

Arrupe College - Accounting - Subject: Arrupe Accounting

ACACT 201(3) Course ID:013000 20-JUL-2016

**Introductory Accounting I**

The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.

Co-requisite: ACMAT 117

Outcomes: The student will be able to understand the underlying principles, design, concepts, limitations,

**Components:** Lecture(In person)**Course Equivalent:** CPST 310, ACCT 201, ACCT 201H**Requirement Group:** Co-Requisite: ACMAT 117; Restricted to Arrupe College students.**Room Requirements:** Electronic Classroom(1)

ACACT 202(3) Course ID:013001 01-JAN-2017

**Introductory Accounting II**

Prerequisite: ACACT 201 Introductory Accounting I

This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.

**Components:** Lecture(In person)**Course Equivalent:** ACCT 202, ACCT 202H**Requirement Group:** Prerequisite: ACACT 201/ ACMAT 117**Room Requirements:** Electronic Classroom(1)

**Arrupe College - Biology - Subject: Arrupe Biology****ACBIO 100(3)****Course ID:013842****15-JUN-2019****Introductory Biology**

This course will expose students to the breadth of biological concepts by including cell and molecular biology, organismal structure and function, genetics and heredity, evolution, and ecology. The course will engage students in science as a structured process that generates and refines knowledge through evidence-based decisions. It will emphasize the value and contributions of life science to society.

**Outcomes:**

1. By the end of this course, you will develop academic skills such as:
  - a. Reading a science textbook to support your learning
  - b. Note-taking and study strategies
  - c. Strategies for succeeding during an exam

**Components:** Discussion(In person)**Room Requirements:** Electronic Classroom(1)

**Arrupe College - Chemistry - Subject: Arrupe Chemistry**

ACCHM 100(3)

Course ID:013864

15-JUN-2019

**Introductory Chemistry**

A course emphasizing the general principles and theories of chemistry, including fundamentals of inorganic chemistry, atomic structure and states of matter, bonding, stoichiometry, acid-base concepts, periodicity and solution chemistry

Outcomes: 1. Understand the structure of matter and the chemical changes it undergoes, and predict those changes based on the periodic nature of the elements 2. Solve problems using chemical calculations concerning mass or concentration. 3. Describe strong and weak acids and bases, and carry out related calculations. 4. Develop the academic skills needed for future science courses including problem-solving, taking and reviewing notes, and multiple choice exams.

**Components:** Discussion(In person)

**Attributes:** Course Approved 2019 - IAI

**Room Requirements:** Electronic Classroom(1)

Arrupe College - Fine Arts - Subject: Arrupe Fine Arts

ACFNA 100(3) Course ID:013455 15-DEC-2017

**Art and Visual Culture**

A survey of the visual arts (painting, drawing, printmaking, sculpture and architecture) as they transmit cultural traditions and humanistic and aesthetic values. Examines historical, social and technological factors that contribute to understanding the function and meaning of works of art.

- 1- Introduce students to an appreciation of the visual arts through an inter cultural, social/historical approach.
- 2- Emphasize the nature of the creative process, integrating a study of the conceptual principles, with methods and materials which influence artistic critical thinking, problem solving, exploration, and discovery.

**Components:** Lecture(In person)  
**Course Equivalents:** FNAR 199  
**Attributes:** Course Approved 2017 - IAI

ACFNA 112(3) Course ID:013559 01-APR-2018

**Foundation Studio: Two Dimensional Design**

This course explores the fundamental organizational systems of intentional visual expression through purposeful making of, and critical response to, traditional design concepts. The elements of art and the principles of design will be experienced through a range of media both tactile and digital, with emphasis on spatial perception, color theory, and visual communication.

Students will recognize and experience the core concepts and practices of visual communication through hands-on exercises and projects addressing observation and perception, composition, transformation and manipulation of the picture plane, sequence and narrative, and the physical and communicative properties of pigment and color. Students will further engage these concepts through critical examination of images, texts, and objects representing a wide array of contemporary and historical visual culture. IAI Code: ART 907

**Business Analytics**

Business analytics is the practice of using methodically collected data to drive decisions about business and in business applications. The goal of the course is to introduce students to the current approaches, tools, and techniques involved in this practice. Because many topics and concepts in business analytics are best learned through hands-on work, time will be spent obtaining, processing, analyzing and visualizing data that pertain to different business cases. Students will use R, arguably the most popular analytical software used by data scientists. During this course, students will learn to use R, as well as gain and help improve business insight through data-driven analytics.

Restricted to Graduate School of Business students.

FINC 557(3) Course ID:010485 07-AUG-2018

**Enterprise Risk Management**

Prerequisite: FINC 450 or FINC 342 with minimum grade of "B"

This course explores the emerging practice of "enterprise risk management" (ERM) or "integrated risk management"-a new managerial outlook on managing risk. Enterprise risk management considers all the risks faced by the firm and attempts to integrate these disparate risks into a single unified analytical framework. Traditionally, risk has been managed in the compartments of financial risk, operating risk, and credit risk. Rather than allowing risk to remain in such "silos," ERM insists that these must be brought together into one system of risk management.

Prerequisite: Junior Standing, 'C-' or better in MGMT 201

The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions:

Who is the entrepreneur; that is, what activities or characteristics make one an entrepreneur?

Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?

How ought we to evaluate the entrepreneur morally; and does the answer depend upon who we understand the entrepreneur to be?

**Research Methods in Black World Studies**  
 Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such populations are Cuban, Haitian, Nigerian, Belizean, and Jamacian peoples. These neo-African communities in Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors including language barriers, educational and employment disadvantages as well as cultural ubiquity often leave these newcomers' needs unattended. This course provides instruction in research methods useful in understanding the social and political needs of such marginalized populations. The primary research model for this course is Participatory Action Research methods.

College of Arts and Sciences - Anthropology Department - Subject: Anthropology**ANTH 243(3) Course ID:001117 06-JUN-2018****North American Archaeology**

Prerequisite: ANTH 101 or ANTH 104.

This course surveys archaeological evidence in North America with focus on regional patterns of indigenous adaptation and explanations for prehistoric culture change.

Outcome: Students will be able to describe the chronological pattern and regional diversity in the cultural evolution of prehistoric societies in North American from ice-age colonization to European contact.

**Components:** Lecture  
**Requirement Group:** Prerequisite: ANTH 101 or ANTH 104  
**Req. Designation:** Internship  
**Room Requirements:** General Classroom(1)

**ANTH 244(3) Course ID:013503 06-JUN-2018****Historical Archaeology**

Historical archaeology views history through the lens of the archaeological record. This course is an introduction to contemporary method and theory in historical archaeology with a focus on the European colonization of North America, including the major topics of reconstructing everyday lifeways and understanding modernization and globalization.

Prerequisites: ANTH 101 or ANTH 104. Recommended: Anth 241.

Outcomes : Students will learn research strategies for using historic artifact analysis and archival documents in interpreting the unique physical evidence of the historical archaeological record.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ANTH 101 or ANTH 104  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom(1)

**ANTH 280(3) Course ID:001119 06-JUN-2018****Evolution of Human Disease**

The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture and changing environments.

Outcome: Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogenesis of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease.

**Components:** Lecture

This course concerns investigation of contemporary issues associated with forced migration and refugee resettlement in applied anthropology and humanitarian work. It considers topics of globalization, transnational migration, human rights, and cross-cultural interactions. This course involves service-learning and civic engagement components providing assistance for local refugees and refugee resettlement agencies.

**Components:** Lecture(In person)  
**Attributes:** Engaged Learning, Peace Studies, Urban Studies  
**Req. Designation:** Service Learning  
**Room Requirements:** Electronic Classroom(1)

**ANTH 303(3) Course ID:010267 06-JUN-2018****People and Conservation**

This course considers the interplay between indigenous peoples and environmental resources utilizing current perspectives from evolutionary and community ecology, conservation biology, anthropology, political ecology and economics.

