally by building muscular strength and cardiovascular endurance. Outcomes: Introduced to the basics of military fitness in order to develop muscular strength, cardiovascular endurance, and flexibility Components: Laboratory(In person) Room Requirements: Gymnasium(1) MLSC 201(2) Course ID:005326 15-JUN-2014 Foundations of Leadership Enrollment Requirements: MLSC 102 or Departmental Consent is required to enroll in this course. MLSC 201 section 001 is taken concurrently with MLSC 201 section 002, the laboratory component. MLSC 201 explores the dimensions of innovative tactical leadership strategies and styles by examining team dynamics. Aspects of personal development such as the importance of communication, ability to present information as a briefing and time management as a leader and a member of a group are also discussed. Upon completing this course students will be able to practically apply learned leadership theories and work more effectively as a member of a team. Components: Laboratory(In person), Lecture **Room Requirements:** Electronic Classroom(1), General Classroom(1) Course ID:005328 MLSC 202(2) 15-JUN-2014 Tactical Leadership Enrollment Requirements: MLSC 201 or Departmental Consent is required to enroll in this course. MLSC 202 section 001 is taken concurrently with MLSC 202 section 002, the laboratory component. MLSC 202 examines situational, transformational, and adaptive leadership theories and how to assess leadership styles. The course highlights dimensions of terrain analysis, patrolling, and operation orders. Further study of the theoretical basis of the Army Leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations. Outcomes: Upon completing this course students will be able to assess and apply leadership skills as both a leader and member of a team. Laboratory(In person), Lecture Components: Room Requirements: Electronic Classroom(1), Electronic Classroom(1) MLSC 251(1) Course ID:005330 15-JUN-2014 Physical Training III Enrollment Requirements: MLSC 152 or Departmental Consent is required to enroll in this course. Course ID:005410 01-JAN-1901 MSTU 324(3) Pre-Industrial City in Europe The Preindustrial City in Europe. (HIST 303) Lecture Components: Course Equivalents: HIST 303 MSTU 326(3) Course ID:010435 14-JUL-2007 The Vikings The Vikings are popularly thought of as invaders, maurauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense. Outcome: Students will gain an understanding of the impact of the Vikings on mainstream European development (and vice versa); a knowledge of recent historiographical issues concerning the Vikings; and an awareness of the various types of primary sources (written and material) for this period. Components: Lecture(In person) Course Equivalents: HIST 334 Room Requirements: General Classroom(1) MSTU 328(3) Course ID:005411 01-JAN-1901 Formation Medieval Eur 300-1100 Formation of Medieval Europe: 300-1100. (HIST 310) Lecture Components: Course Equivalents: CATH 310, HIST 310 MSTU 330(3) Course ID:010436 14-JUL-2007 Shipwreck Archaeology Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. Outcome: Students understand the iportance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum. Components: Lecture(In person) Course Equivalents: CLST 324, ANTH 347, HIST 324 Room Requirements: General Classroom(1) MSTU 332(3) Course ID:005412 01-JAN-1901 Medieval World 1100-1500 Lecture Components: Course Equivalents: CATH 311, HIST 311 MSTU 333(3) Course ID:009659 18-APR-2005 Introduction to the History of Islam Components: Lecture MSTU 334(3) Course ID:011964 22-MAR-2011 Islamic Philosophy Covers the development of classical Islamic philosophy from 800 to 1200ee. Attention will be given to the central topics (God, the cosmos, knowledge, the human good) with which Muslim philosophers were concerned and to major figures such as Al-Kindi, Al-Farabi, Ibn Sina (Avicenna). Al-Ghazali and Ibn Rushd (Averroes). Outcome: Students will be able to articulate and discuss major philosophical problems of concern to Muslim philosophers of the classical period. Lecture(In person) Components: Course Equivalents: IWS 308, PHIL 308, THEO 357 Room Requirements: Electronic Classroom(1) 01-JAN-1901 MSTU 336(3) Course TD:005413 Renaissance Renaissance. (HIST 314) Components: Lecture Course Equivalents: HIST 314
