

## DEPARTMENT OF FINE AND PERFORMING ARTS – DIGITAL PHOTO LAB

Conversion of a typical 750 sq ft Mundelein classroom into a digital photography studio. The renovations included an installation of a 4'x4' pipe grid at ceiling height. Lighting controls and audio accessories are mounted to the pipe grid to provide proper lighting to the space. Additionally, there were acoustic panels installed to mitigate sound transmission to video recordings.

The renovations bring the photography classes to Mundelein and the center of the DFPA after an extended residency in the basement of Crown Center. Replacing a dated dark room with a state-of-the-art video and photography recording studio.