Outcomes: Students will demonstrate an understanding of factors influencing this interplay, including environmental ethics, traditional environmental knowledge, resource management, community-based conservation, property rights, common-pool resources, sustainable development, land tenure, indigenous movements, and eco-tourism.

**Components:** Lecture(In person)  
**Attributes:** Bioethics, Global & International Studies

**Ethnographic Methods**

This course is designed to offer an introduction to qualitative methods in anthropology. Students will learn methodologies such as participant observation, interviewing, and document analysis, and we will also address ethical issues in field research. Students will design and carry out an ethnographic research project.

Outcomes: Students will: demonstrate in-depth knowledge of qualitative research techniques; critically discuss ethical implications of ethnographic research; undertake original ethnographic fieldwork; prepare a comprehensive, theoretically informed, and clearly written report based on original ethnographic data.

Instructor permission required.

**Internship in Anthropology**

Enrollment Requirements: Student's must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form.

This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.

Outcome: Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience.

**Components:** Internship(Independent Study)  
**Topics:** Museum Collections Management, Museum Studies  
**Attributes:** Engaged Learning

Prerequisites: BIOL 265 and CHEM 102 or 106.

An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats.

Outcome: Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions. Students will learn to evaluate the trophic status and health of a lake by the end of the course.

**Components:** Laboratory, Lecture

**Limnology Laboratory**

Prerequisites: BIOL 282, 302, CHEM 224 or instructor's permission.

Fundamentals of microbe-host interactions and microbial diseases. Microbial mechanisms of pathogenicity are examined. There are also in-depth readings and discussion of specific microbial diseases.

**Components:** Laboratory  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Lab - Biology(1)

**BIOL 317(3)** **Course ID:013298** **06-JUN-2018**

**Models of Human Disease**

This course explores approaches used to study human diseases from in vitro to in vivo levels and examines their strengths and weaknesses. Discussions will cover historical experiments and cutting-edge research to learn about the techniques used to generate data and how to interpret the results.

Outcomes: Students will gain knowledge about human diseases and techniques used to model aspects of those diseases in the laboratory.

**Components:** Lecture(In person)  
**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.  
**Req. Designation:** Undergraduate Research

**General Virology**

This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.

Prerequisites: BIOL 251 & BIOL 282

Outcomes: Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies.

**Components:** Lecture(In person)  
**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.  
**Req. Designation:** Undergraduate Research

**Neurobiology**

Prerequisite: NEUR 101 and BIOL 251.

The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.

Outcome: Student will gain a solid foundation in nervous system structure and function.

**Components:** Discussion(In person), Lecture(In person)

Prerequisite: BIOL 265.

An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience.

Outcome: Students will learn to identify major insect groups in the field and in the laboratory. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.

**Components:** Laboratory, Lecture  
**Requirement Group:** Pre-requisite: BIOL 265  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

BIOL 365(3) Course ID:013710 24-AUG-2018

**Writing a Scientific Manuscript**

A Process from Data Collection to Writing a Scientific Manuscript. This course is designed for upper level students interested in practicing the scientific process; including hypothesis construction, experimental design, data collection, and writing of a scientific paper detailing Introduction, Methods, Results and Discussion.

Prerequisite: BIOL 102,112.

Outcomes: Students would learn to develop hypotheses, design experiments based on those hypotheses, analyze data, and learn to construct and peer-review a scientific manuscript.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite : BIOL 102, C- or above  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

BIOL 366(3) Course ID:001364 01-JAN-2018

**Cell Physiol & Biochem**

Prerequisites: BIOL 251 and CHEM 224

An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. BIOL 366 is cross-listed with CHEM 361.

Outcome: Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned.

**Components:** Discussion, Lecture  
**Course Equivalents:** CHEM 361  
**Attributes:** Forensic Science  
**Requirement Group:** Pre-requisites: BIOL 251 & CHEM 224 or 222. Pre-requisites for Bioinformatics majors: CHEM 224 or 222

**Genomics**

Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.

Outcome: Students will acquire an in-depth knowledge of the nature of gene and genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge. Students will be able to create meaningful web-based database search strategies and interpret the significance of results.

**Components:** Discussion(In person), Lecture(In person)**Attributes:** Bioinformatics**Requirement Group:** Pre-requisite: Biol 282 & 283.**Req. Designation:** Undergraduate Research**Room Requirements:** Electronic Classroom(1), Electronic Classroom(1)

**Introductory Topics in Catholic Studies**

Introductory level course for topics cross-listed with other courses that focus on areas of Catholic studies but are not included among the courses listed in the Catholic Studies Program.

Outcome: Students will master a topic in Catholic Studies not addressed in other courses.

**Components:** Lecture(In person)  
**Topics:** Philosophy of Religion, Being Human:Phil Perspectives, Liturgy and Ritual, Theo & Psych of Vocation, Christian Monastic Culture, Christian Backgrds/Begininngs, System Theo Pope Benedict XVI, Liturgical Choir:Cantorum, Aesthetics, Metaphysics  
**Attributes:** Catholic Studies

**Room Requirements:** General Classroom(1)

CATH 101(3) Course ID:011239 06-JUN-2017

**Evol Wst Idea/Inst to 17C**

This course traces the early development of Western civilization from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation.

Outcome: Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills.

**Components:** Lecture(In person)  
**Course Equivalents:** ACHIS 101, HIST 101  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom(1)

 College Chemistry for a Sustainable Future  
 Restricted to the Pre-Collegiate Summer Scholar students.

Prerequisites: High school geometry and high school algebra.

Through a combination of lecture, discussion and group activities, students in this course will explore the role of chemistry in everyday life in our world. We will examine essential principles of matter, including atomic and molecular structure, patterns of chemical reactivity, energy transfer, and biomolecules. Chemical concepts in these areas will be applied to identifying problems and solutions to the related human and environmental issues of climate, water, energy, resources and health.

 Prerequisite: MATH 117 or equivalent. A year of high school chemistry is recommended.

Co-requisite: CHEM 111 and MATH 118.

This non-majors course deals with the development of basic chemical principles. Multiple perspectives of matter will be used to describe and explain characteristics, properties, and relationships across the following topics: atomic structure, nuclear chemistry, periodicity, molecular structure, chemical bonding, chemical reactions, thermochemistry, aqueous solutions, gases

Outcome: Students will learn the foundational concepts of chemistry in these topic areas and develop skills

**CHEM 323(3)** Course ID:012591 06-JUN-2018**Medicinal Chemistry**

Prerequisites: CHEM 222 or 224

This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME, patenting of IP, and the ethical aspects of pharmaceuticals.

Outcomes: Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs.

**CHEM 371(3)** Course ID:011976 20-JUN-2012**Biochemistry II**

Prerequisite: CHEM 370

This is the second part of a two-semester Biochemistry lecture series that emphasizes important biochemical concepts on lipid, amino acid and nucleotide metabolic pathways as well as the structure and function of nucleic acids. Special topics on sensory systems, motility, immunology and drug development will also be discussed.

Outcome: Students will be able to demonstrate an understanding of metabolic pathways and of current research topics in biochemistry.

**Components:** Discussion(In person), Lecture(In person)  
**Requirement Group:** Prerequisite: CHEM 370. Restricted to Biochemistry Majors  
**Req. Designation:** Writing Intensive  
**Room Requirements:** Electronic Classroom(1), Electronic Classroom(1)

**CHEM 372(2)** Course ID:011977 15-JUN-2019**Biochemistry Laboratory I**

Biochemistry majors only, Prerequisites: CHEM 212, 214, 370 and 222 or 226.

This laboratory is designed to simulate a research experience and to teach basic techniques utilized in a biochemistry laboratory. The course theme involves a comparative investigation of the enzyme glyceraldehyde-3-phosphate dehydrogenase (GAPDH) from various animal sources. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on GAPDH from either an aquatic or land animal source, e.g., trout, tuna, pork beef or chicken.

Outcome: Students will be able to purify and characterize an enzyme in a research context.

**Components:** Discussion(In person), Laboratory(In person)  
**Requirement Group:** Prerequisite : C- or better in CHEM 212, 214, 370, and 222 or 226. Restricted to Biochemistry majors .  
**Req. Designation:** Writing Intensive  
**Room Requirements:** Lab - Chemistry(1), Lab - Chemistry(1)

College of Arts and Sciences - Chemistry and Biochemistry - Subject: Chemistry**CHEM 373(2)** Course ID:011978 10-SEP-2019**Biochemistry Laboratory II**

This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. The course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedure required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form.

Outcome: Students will study the basic concepts of enzyme structure relationships and how to investigate them. The student will learn strategies to produce and test a hypothesis in this area. Additionally, the

**CHEM 385(3)** Course ID:011975 20-JUN-2012**Advanced Enzyme Kinetics and Mechanisms**

Prerequisite: CHEM 370

The major themes in this course will be topics that are related to modern enzymology. The structure of this course will involve lectures by Dr. Ballicora for each topic, and discussion with the students.

Outcome: Students will be able to understand enzyme mechanisms and be able to make oral presentations on recently published articles.

## Plant Biochemistry

Prerequisite: CHEM 370

The major themes in this course will be about topics that are related to plant biochemistry and metabolism. The structure of the course will involve lectures for each topic, with discussion with the students. Students will learn how plants and photosynthetic organisms acquire and process energy. Plant metabolism will constitute a central part of the course, focusing on the main differences from other living organisms. A solid understanding of plant metabolism will inspire the student to think about all the possibilities that plant biochemistry and biotechnology offer to solve critical problems, such as malnutrition, global climate change, drug discovery, and infectious diseases.

COMP 251(3) Course ID:002171 15-JUN-2019  
**Introduction to Database Systems**  
 Prerequisites: COMP 125 or COMP 150 or COMP 170 or COMP 180 or COMP/MATH 215

This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.

Outcomes: Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP 180 or COMP/MATH 215  
**Req. Designation:** Writing Intensive

**Introduction to Computer Systems**  
 Prerequisites: COMP 170 or COMP 215  
 Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensics or Information Technology Minor.

This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.

Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs.

**Components:** Lecture  
**Requirement Group:** Prerequisites: COMP 170 or COMP 215 Co-requisites: COMP 163 or MATH 201 or declared Computer Science,

COMP 319(1) Course ID:010768 15-JUN-2015

**Introduction to UNIX**

Prerequisite: COMP 170 and COMP/MATH 215

An introduction to the UNIX operating system. Topics include files and directories, electronic mail, security, advanced file systems, network utilities, network file sharing, text utilities, shell programming, UNIX internals, UNIX system administration (essentials), the X windowing system, systems programming, and secure shell (SSH).

Outcome: After taking this course, students will develop working knowledge of Unix and be able to use modern Unix operating systems such as Linux, OS X, or Solaris.

**Components:** Laboratory  
**Requirement Group:** Prerequisite: COMP 170 or MATH 215  
**Req. Designation:** Undergraduate Research

**COMP 377(3)** **Course ID:012849** **06-JUN-2018****IT Project Management**

Prerequisite: COMP 251 or COMP 271

This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure and responsibilities, a written interim report, and a final oral and written report.

Outcomes: Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: Comp 251 or Comp 271  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

---

**COMP 378(3)** **Course ID:002207** **15-MAR-2006****Artificial Intelligence**

Prerequisite: COMP 271

This course introduces artificial intelligence theory and programming.

Outcome: Student will learn basic theory of artificial intelligence and be able to build small applications based on it.

**Components:** Lecture  
**Requirement Group:** Pre-requisite: COMP 271  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

**COMP 379(3)** **Course ID:013158** **06-JUN-2018****Machine Learning**

Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal.

Prerequisite: COMP 271 and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

Outcomes: Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making.

**Components:** Lecture(Blended)  
**Requirement Group:** C- in COMP 271 and (at least C- in MATH 131 or MATH 161) and (at least C- in STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

**COMP 462(3) Course ID:002228 15-JUN-2017****Advanced Computer Architecture**

This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.

Outcome: Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems.

This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 & 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. This course will provide students engaged

Writing Lab for UCWR 110 Writing Responsibly. This workshop-based course supports the academic writing students are working on in UCWR 110. Will cover steps of brainstorming, peer review, revision and final editing in order to articulate, organize, and support positions. The course will promote grammatical, compositional, methodological and rhetorical skills in service of effective communication.

Enrollment Conditions: Students placed in this course by WPA score of 109/110.

Outcomes: Students will develop writing strategies including generating ideas, peer review, and revision. They will gain a fuller understanding of grammar, compositional and rhetorical skills, and how these benefit their success in the core UCWR 110 Writing Responsibly course.

 Latino/a Literature

Prerequisites: Graduate standing and consent of the GPD in English.

Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.

## Outcomes:

Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a

College of Arts and Sciences - Engineering Science - Subject: Engineering**ENGR 341(3)** Course ID:013511 15-JUN-2019**Medical Device Systems**

The relevant physiology, clinical need, history, and system descriptions of eighteen fundamental medical devices are discussed and analyzed. Students are also introduced to several medical device systems, including medical instruments, electrical stimulators, and combination products. These topics provide a foundational background for medical device product development and regulation.

Restricted to Engineering Science majors. PREREQUISITES: MATH 266 with a minimum grade of C-, concurrent enrollment in ENGR 313 and ENGR 341L.

Outcomes: Understand and analyze the clinical need and common subsystems underlying eighteen fundamental medical devices. Evaluate the battery requirements for commonly implantable medical devices.

**Components:** Lecture(In person)

**Requirement Group:** Restricted to Engineering Science majors. MATH 266, Concurrent enrollment in ENGR 313 and ENGR 341L

**ENGR 341L(1)** Course ID:013510 15-JUN-2019**Medical Device Systems Laboratory**

Introduction to the graphical user interface, data acquisition, and sensors of common medical devices. The lab experiments are synchronized with the presentation of medical device topics in ENGR 341. Students also create a software application for a Sponsor from the School of Nursing.

Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341.

Outcomes: Use common medical devices subsystems. Apply FDA design control principles for creation of a nursing software application and accompanying requirement and design specifications.

**Components:** Laboratory(In person)

**Requirement Group:** Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341

**Req. Designation:** Internship

**ENGR 342(3)** Course ID:013592 15-JUN-2019**Medical Device Software Development I**

This is the second semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During the first four weeks, students increase their programming skills through exposure to recurrence solving, sorting, and data structures. They then learn how design and verify medical device software using model-based engineering.

Restricted to Engineering Science majors. Prerequisites: ENGR 341 and ENGR 341L, each with a minimum grade of C-. Concurrent enrollment in ENGR 381.

Outcomes: Design a medical device through model-based engineering concepts.

**Components:** Lecture(In person)

**Requirement Group:** Prerequisite : ENGR 341 , ENGR 341L , with a minimum grade of C minus; Co-requisite : ENGR 381 ; Rest

**ENGR 351(3)** Course ID:013514 15-JUN-2019**Electronic Circuit Analysis and Design**

A course for engineering science students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.

Restricted to Engineering Science majors. Prerequisites: ENGR 321, ENGR 323, MATH 266 with minimum grades of C-, concurrent enrollment in ENGR313, ENGR 351L

Outcomes: Understand and apply fundamental concepts of semiconductor physics. Understand and apply complex models to analyze analog and digital microelectronic circuits.

College of Arts and Sciences - Engineering Science - Subject: Engineering**ENGR 351L(1) Course ID:013515 15-JUN-2019****Circuit Design Laboratory**

A lab for engineering science students (in the computer engineering specialization) to provide a first experience working with semiconductor devices (such as diodes, BJTs, MOSFETs, and Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.

Concurrent enrollment in ENGR 351

Outcomes: Identify integrated circuit design issues and develop applicable solutions. Apply advanced principles in analog circuit design, creation and analysis.

**Components:** Laboratory(In person)

**Requirement Group:** Co-requisite: ENGR 351. Restricted to Engineering Science majors.

**ENGR 352(3) Course ID:013581 15-JUN-2019****Methods and Algorithms for Computer Engineers**

ENGR 352 is the second semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The areas of emphasis are the analysis of the methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems

Restricted to Engineering Science majors. Prerequisites: ENGR 351, ENGR 351L, each with minimum grade of C-, concurrent enrollment in ENGR 382.

Outcomes: Evaluate the design and implementation of methods and algorithms in computer engineering. Analyze the performance, efficiency and computational complexities of algorithms using the time-and-space tradeoff.

**Components:** Lecture(In person)

**Requirement Group:** Prerequisite: ENGR 351, ENGR 351L, each with a minimum grade of C-. Co-requisite: ENGR 382. Restricted to Engineering Science majors.

**ENGR 361(3) Course ID:013516 15-JUN-2019****Fundamentals of Environmental Engineering**

This is the first of three Specialization courses in Environmental Engineering. Topics include aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate and transport modeling of contaminants in natural and engineered systems.

Restricted to Engineering Science majors. Prerequisites: MATH 266 and ENGR 322, each with a minimum grade of C-. Concurrent enrollment in ENGR 313 and ENGR 361L.

Outcomes: Apply principles of environmental engineering to describe and quantify key physical, biological and chemical phenomena in natural and engineered systems.

**ENGR 361L(1) Course ID:013517 15-JUN-2019****Fundamentals of Environmental Engineering Lab**

This laboratory course introduces students to the analytical techniques such as mass spectrometry and titration, relevant to environmental engineering practice. This course emphasizes the design of field sampling campaigns of water and soil environments and the statistical data analysis of experimentally estimated water and soil parameters.

Restricted to Engineering Science majors. Concurrent enrollment in ENGR 361.

Outcomes: Quantify fundamental environmental parameters with emphasis on water quality. Design and conduct a field sampling campaign.

College of Arts and Sciences - Engineering Science - Subject: Engineering**ENGR 362(3)** Course ID:013582 15-JUN-2019**Water and Wastewater Engineering**

Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.

Restricted to Engineering Science majors. PREREQUISITES: ENGR 361, ENGR 361L, each with a minimum grade of C-. Concurrent enrollment in ENGR 383.

Outcomes: Undertake calculations related to unit processes; and Undertake the required calculations to design a municipal water and wastewater treatment facility.

This course,(and its companion, HONORS 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty.

Outcome: Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time. Written and visual expressions of these themes are examined in relation to the political and cultural

**Islam in the African-American Experience**

This course traces the development of Islam among African Americans from West African societies prior to the trans-Atlantic slave trade to the influence of Islam on popular culture in the 21st century.

Outcome: Students will gain an understanding of how Islamic identity was maintained in the face of slavery, how and if African-American Muslim communities differ from their emigrant counterparts, and how black nationalist groups such as the Moorish Science Temple and Nation of Islam influenced the Islamization of black consciousness in the 20th century.

**Urban Economics**

Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202.

This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.

Outcome: Students will understand the economic forces that shape urban agglomerations. Students will understand the economic and ethical trade-offs of various urban economic policies. They will be able to think critically about the economic forces that make a city grow and contract over time.

**Components:** Lecture(In person)  
**Course Equivalents:** ECON 320

The content covered in this course will include: Area, perimeter, volume, surface area, Properties of two and three dimensional figures, points, lines, planes, space, the Pythagorean theorem, transformations, fractals, tessellations, perspective drawings and informal proofs. The material covered will address Illinois Learning Standard Goal 7 and Goal 9 and related content performance descriptors for educators. The course is designed for Elementary education majors that wish to enhance, enrich and deepen their knowledge of Geometry and apply for a 6th-8th grade Mathematics endorsement from the State of Illinois.

Mathematics Content Area Standards 7 (Measurement) and 9 (Geometry) from the Content-Area Standards for Educators document published by the Illinois State Board of Education will be emphasized.

College of Arts and Sciences - Mathematical Sciences - Subject: Mathematical Sciences**MATH 356(3)** Course ID:013538 15-JUN-2018**Mathematical Modeling**

This course will teach students how to use various areas of mathematics, such as vector calculus, linear algebra, and ordinary differential equations, to formulate mathematical models in, for example, particle and continuum mechanics, biology, economics, finance, etc.

Prereq: MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra)

Outcome: Students will learn how to formulate mathematical models.

**Components:** Lecture(In person)

Run Time: 10:24:41

College of Arts and Sciences - Neuroscience - Subject: Neuroscience**NEUR 101(3) Course ID:013816 15-JUN-2019****Introduction to Neuroscience**

This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in neuroscience.

Pre-requisite: None; Recommended: BIOL 101 and PSYC 101

Outcomes: Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field.

**Components:** Lecture(In person)  
**Attributes:** Neuroscience  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

**NEUR 300(1) Course ID:005481 15-JUN-2019****Seminar in Neuroscience**

Prerequisites: NEUR 101 with grade of C- or better.

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. NEUR 300 is cross-listed with BIOL 303.

Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses. Students will complete one midterm essay and one final essay exam that will reflect their understanding of the topics discussed in the seminars.

**Components:** Seminar(In person)  
**Course Equivalents:** BIOL 303  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisite: NEUR 101 ; restricted to NRSC-MINR, NRCB-BS, and NRMC-BS students.  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

**NEUR 301(4) Course ID:005483 15-JUN-2019 Department Consent Required****Laboratory in Neuroscience I**

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.

Prerequisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Outcomes: Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques.

**Components:** Laboratory(In person)  
**Course Equivalents:** BIOL 373, PSYC 388  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisites: NEUR 101, BIOL 251, C-. Students must be either a Molecular/Cellular Neuroscience Major  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Lab - Neuroscience(1)

**NEUR 302(3) Course ID:005484 01-APR-2011****Laboratory in Neuroscience II**

Prerequisite: NEUR 301

Students will receive additional training and experience in specialized laboratory methods and techniques used by Loyola faculty in their Neuroscience research.

Outcome: Students will have the opportunity to conduct independent research projects in faculty and student laboratories. This experience will help prepare them to contribute creatively to neuroscience research. Students will be assessed as to the quality of 3 items: 1) a written proposal for the independent research project; 2) a 'meeting quality' scientific poster; and 3) a written 'publication quality' scientific paper summarizing the work done for the independent research project.

**Components:** Laboratory  
**Course Equivalents:** PSYC 389  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisites: Restricted to Neuroscience Minor students.

Modern physics experiments including electromagnetic waves (microwaves), interferometry, spectroscopy, electron and quantum physics, and solid state physics.

Outcome: Students will gain hands on experience and familiarity with experiments from early modern physics, the ability to use spreadsheets and symbolic algebraic software for problem solving and data interpretation, and experience documenting and reporting results including historical background searches.

**Components:** Laboratory(In person)**Requirement Group:** Corequisite: PHYS 235. Restricted to Physics, Theoretical Physics/Applied Mathematics & Biophysics Ma**Req. Designation:** Undergraduate Research**Room Requirements:** Lab - Physics(1)

PHYS 236(3) Course ID:005870 06-JUN-2018

**Modern Physics II**

Prerequisite or corequisite: MATH 264; PHYS 235.

Continuation of 235. Lecture only. Atoms, molecules, solids, superconductivity, the atomic nucleus, nuclear interactions, elementary particles, cosmology.

PHYS 303(3) Course ID:005876 30-JUN-2011

**Electronics I**

Prerequisites: PHYS 126

Corequisite: PHYS 301 and PHYS 303L

Study of analog electronics, including direct and alternating circuit analysis, resonant circuits, diodes, transistors, amplifiers, operational amplifiers, noise, feedback and oscillators.

Outcome: Students will understand and manipulate equations and concepts, and gain experience with electronics equipment, plotting and interpretation of data, synthesizing and writing laboratory results, and the formal verbal presentation of results.

**Components:** Lecture(In person)**Requirement Group:** Corequisites for PHYS 303: PHYS 301 and 303L. Restricted to Physics majors.**Req. Designation:** Undergraduate Research**Room Requirements:** Electronic Classroom(1)

PHYS 314(3) Course ID:005880 06-JUN-2018

**Theoretical Mechanics I**

Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms.

Outcome: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering.

**Components:** Lecture(In person)  
**Requirement Group:** Pre-requisite: PHYS 126; Co-Requisites: MATH 264 and PHYS 301

**Electricity and Magnetism I**

Prerequisite: PHYS 235, 301 & MATH 264

Electrostatics and magnetostatics in a vacuum as well as in linear media, and an introduction to electrodynamics.

Outcome: Students will gain an understanding of mathematical methods of electrodynamics, of static electricity and magnetism including Coulomb's, Gauss', Ampere's, and Faraday's laws and their applications, and of solutions of Laplace's and Maxwell's equations.

**Components:** Discussion, Lecture(In person)  
**Requirement Group:** Prerequisite: PHYS 235, PHYS 301 and MATH 264. Restricted to Physics, Biophysics, and Theoretical Physics

 Political Communication

The purpose of this course is to explore and examine how elected officials and institutions communicate to the public - and the role journalists and PR professionals play in the process--through readings, seminar, and practicum. The class will challenge students to grapple with questions like - What is the meaning of the truth in today's media environment?

Outcomes: Students will understand how and why journalists cover what they cover, and the roles PR professionals/spin doctors attempt to shape the media narrative.

This course focuses on Women and Politics in the United States. It looks at women's movements both historical and current, how women and men in the United States act differently in politics in terms of voting behavior, as political candidates, and as elected leaders.

Students will gain a better understanding of the U.S. political system and how and when women are treated equally and unequally when compared with men.

**Capitalism and Its Discontents**

This course analyzes the intersection of capitalist economics and politics from a critical perspective. Capitalism and Marxism will be reviewed, followed by a critical examination of how capitalism has played out in economic/political practice in the world today. Includes discussions of many economic topics recently in the news, and the potential for change in a variety of directions.

Students will learn to critically analyze the ways in which modern economics leads to less than optimal solutions, including economic inequality. They will also learn to identify other options that may lead to greater equality and economic success.

**Catholicism, Islam and Democracy**

Prerequisites: Sophomore status

This course comparatively explores themes related to the process of democratization in Catholic and Muslim settings. The second half of the 20th century saw significant and sustainable expansion of political rights and civil liberties especially in predominantly Catholic countries in Europe and Latin America. Most recently, democratic struggles have gained impetus in several Muslim countries in the Middle East and South-East Asia. Particularly interesting is the transformation of religious actors (e.g., the Catholic Church, clergy, non-governmental organizations, political parties) from bastions of authoritarian status quo into supporters of progressive political change.

College of Arts and Sciences - Psychology - Subject: Psychology**PSYC 435(3) Course ID:006242 06-JUN-2018****Seminar in Cognitive Neuroscience**

The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

**Methodologies in Women's Studies and Gender Studies**

Over the last decades, issues of gender and sexuality have become integral parts of the academic enterprise. This class investigates how ideas about women, gender, and sexuality have developed, paying particular attention to how knowledge itself has been defined in terms of gender. The course explores the three foundational dimensions of feminist practice: (1) consciousness of inequality, (2) critical analysis of structures of inequality, and (3) transformation of both consciousness and structures of inequality to mutuality. Topics include a brief history and overview of feminist theory, the search for a feminist epistemology, the assessment of various research methods as employed by feminist scholars, and the actual practice of feminist research.

**Teaching English Language Arts in the Middle Grades**

This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.

Outcomes: Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum. Teacher candidates will become familiar with developmental issues related to learning to write across grades K to 12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds.

**Bringing Language, Learning & Dev Theory into Practice**  
 In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.

Outcomes: Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with

**School of Education - Teaching, Learning & Leading - Subject: Teaching, Learning & Leading****TLSC 451(3) Course ID:012818 01-JAN-2016****Teaching and Learning with a Global Framework**

Teacher candidates will work with PreK-12 teachers to develop and implement a trans-disciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates for teaching in schools that offer an International Baccalaureate program.

Outcome: Teacher candidates assess their instruction using a global framework in this module and develop an action plan to improve practice as they move into the final phase of the teacher preparation program.

**Grad Schl at Medical Center - Biochem & Molecular Biology - Subject: Biochem & Molecular Biology****BMB 400(1 - 3) Course ID:005131 15-JUN-2016****Special Topics:Mol Biology**

Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.

Outcome: To learn about diverse areas of Molecular Biology which are not treated in regular courses.

**Components:** Lecture  
**Topics:** Bioinformatics  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork

**BMB 417(3) Course ID:005133 15-JUN-2016****Molecular Biology**

**Components:** Lecture

**Req. Designation:** Fieldwork  
**Room Requirements:** General Classroom(1)

**BMB 471(3) Course ID:005135 15-JUN-2016****Comp MOlecular Genetics**

This course introduces advanced students to the importance of genetics to a wide range of biological problems.

Outcome: Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis.

**Components:** Lecture  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork  
**Room Requirements:** General Classroom(1)

**BMB 490(1 - 3) Course ID:005136 15-JUN-2016****Spec Tps in Molecular Biology**

**Components:** Lecture  
**Topics:** Chromatin Structure and Gene Regulation, Stem Cell Biology, Epigenetics and Stem Cells, Grant Writing  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork  
**Room Requirements:** General Classroom(1)

**BMB 499(1 - 9) Course ID:005137 15-JUN-2016****Research in Molecular Biology**

The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.

Outcome: To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature.

**Components:** FTC-Supervision  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork  
**Room Requirements:** General Classroom(1)

**BMB 501(0 - 1) Course ID:005138 15-JUN-2016****Molecular Bio Journal Club**

This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.

Outcome: To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids.

**Components:** Seminar  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Fieldwork

 This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.

Outcomes: This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics.

This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.

Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.

Outcomes: This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics.

Prerequisite: IDIM 400

The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.

Outcomes: 1. Explain the mechanisms of pathogenicity of various infectious agents. 2. Analyze the mechanisms by which emerging viruses arise. 3. Apply knowledge to viral vaccine development.

**Research**

CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.

Restricted to students enrolled in CMO MS program

The outcomes are: 1. Clearly communicate, describe, and implement techniques used for a research problem; 2. Describe results-obtained; 3. Draw conclusions based on data-obtained; 4. List future directions; and 5. Understand the significance of the work

**Components:** Thesis Research(In person)

**Seminar**

A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research.

Restricted to students enrolled in CMO MS program

The course outcomes are: 1. Describe results or conclusions from a given seminar presentation 2. Understand how research is advancing knowledge in a given field covered by a representative seminar 3. Question new data

CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars.

Restricted to students enrolled in CMO MS program

The outcomes will be: 1. Describe cutting edge research in the particular area of investigation covered by the course ; 2. Discuss limitations to experimental approaches; 3. Discuss real-world application of the research topic being studied; and 4. Critically read scientific literature on cancer biology.

**Function of the Human Body I**

This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this

Enrollment limited to Masters of Science in Physiology students.

This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.

Outcomes: Students will be able to:

2 explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology.

This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

**Medical Nutrition Therapy Theory**  
Prerequisite: FONU 420  
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, renal and disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

Schl of Health Sci & Pub Hlth - Healthcare Administration - Subject: Health Systems Management**HSM 340(3)** Course ID:010045 01-SEP-2019**Health Care Policy**

This course presents an introduction to health policy, i.e., the various ways in which government plays a role in the health of the public and the provision of health care. Emphasis is placed on the structures and processes that influence policy formation, advocacy and change as well as the role of public and private leadership as a key component of healthcare policy. The course highlights major issues in health policy such as Medicare, Medicaid, health care reform under the Affordable Care Act, environmental health policy, pharmaceutical regulation and long-term care.

Prerequisite - HSM 110

Prerequisite or Corequisite - HSM 230

**Components:** Lecture(In person)

This course explores the use of clinical and operational data to improve outcomes and achieve greater efficiencies in healthcare systems. The role of data analytics in supporting informed decision-making is emphasized. Topics include data manipulation, analysis, and visualization. Practical business intelligence tools, such as Microsoft Excel® or Tableau®, are used.

Prerequisite: ACCT 201; ISSCM 241 or PSYC 304

Outcomes: Upon successful completion of this course, the student will be able to: 1. Discuss the role of data analytics in clinical and operational improvement efforts 2. Demonstrate basic skills in the use of assigned business intelligence tools or applications 3. Apply analytic techniques to health and healthcare data 4.

Schl of Health Sci & Pub Hlth - Healthcare Administration - Subject: Health Systems Management**HSM 360(6)** Course ID:010369 01-SEP-2019**Field Internship**

This course is a formalized professional experience that may or may not be compensated. Students work on-site with an organization in the healthcare industry under the supervision of both a field preceptor and faculty advisor. Students develop skills and practical knowledge beyond the classroom by conducting a goal-based project of value to the internship site. Project objectives are developed and agreed to by student, faculty and preceptor. The experience involves four on-campus seminars plus a minimum of 196 on-site hours fulfilled on a weekly basis as mutually agreed between student and preceptor.

Pre-Requisites: ISSCM 241 or PSYC 304, HSM 358 or GNUR 360, ECON 201, ACCT 201, FINC 332, COMM 101, HSM 110, 210, 220, 230, 240, 310, 315, 330, 340, 368, and 386.

**Foundations of Health Informatics**

Health Informatics / Biomedical Informatics is the information as studied in or applied to biomedical science, healthcare, and public health. Thus, its focus is on the use of informatics methods to transform data into actionable knowledge within the broad context of health, from basic science, to public health.

Outcomes: By the end of this course, students will be able to understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge.

**Clinical Data Science**

Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.

Outcomes: By the end of this course, students will be able to understand and describe the steps in the life cycle of data in biomedical and clinical research.

**Translational Bioinformatics**

This course covers the fundamental issues of bioinformatics and how they apply to translational and clinical problems. The course is organized in 4 parts: sequence analysis, databases and ontologies, genome-wide association and linkage analysis, and networks.

Prerequisite: HIDS 411; Clinical Data Science

Outcomes: Students will be able to understand and apply a broad range of bioinformatics algorithms, and their computational efficiency; apply and analyze informatics techniques to retrieve, store, and analyze `omics; data.

**Components:** Lecture

**HIDS 421(3) Course ID:013936 01-JAN-2020 Instructor Consent Required**

**Security and Privacy in Healthcare**

This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.

Outcomes: Students will be able to understand the role of information security and data privacy in healthcare; apply basic principles of computer security; apply/analyze security principles in research data management.

**Ontologies in Health**

This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.

Outcomes: Students will be able to understand the role of ontologies in knowledge representation; understand the differences between realist and anti-realist ontologies and apply different types of ontologies in biomedical research

**ENVS 218(3) Course ID:012715 15-JUN-2019****Biodiversity & Biogeography**

Prerequisite: ENVS 137 or UCSF 137

This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.

Outcome: Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare.

**Science & Conservation of Freshwater Ecosystems**

Focus: Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.

Prerequisite: ENVS/UCSF 137

Outcomes: Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face.

Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.

Prerequisites: ENVS 280 or BIOL 265

Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem.

**Conservation and Sustainability of Neotropical Ecosystems**

Prerequisites: For Biology Majors/Minors: Bio 265; For Environmental Science Majors: ENVS 280

This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.

Outcomes: Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture.

**Introduction to Geographic Information Systems**

Prerequisites: This course is intended for upper-division undergraduates (junior/senior) and graduate students.

Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.

Outcomes:

¿ describe the conceptual/theoretical and practical/technological background of GIS.

**Alternative Dispute Resolution Workshop**

One credit workshop focusing on dispute resolution in an employment setting. Workshop takes place over two days. Both the first and second day of the workshop involve resolution of an EEO complaint in full length simulations -- the first day using mediation, and the second day resolving the dispute using arbitration. Students are expected to read and research in preparation for both days of the workshop. Participation in the one credit workshop requires attendance in an evening Human Resources and Employment Relations (HRER) course. Students will be assigned to teams and will begin working with HRER team members at this evening session. Each workshop day is followed by a debriefing session. All participants will be observed and evaluated by employment attorneys skilled in ADR. Enrollment is limited to students simultaneously enrolled in Professor Sacha Coupet's other ADR course and students who are seeking an intensive mediation and arbitration experience in addition to that provided by the foundational ADR course.

**Class Actions**

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

<b>Argument and Persuasion</b>		
Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise

This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules,

 This course will give students practical experience with common pre-trial civil litigation tasks they will encounter in private practice. The instructor's principal goals is to expose students to the "nut and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. Specifically, this course will address: (i) conducting faculty investigations preceding and during litigation; (ii) drafting initial pleadings, such as complaints, answers, affirmative

**Housing Law and Policy in United States**  
 The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting.

The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation,

**LAW 197(2)** Course ID:007394 25-OCT-2013**Advanced Business Organizations including a Comparative Perspective**

This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors; elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students

**Emerging Issues in Public International Law**

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. **LAW 216(1)** Course ID:012909 15-MAR-2018**Women and Leadership**

Women & Leadership is a one credit, seven week seminar course for law students that examines the obstacles (internal and external) that prevent women from reaching leadership positions in proportional numbers. Over the course of seven weeks, students engage in dialogue in response to assigned readings and self-assessment tools. Students also hear from female leaders working in different areas of legal practice who will discuss their experiences and the decisions that helped shape their careers. Grading is based on participation and a final paper.

This seminar will take an interdisciplinary approach to the intersection of environmental and energy issues. It will introduce students to a variety of solutions to the problem of pollution from the energy sector. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequestration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

Transportation and logistics is a multi-trillion dollar industry. Every item you purchase or use in your everyday life was delivered by a truck or other mode of transportation (rail, ocean, air). America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various

Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep. While we will complete many essay and MBE-type questions, there will be no final exam.

Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law.

This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required.

This course provides a comprehensive, introduction to the transnational federal laws and law enforcement efforts launched in response to human trafficking -- this global human rights challenge. The course will use a text written by the professor and a colleague who have the distinctive perspective of two individuals who have spent their careers in the trenches investigating, prosecuting, and adjudicating these intricate and commonly emotional cases. The course will offer open debate about human trafficking by stripping it of its unhelpful, constricted definitions, and by candidly discussing the state of the law, the criminal justice process, and the treatment of offenders and victims. The course examines today's system of federal anti-trafficking laws in relation to the global efforts to eradicate this pervasive human rights violation. It will explore the unique challenges posed by transnational investigations; the current state of the U.S. government's transnational anti-trafficking efforts; the myriad domestic and international legal instruments

Through this course, the student will attain a certain facility with agreements, their organization and structure, their language, and their provisions (and the interaction of these provisions). The course will pay considerable attention to how courts have treated various contractual provisions. The examination of actual contracts will begin with non-disclosure agreements and will proceed into employment agreements, services agreements, and agreements for the sale of goods. Topics will also include merger-and-acquisition agreements. In addition, readings will include comments from leading practicing attorneys (from law firms such as Sidley, Kirkland, and Cravath, and from legal departments at companies such as Microsoft, Accenture, and JP Morgan), and there is

Critical Legal Studies posits that the influence of the social construct of race in America is ubiquitous, including in law. Moreover, it suggests that so-called color blind law-making is unlikely to address the most important means by which race continues to operate to oppress many persons in America. Finally, it teaches that racial reform occurs only in accordance with the interests of those with political and economic power. This course will survey the key scholarly works that form the basis for these precepts and seek to test these positions against the reality of race in America today.

**Courtcraft Excellence in Advocacy**

Courtcraft is the foundation and the discipline which makes for excellence in advocacy. It is a holistic approach to advocacy which harnesses together at least four principles: purpose, preparation, presentation and persuasion. Courtcraft should never be an option for the would-be advocate. It is not a luxury, but an essential grounding without which no law student can begin to call himself/herself an advocate. Like any skill, advocacy can be taught. Few of us are born advocates. Most need training and guidance. Courtcraft develops and enhances all that the student of law has been taught and prepares him/her for excellence in advocacy.

Our courtcraft programme is not founded simply on theory or academia. It is based on our own many years of experience as advocates appearing almost daily in court. Purpose Your role as a lawyer and advocate. Your duty

This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

This course deals with the legal ramifications of disputes involving contracts with two or more states or other jurisdictions. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states. A special focus this year will be on the application of these areas of law to family law issues.

The seminar will focus on recent Illinois zoning and land use cases. Land use and zoning is one of the most important substantive law areas applicable to real estate development. Each student will select a recent reported case concerning subject property in the Chicago area. The instructor will assign the cases leaving students free to propose suitable alternatives. Students may trade cases with other students. Once case assignments have been finalized, the student assigned the cases will visit the site(s), perhaps taking photographs or videos. To the extent possible, the parties and their counsel will be interviewed. No library research should be necessary. However, all students will read the court's opinion, and the student reporting on the case will also read the briefs of the parties. Each student will be given one full class period (50 minutes) to present an oral report to the seminar, beginning at the sixth week of classes. All members of the seminar will be required to attend these reports. After reporting and discussing the case with the seminar,

Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

## Storytelling and Presentation Skills for Lawyers

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

School of Law - Law Department - Subject: Law**LAW 418(2)** Course ID:004623 15-OCT-2014**Pre-Trial Litigation**

This course integrates a theoretical and practical approach to the pretrial components of litigation. Students gain an understanding of the purpose of pleadings, pretrial motions, depositions, and settlement conferences, and extend their knowledge through practical experience. The second portion of the course complements the courses in trial practices by investigating the psychology of courtroom communication and its related effects. Overall, students should develop a more well-rounded perspective of the pretrial aspects of litigation.

A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

**Professional Identity Formation**

Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the

**Documenting and Negotiating Finance Transactions**

This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Prerequisites: Students taking this class will be expected to have taken Business Organizations. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course.

Critical theory attempts to answer the age old question, "what is law?," by asserting that law is the reflection of the political values of the dominant group within society. After a brief introduction to the more traditional theories of justice; such as natural law, legal positivism, and legal realism, students will take up the challenge of Critical Legal Studies. Subjects covered include an economic analysis of law; gender and sexual orientation; and critical race theory. Other possible topics include an evaluation of law and economics; the emergence of Sharia law; and the role of feminism in the 21st century.

This course will be taught at Chicago Kent College of Law. (It may be taken as either a regular course with an exam at the end, or as a seminar with a paper in lieu of the exam.)

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

This course offers students the opportunity for a hands-on approach to developing their skills and knowledge of the procedures and dispute resolution strategies involved in federal tax controversies. This intensive course will offer experience with pre-controversy planning techniques such as: pre-filing motions, conflict resolution with the IRS through both examination and appeals, and preparing for tax court litigation. Students will be engaged in a series of real-time scenarios for identifying issues, drafting responses and preparing memos related to both corporate and individual tax disputes.

Experienced tax attorneys will guide students through a series of mock procedures and interactions with the IRS, and assist the students in developing and improving their analytical and writing skills. Through a mix of panel presentations and guests lectures, students will gain an understanding of the types of challenges

This course begins with an exploration of the legal and political structure of American education, including issues such as: (1) the role of government in mandating education; (2) the relationship between state and religion in the educational process; (3) the governance of educational institutions and the shaping of curriculum; and (4) the rights and responsibilities of teachers and students. The American legal system's resolution of these difficult issues are then compared to the resolution of these same issues by legal systems in other countries. Finally, students are asked to question the fundamental assumptions underlying the American educational system based on their understanding of different assumptions underlying the educational systems in other nations. Students are required to help to facilitate class discussions and to prepare a paper that analyzes critically an issue raised in the class.

**LAW 476(3)** Course ID:011958 21-MAR-2011**Art Law**

Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, and due diligence and will be required to prepare the first draft of the operative document for a transaction.

**LAW 536(2)** Course ID:013483 28-JUN-2017**Legislative Drafting**

The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment.

The course will be taught by legal professionals with extensive experience in legislative drafting and

**LAW 537(2)** Course ID:012460 24-AUG-2012**Human Rights in the Global Economy**

Human rights issues have come to the fore front around the world, in courts and legislatures, in corporate board rooms, in the corridors of the United Nations and the international trade and financial institutions. This emergence and universalization of human rights has arisen as the promotion and globalization of free markets through trade liberalization, flows of foreign direct investment and finance across national boundaries has intensified. This course will examine how the growing influence of the international human rights framework is implicated in settings such as the overseas manufacturing operations of companies like Apple, in extractive industry mining activities such as those involving 'blood' diamonds, and in China's huge infrastructural projects particularly in Africa. These case studies and more will be examined in light of the history and theoretical origins of human rights such as rights to food, housing, health, education, cultural expression, political participation, and prohibitions of discrimination and violence. The course will examine

This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. There will be a particular emphasis on transactions and involving ownership, leasing, use, and operation of real estate, which (just as with many for-profit businesses) is typically the largest single category of capital investment and the second largest category of repeat expense (after total personnel costs) for many not-for-profit organizations. This weekend course will provide an introduction to the essential skill set you will need as an entry-level M&A deal lawyer. This is increasingly important, in light of growing client unwillingness to pay junior associate rates for attorneys to learn on the job. Facing an ever more competitive recruiting environment, it will be crucial for you to come out of the gate armed with the appropriate skill set for your chosen practice area. This course is designed to prepare you to speak intelligently in interviews and hit the ground running on the job. To this end, the focus of the class will be the basics of a typical M&A transaction, including how to perform due diligence and how to review and draft resolutions, share purchase agreements, third-party opinion letters, and other closing documents commonly assigned to junior associates. You will also study sample form agreements that appear in many different types of deals, including share purchase agreements, debt documents, confidentiality agreements and escrow agreements. When appropriate, we may invite guest

The management of large international patent portfolios (comprising patent applications filed in several jurisdictions), and an understanding of law and treaties affecting those portfolios, is fundamental to international patent practice. We will discuss the basics of filing and prosecuting patents under the Patent Cooperation Treaty (PCT), including issues that may arise when prosecuting a US application under the PCT. We will also consider other multinational patent treaties commonly used in foreign patent application filings that affect the management of international patent portfolios and US patents. We will take a comparative look at several aspects of U.S. and foreign patent laws, and will consider current controversies surrounding patents in the international arena.g., regarding access to medicines and the patentability of business methods and other controversial subject matter. Patent Law is a prerequisite. This requirement can be waived only with the permission of the instructor.

Electronic discovery ("e-discovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts).

Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and

People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I

Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say." [1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]" [2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or

In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It

Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work or who have obtained their Illinois Supreme Court Rule 711 license. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the

This course examines the legal relationships among children, family and the state, primarily in the context of issues over which dependency (child welfare) courts traditionally have jurisdiction. The subject matter is divided into two sections, the first exploring Supreme Court jurisprudence on the issue of parental rights and family privacy. The second explores the emerging doctrine of children's rights, also looking to Supreme Court cases that have pronounced limited, but distinct, rights for minors, as well as civil matters including child neglect, abuse, termination of parental rights, and adoption. **Juvenile Justice**

In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare?

Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

**Intl Children's Human Rights**

In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

Current Issues in Children's Law Seminar  
This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

This intensive, one-week seminar, titled Children's Summer Institute, provides a wide-ranging interdisciplinary exploration of critical issues affecting children. A diverse team of faculty offers interdisciplinary perspectives on the meaning of "best interests of the child." The course is open to graduate students throughout the University. Experts from law, psychology, social work, and child development present information, participate in discussion with students, and debate issues from the perspectives of their own professions. Faculty provide both a theoretical framework for examining the issues, as well as experiential learning. The week may include case studies, lectures, outside speakers, a field trip, and role-playing exercises. The 2017 Children's Summer Institute will focus on the impact of recent and pending federal policies on children and families, especially those involved in the immigration and child welfare systems.

The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults.

The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience.

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

**LAW 686(2)** Course ID:013450 15-JUN-2017**School Discipline Reform: Linking Law, Policy and Practice**

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

**Health Justice Project**

The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend

**Privacy Breach Incident Management and Reporting**

A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

**European Union Privacy Law**

European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgments in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed.

The course will focus on the substantive and procedural elements of the various forms of alternative dispute resolution techniques in the United States. The class will cover arbitration, negotiations, mediation, mini-trials, non-binding arbitration using legal assistance, and the role of counsel in each of these processes. A significant amount of class time will deal with mediation as well as both administered and non-administered arbitration. The class will address established principles of arbitration law, the various types of arbitrations, the rules governing arbitration, the role of counsel in the processes, as well as the power, responsibilities and ethical requirements of both mediators and arbitrators. The course will combine a traditional lecture format with practical experience designed to provide the student with a strong substantive basis in mediation and arbitration, as well as clinical experience with several mock mediations and arbitrations interspersed during the course term.

**Federal Criminal Trial Advocacy**

Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem - which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation.

The class will be divided into three parts: 1) Investigation 2) Suppression Hearing and 3) Trial.

**Antitrust & Intellectual Property**

This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

**LAW 920(1)** Course ID:012363 24-OCT-2016**Health Law Seminar Series**

This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

This course will develop the students' key knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. Comparative law and an interdisciplinary vision represent the added value of international legal assistance. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal systems: common law, civil law, religious law, customary and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. The course will provide practical examples of cross-system rule of law assistance. Students will get acquainted with the three-pronged approach (norms, resources, society) developed and implemented by A. Cordahi in the field. Attention is devoted to issues of comparison and contextualization when striving to enhance: state institutions, constitutions and the justice

This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any

The philosophy in the course is that developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action.

This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors,

**PLAW 107(2) Course ID:013352 22-OCT-2019****Rule of Law in Conflict Prevention and Peacebuilding**

Strong rule of law is essential to both conflict prevention and post-conflict recovery. The lack of effective legal institutions to uphold human rights, support political inclusion, and provide access to mechanisms for redress when rights are violated create conditions in which conflict may arise. After conflict, failure to achieve just terms or reconcile opposing factions in peace agreements may only replicate those conditions, thus increasing the likelihood of a return to conflict. The cessation of conflict poses further challenges to building the rule of law; state institutions are often fragile. Human capacity within the host nation is often severely constrained. Efforts to rebuild states after conflict are often carried out under the auspices of multilateral interim administrations or as part of military operations.

This course will explore the relationship between rule of law development and conflict. It will analyze the

After a general introduction on legal reasoning and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and society in different branches of the law. Emphasis will be placed upon the experience of law by "its professionals" (judges, attorneys at law, in-house lawyers, drafters of legislation, law enforcement agents, etc.) as well as by rights holders and duty bearers, claimants, defendants, the administration and ordinary citizens. A set of cases have been selected to understand legal relations and how rules are applied in the different legal environments. This course is designed to assist lawyers and other professionals working with the law in developing the techniques of scholarly legal research and writing in relation to rule of law development. The methods and skills that will occupy this course are designed to achieve two objectives. The primary objective is that students will be able to apply scholarly research skills, which will be instrumental for conducting in depth studies on rule of law development topics for term and major papers during the PROLAW Program and for the final capstone project. In keeping with the focus on development issues, substantial emphasis will be given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal advice, policymaking, and rule of law development implementation.  
The research methodologies analyzed in this course will enable students to develop a deeper knowledge of

**Health Care Delivery and Organization**

This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.

Outcomes: Upon successful completion of the course, the student will be able to: 1. Distinguish the roles, functions and responsibilities of healthcare system components (i.e., delivery, financing and regulation). 2. Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access. 3. Compare the organization of multiple healthcare delivery structures to the

**Population Health Informatics**

This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.

Outcomes: 1. Apply principles of health care informatics for population health. 2. Apply basic concepts of epidemiology for population health 3. Analyze the role of population health informatics in understanding data, information, & knowledge. 4. Apply population health informatics in surveillance, interoperability and big data contexts. 5. Evaluate quality in electronic health records, mobile applications, and personal health

**Nursing and Health Care Administration Practicum**  
 The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.

Outcomes: 1. Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings 2. Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions,

 This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.

Outcomes: Upon successful completion of this course, the student will be able to: 1. Explain the forces driving the focus on safety and quality in health care. 2. Evaluate strategies for improving safety and quality in health care. 3.

**Clinical Role Transition**

Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.

Outcomes: Upon successful completion of this course, the student is able to: 1. Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care. 2. Apply principles of quality and safety in patient care settings. 3. Apply knowledge of prioritization and delegation in the management of care. 4. Collaborate with patients, families, and members of the

**Theories & Concepts for Advanced Clinical Practice**

This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.

Upon successful completion of the course the student will be able to: 1. Understand the history and driving forces for knowledge development in nursing. 2. Describe the philosophical foundations of nursing and advanced nursing practice. 3. Understand the levels of theory development in nursing. 4. Explain the use of selected concepts and middle-range theories to guide advanced nursing practice. 5. Analyze concepts and theories for use in nursing practice. 6. **Special Populations and Topics in Emergency Health Care**

This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.

Enrollment Conditions: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology.

**Components:** Lecture(Hybrid)

**Management of Common Adult Health Problems**

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.

This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

Pharmacological and non-pharmacological interventions for management of substance use and addictive disorders are addressed.

Prerequisite : GNUR 474 - Psychiatric Mental Health Care Across the Lifespan II

Outcomes: Upon successful completion of the course, the student will be able to: 1. Synthesize evidence-based scientific theories of substance use and addictive disorders. 2. Understand the neurobiological aspects of addiction, 3. Assess and diagnose substance use and addictive disorders for clients. 4. Apply pharmacologic,

**Philosophy of Nursing: Nursing as a Moral Practice**

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes: 1. Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy. 2. Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing. 3. Identify presuppositions/assumptions underlying one's positions and the bases for

This course provides students with a basic understanding of the research grant application process. The overarching objective is to foster fundamental skills and strategies needed to prepare and submit a competitive research grant proposal. Emphasis is placed on the means by which to best position a research grant application for success. Sources and types of funding from governmental agencies, private foundations and professional societies are considered, with an emphasis on federal (NIH, AHRQ) grant programs, mechanisms, application and review process. Key aspects of successful proposal development from conceptualization of an idea or research question to submission of the application is fully developed and explored. Strategies for successful writing of each component of a research grant are provided using examples

**Nursing and Health Policy**

This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level. The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
